Geostorm The Flood Bobby Akart, 2020-01-07 Since the formation of Earth billions of years ago, it has been through cataclysmic changes. She's been frozen and fried, pummeled from space and experienced natural changes like the reversing of its magnetic poles. It's happening now and the face of the planet may never be the same. Geostorm will leave you breathless! International bestselling author Bobby Akart delivers up-all-night survival thrillers in The Geostorm Series, the story of a planet-changing phenomenon, a natural disaster brought about by the Earth itself. Pulse pounding excitement. Akart pulls you into the story with his masterful writing talent until you are holding your breath captivated by the plot twists and each turn of the page leading you deeper into the world he has spun. Throughout the millennia, mankind has faced epic floods. Evidence shows that the sudden reversal of the planet's magnetic field, a fast pole reversal, had a profound impact on climactic conditions. What was once frozen, is not melted. The rising sea levels had to go somewhere. In past civilizations, man persevered because after these floods, the waters always receded. Until they didn't. As the catastrophe unfolds, does a well-intentioned effort to save America's power grid result in unintended deaths? How will families cope with the changing face of the planet, and the brutality of their fellow man? One of the best living speculative fiction writers today. Will the planet return to the dark ages? Will we destroy civilization ourselves before the Sun gets its chance? Follow the story of the Boone family, Indiana farmers and their children who battle Mother Nature, her animals, and their fellow man, in The Flood. Man, what a rush! Earth is alive. Deep beneath her skin is our planet's life blood. Rivers of molten iron, pushing around a core - her beating heart. This moving, fluid iron generates the magnetic field maintaining the delicate balance of life on earth. Until she has a change of heart. Spellbinding. Best Akart book to date - no one can hold your attention better! International bestselling author Bobby Akart delivers pulse-pounding thrills in The Geostorm Series, the story of a planet-changing phenomenon, a natural disaster brought about by the Earth itself. Every time I have read a series by this author, I think, wow, this is the best. Now, I think, this is definitely the best. Action, suspense, everything - a definite thumbs up. The Earth's magnetic field surrounds our planet like an invisible force field connected by a north and south pole. It's what makes compasses point north and it protects our atmosphere from the continual bombardment of geomagnetic storms from the Sun. Without a magnetic field, the planet's atmosphere would be stripped away leaving critical infrastructure at risk and humanity exposed to deadly radiation. What happens when these poles begin to wander? This field grows weaker with deadly consequences for all of humanity. The change in the world's climate could change the face of the planet as we know it. Akart is one of those very rare authors who makes things so visceral, so real, that you experience what he writes. Readers will become enthralled with the discoveries of Chapman Boone, former storm chaser, and full-time field meteorologist who begins to experience extraordinary weather anomalies. His sister, Kristi Boone, is a Doctor of Veterinary Medicine known for being attune to the exotic animals within her care. At first, the changes in the animals' behavior are subtle ... until they aren't. Follow the story of the Squire and Sarah Boone family, Indiana farmers and their children who begin to recognize the signs of The Shift. Bobby Akart is truly one of the best, greatest writers alive today.

Geostorm The Collapse Bobby Akart, 2019-11-30 As the magnetic field reverses, a well-intentioned president tries to avert the worst-case scenario The Collapse of the power grid. But does his decision create mayhem nonetheless? In an attempt to avoid the collapse of society, does he cause it? Geostorm will leave you breathless! International bestselling author Bobby Akart delivers up-all-night survival thrillers in The Geostorm Series, the story of a planet-changing phenomenon, a natural disaster brought about by the Earth itself. Pulse pounding excitement. Akart pulls you into the story with his masterful writing talent until you are holding your breath captivated by the plot twists and each turn of the page leading you deeper into the world he has spun. A cataclysmic scientific phenomenon is building deep within the Earth. Evidence emerges that the planet's magnetic field is reversing due to a sudden, rapid pole shift. It's happened before, and it is happening again only ... This time it's different. Modern civilization, life

as we know it, is facing its greatest challenge. The Sun, our beloved star that gives us life, threatens us with each passing day. The Earth's protective shield, the magnetic force field that protects us from cosmic rays, is decaying at a much faster rate than scientists ever contemplated. There is hope. As dire as the crisis may seem, hope lingers as a plan is implemented to protect America's power grid from the impact of a devastating geostorm. But does this plan have the unintended consequences of bringing the nation to its knees? Only Akart can weave a story that begins so calm, so normal and before you know it, you are at the end of the book with your pulse pounding in your chest and your mind screaming for more. Will the planet return to the dark ages? Will we destroy civilization ourselves before the Sun gets its chance? Follow the story of the Boone family, Indiana farmers and their children who battle Mother Nature, her animals, and their fellow man, in *The Collapse*. Man, what a rush!

Geostorm The Pulse Bobby Akart, 2019-10-21 Life on Earth hangs in the balance, and only a handful of people realize it. Until the first Geostorm hits Europe. As the poles shift, the planet's magnetic field weakens, stripping away our protection from the Sun's power. That which gives us life, can take it away as well. With his 40th novel, Bobby Akart turns the world upside down again! International bestselling author Bobby Akart delivers pulse-pounding thrills in *The Geostorm Series*, the story of a planet-changing phenomenon, a natural disaster brought about by the Earth itself. The Geostorm series comes out of the gate at full pace and action to let the reader know that this book will be filled with things that you can't unsee and leave you with that look over your shoulder feeling. For eons, since the formation of our planet, Earth's magnetic poles have reversed. Powered by the machinations of her spinning iron core, coupled with the hot liquid that has churned around it since the planet's infancy, this geologic wonder has been occurring without much fanfare, until now. A geomagnetic apocalypse is descending upon humanity. It's a catastrophic event caused by the Earth's magnetic field growing restless. And now, the changes are accelerating at an astonishing rate. What happens when the magnetic field grows weaker? There will be deadly consequences for all of humanity. The change in the world's climate and the geological impact could alter the face of the planet as we know it. And the Sun, our beloved star that gives us life, can also wreak havoc, ending life on Earth as we know it. Polar shifts, GPS navigation issues, strange animal behaviors and even stranger weather, and scientists unwilling to move off the popular narrative all combined and masterfully crafted in Mr. Akart's engaging storytelling style. The European continent has been besieged by a geomagnetic storm, one that ordinarily would cause minor disruptions in communications and GPS devices, but because of the weakened magnetic field, has destroyed power grids. The world is playing a deadly game of Russian roulette with the Sun as the magnetic field weakens. Which part of our planet will be hit next? Follow the story of the Squire and Sarah Boone family, Indiana farmers and their children who battle Mother Nature, her animals, and their fellow man, in *The Pulse*. Wow, I didn't see this coming! The type of book an adrenaline junkie loves!

Geostorm The Pioneers Bobby Akart, Tbd, 2020-03-13 Imagine a world where rising sea levels inundate coastal megacities. People flock to higher ground, only it was too late. Entire species became extinct in the blink of an eye, and conflicts are fought over dwindling resources. It's not so difficult in the Geostorm series. The Geostorm series consumes you. You don't read it ... you live it. International bestselling author Bobby Akart delivers up-all-night survival thrillers in *The Geostorm Series*, the story of a planet-changing phenomenon, a natural disaster brought about by the Earth itself. If you want to read a freight train of a series that just draws you in, this is it. After weeks of devastating extreme weather and unimaginable loss, the Boone family has arrived at a place of refuge. After *The Tempest*, mankind still called the oceans by their former names. Only now, it was one giant ocean, littered with pieces of land like crumbs fallen from the sky. Like their ancestors of centuries ago, the Boone family now faces a new challenge. They've survived some of the worst Mother Nature has to offer. Now, they must start over like the pioneers of old with new threats lurking on every trail and behind every tree. All I can say is WOW! This is a masterpiece of climate fiction. Totally captivating from start to finish.

Geostorm The Shift Bobby Akart, 2019-09-23 The Earth's magnetic field surrounds our planet like an invisible force field connected by a north and south pole. It's what makes compasses point north and it protects our atmosphere from the continual bombardment of geomagnetic storms from the Sun. Without a magnetic field, the planet's atmosphere would be stripped away leaving critical infrastructure at risk and humanity exposed to deadly radiation. What happens when these poles begin to wander? This field grows weaker with deadly consequences for all of humanity. The change in the world's climate could change the face of the planet as we know it--Back cover.

Geostorm David Bolton, 2020-06-18 Storyline When catastrophic climate change endangers Earth's very survival, world governments unite and create the Dutch Boy Program: a world wide net of satellites, surrounding the planet, that are armed with geoengineering technologies designed to stave off the natural disasters. After successfully protecting the planet for three years, something is starting to go wrong. Two estranged brothers are tasked with solving the program's malfunction before a world wide Geostorm can engulf the planet.

Geostorm The Tempest Bobby Akart, 2020-02-08 Since the beginning of time, four billion life forms have been created. Ninety-nine percent are now extinct. The human species is the youngest of them all. A mere blink in the eye of time -Time, which is running out. I couldn't put it down. An absolutely phenomenal book! International bestselling author Bobby Akart delivers up-all-night survival thrillers in The Geostorm Series, the story of a planet-changing phenomenon, a natural disaster brought about by the Earth itself. Akart excels at keeping us reeling ... in the ever-evolving apocalyptic world. Imagine a world where storms inundate coastal megacities. Entire species become extinct in an instant. And conflicts are fought over dwindling natural resources, food, and even shelter. The rapid pole shift resulting in the sudden reversal of the planet's magnetic field changed the face of the planet, forever. Rain fell for months. Ice melted. Waters rose. Land masses disappeared. Humanity had to go somewhere. Throughout the history of mankind, humans persevered because these cataclysmic events came about slowly allowing them time to analyze and adapt. This time, it was different. The end of the world came and we no longer asked, who to die by fire and who to die by sword? We all died by water. As the dramatic changes in the Earth's climate came about, superstorms, flooding, and weeks on end without sunlight became the norm. Until ... This is my favorite series from this author and you really don't want to miss it. Earth's geologic revolution continued. Scientists had fought for centuries to study and explain the changes to our planet. Using advanced methodology, they routinely predicted our future. All of that research was for naught as the rapid pole shift generated The Tempest, a storm of biblical proportions. OMG Akart did it again!

Geostorm, 2018

Geostorm (DVD & Blu-ray) (2017), 2018 After an unprecedented series of natural disasters threatened the planet, the world's leaders came together to create an intricate network of satellites to control the global climate and keep everyone safe. But now, something has gone wrong. The system built to protect the Earth is attacking it, and it's a race against the clock to uncover the real threat before a worldwide geostorm wipes out everything.

Climate Change in Popular Culture James Craig Holte, 2022-06-17 An invaluable resource for general readers investigating climate change, this book examines the impact of climate change on popular culture and analyzes how writers and directors treat the disasters caused by climate change in their novels and films. *Climate Change in Popular Culture: A Warming World in the American Imagination* is the first study that includes analyses of both fiction and popular nonfiction works devoted to climate change. In addition, the book examines a number of classic works from the perspective of the growing field of climate change literature and includes a brief history of climate change science as well as basic scientific definitions, all intended for general readers. The text provides an introduction to the science, politics, and economics of climate change. It also includes both historical overviews and potential probable futures projected by leading climate scientists and environmental writers. In addition, the text looks at

how such creative writers and directors as Margaret Atwood, John Steinbeck, Paulo Bacigalupi, Kim Stanley Robinson, T. C. Boyle, Michael Crichton, and Octavia Butler, among others, have used the disasters caused by climate change in their work.

Ian Ogilvy's Withering Slights Ian Ogilvy, 2022-09-14 Perhaps the most haunting and tormented love story ever written, Emily Bronte's *Wuthering Heights* is the tale of the troubled orphan Heathcliff and his doomed love for Catherine Earnshaw. This isn't quite that. Ian Ogilvy's *Withering Slights* is a slightly less haunting but no less tormented love story between the celebrated author and actor, and his ever-looming wife - known simply as SHE. Here within are Mr. Ogilvy's unique and verbatim reviews of many films he's seen with his other half (his stream of consciousness style so beloved of his social media followers), with exclusive reviews written just for this collection. And an Afterword by SHE herself. Gulp.

Solar Sailing Colin R. McInnes, 2013-11-27 Solar sailing - using the sun as a propellant - offers the possibility of low-cost long-distance missions that are impossible with conventional spacecraft. This first comprehensive book on this propulsion method provides a detailed account of solar sailing, at a high technical level, but in a way accessible to the scientifically informed layperson. Solar sail orbital dynamics and solar radiation pressure form the foundations of the book, but the engineering design of solar sails is also considered, along with potential mission applications.

A Great State: The Divide Shelby Gallagher, Julie Atwood is struggling with the day-to-day challenges of being a single mom. She works for a non-profit by day and clips coupons by night. The time in between is spent doing homework with her son. She wants a stable and secure life for him, but she needs a new start for herself. That won't come easy, though. Julie is recently divorced, financially stressed, and still reeling from a violent attack in her past. She is determined to make it on her own, however. She learns self-defense skills and enrolls in a women's-only firearms class. That's where she meets a like-minded woman who helps take her skills to the next level. Julie's personal evolution continues as she uses her couponing know-how to stockpile essential food and survival supplies. She will become self-reliant—and never be a victim again. The urgency of her efforts takes on new importance as society begins unraveling around her. America is divided. Conservatives and liberals are at war. Then the newly elected president cuts funding to so-called Sanctuary States, including her home state of Oregon. Julie loses her job. Everyone who lives off the government gets desperate. Riots. Crime. Fire. Julie needs to flee to the safety of her family cabin in Colorado's Rocky Mountains. Can she get there, though? There is an exodus of people, and the conservative states—now called Great States—have established border checkpoints. Refugees are being turned away. Will she be one of them? Will Steve, her ex-husband, let her take their son far away? Will he demand to go with them? There is a wildfire at hand. Civilization is crumbling. And Julie is running out of time. *The Divide* is the first book in the *A Great State* trilogy.

Futures Worth Preserving Andressa Schröder, Nico Völker, Robert A. Winkler, Tom Clucas, 2019-02-28 Cultures as well as individuals continually balance the demands of nostalgia and sustainability as they construct historical narratives of ›futures worth preserving‹. The aim of this volume is to explore those narratives and the underlying assumptions which inform them. Drawing on a range of disciplines from the humanities and social sciences, the chapters investigate cultural assumptions about which aspects of the past deserve to be remembered and which aspects of the present should be sustained for the future. In the process, they reveal how contemporary definitions of sustainability are informed by a nostalgic yearning for the past, and how nostalgia is motivated by a reciprocal longing to sustain the past for the future.

Science Sketches Sidney Perkowitz, 2022-03-10 This book is the second collection of over 50 articles and essays authored by Sidney Perkowitz. Appearing in diverse outlets such as *Discover*, *Washington Post*, *Aeon*, *Los Angeles Review of Books*, *Nautilus*, *Museum of the Moving Image*, and

Physics World, they represent the best of his writing about science and technology, and their links to culture and society, the arts and the media, and the humanities. Written for general readers, the pieces explore the outer and inner universes from cosmic space to the human mind, from the artistic use of science to the impact of technology and AI in the justice system, in medicine, and in dealing with COVID-19.

To the North Bruce W. Perry, 2018-08-20 Brad Garner thought he had lost everything, after the Yellowstone calderas exploded and the awful volcanic aftermath. After fleeing south and wallowing in self-pity, by random chance, he hears of a faint signal over a functioning network. It comes from far north, somewhere in Idaho on the Montana border, near the eruption's epicenter. Soul sick, and with little remaining purpose to his life, Garner decides to follow the signal, an unmistakable if faint cry for help. He gears up and heads with an abandoned dog named Tanya into the ash-strewn wasteland that the U.S. West has become. Alone. Later, Garner finds himself in a vast refugee camp in the Great Basin of Southern California near Thousand Palms. He believes his family, trapped in Idaho by the Yellowstone volcanic eruption, is still alive, after having all but given up hope. Many obstacles obstruct the path to his loved ones, however, including floods, desert extremes, as well as his own gnawing guilt and need for personal redemption. Zeke Sanchez, a part Ute, Hispanic Indian who distinguished himself in Iraq and tends toward peyote inspired spiritual journeys, plays a big role in *To The North*, especially in regard to his desert-survival skills. Garner also encounters Sam, orphaned by the eruption, Giovanna, a Red Cross nurse who lost her husband Marcel in a terrorist attack in Egypt, and two federal agency officials who are close-mouthed about their actual mission to the epicenter. They might be intimately involved in an artificial intelligence experiment to study the deadly super volcano.

Modern Astrodynamics , 2006-10-19 In recent years, an unprecedented interest in novel and revolutionary space missions has risen out of the advanced NASA and ESA programs. Astrophysicists, astronomers, space systems engineers, mathematicians and scientists have been cooperating to implement novel and ground-breaking space missions. Recent progress in mathematical dynamics has enabled development of specialised spacecraft orbits and propulsion systems. Recently, the concept of flying spacecraft in formation has gained a lot of interest within the community. These progresses constitute the background to a significant renaissance of research dealing with astrodynamics and its applications. *Modern Astrodynamics* is designed as a stepping stone for the exposition of modern astrodynamics to students, researchers, engineers and scientists. This volume will present the main constituents of the astrodynamical science in an elaborate, comprehensive and rigorous manner. Although the volume will contain a few distinct chapters, it will render a coherent portrayal of astrodynamics. Encompasses the main constituents of the astrodynamical sciences in an elaborate, comprehensive and rigorous manner Presents recent astrodynamical advances and describes the challenges ahead The first volume of a series designed to give scientists and engineers worldwide an opportunity to publish their works in this multi-disciplinary field
