Richelle Mead Dark Swan Bundle: Storm Born, Thorn Queen, Iron Crowned & Shadow Heir Richelle Mead,2012-02-01 The Dark Swan series by #1 New York Times bestselling author Richelle Mead is together at last in this complete bundle! Just typical. No love life to speak of for months, then all at once, every horny creature in the Otherworld wants to get in your pants... Storm Born--Book One Eugenie Markham is a powerful shaman who does a brisk trade banishing spirits and fey who cross into the mortal world. Mercenary, yes, but a girl's got to eat. Her most recent case, however, is enough to ruin her appetite. Hired to find a teenager who has been taken to the Otherworld, Eugenie comes face to face with a startling prophecy--one that uncovers dark secrets about her past and claims that Eugenie's first-born will threaten the future of the world as she knows it. Now Eugenie is a hot target for every ambitious demon and Otherworldly ne'er-do-well, and the ones who don't want to knock her up want her dead. She finds formidable allies in Dorian, a seductive fairy king with a taste for bondage, and Kiyo, a gorgeous shape-shifter who redefines animal attraction. But with enemies growing bolder and time running out, Eugenie realizes that the greatest danger is yet to come, and it lies in the dark powers that are stirring to life within her... Thorn Queen--Book Two Eugenie Markham is paid to bind and banish creatures from the Otherworld. But after her last battle, she's also become queen of the Thorn Land. It's hardly an envious life, not with her kingdom in tatters, her love life in chaos, and Eugenie eager to avoid the prophecy about her firstborn destroying mankind. And now young girls are disappearing from the Otherworld, and no one--except Eugenie--seems willing to find out why. Eugenie has spilled plenty of fey blood in her time, but this enemy is shrewd, subtle, and nursing a very personal grudge. And the men in her life aren't making things any easier. Her boyfriend Kiyo is preoccupied with his pregnant ex, and sexy fey king Dorian always poses a dangerous distraction. With or without their help, Eugenie must venture deep into the Otherworld and trust in an unpredictable power she can barely control. Reluctant queen or not, Eugenie has sworn to do her duty--even if it means facing the darkest--and deadliest--side of her nature... Iron Crowned--Book Three Eugenie Markham is the best at banishing entities trespassing in the mortal realm. But as the Thorn Land's queen, she's fast running out of ways to end the brutal war devastating her kingdom. Her only hope: the Iron Crown, a legendary object even the most powerful gentry fear... Who Eugenie can trust is the hardest part. Fairy king Dorian has his own agenda for aiding her search. And Kiyo, her shape-shifter ex-boyfriend, has every reason to betray her along the way. To control the Crown's ever-consuming powers, Eugenie will have to confront an unimaginable temptation--one that will put her soul and the fate of two worlds in mortal peril... Shadow Heir--Book Four Eugenie Markham strives to keep the mortal realm safe from trespassing entities. But as the Thorn Land's prophecy-haunted queen, there's no refuge for her and her soon-to-be-born-children when a mysterious blight begins to devastate the Otherworld... The spell-driven source of the blight isn't the only challenge to Eugenie's instincts. Fairy king Dorian is sacrificing everything to help, but Eugenie can't trust the synergy drawing them back together. The uneasy truce between her and her shape shifter ex-lover Kiyo is endangered by secrets he can't--or won't--reveal. And as a formidable force rises to also threaten the human world, Eugenie must use her own cursed fate as a weapon--and risk the ultimate sacrifice...

Sustainable Crop Protection under Protected Cultivation P. Parvatha Reddy,2016-01-07 This book focuses on pests (insect and mite) and diseases

(fungal, bacterial, viral and nematode) in protected horticulture (fruits, vegetables and ornamentals) using physical, cultural, chemical, biological, host resistance, and integrated methods. It opens with chapters describing the setting in which integrated pest and disease control operates, i.e., the greenhouse and its environment. Subsequent chapters present the basic strategies and tactics of different control methods including integrated control, with special reference to greenhouse crops. Further chapters include the different facets of biological pest and disease control - its scientific bases, its development in practice, its commercialization and quality control. The concluding chapters of the book highlight the present status of integrated pest and disease control for the most important greenhouse crops (fruits, vegetables and flower crops) worldwide. The book's final chapter explores future challenges for researchers assigned to identify non-pesticide methods and integrate sustainable pest management technologies that can contribute to increased productivity, such as breeding for durable resistance, biological control and devising integrated methods that will have minimal adverse environmental and social impacts. Among productivity-enhancing technologies, protected cultivation has a tremendous potential to increase the yield of vegetables and flower crops by several fold. Pests and diseases are one of the major challenges to protected cultivation. Year-round warm temperatures and relatively high humidity together with abundant food make the protected environment of greenhouses highly attractive to pests and diseases. Nevertheless, very little attention has been paid to the manipulation of greenhouse environments expressly to avoid disease epidemics and insect infestations, which together can easily account for 30% of crop losses. This book will be of immense value to all members of the scientific community involved in teaching, research and extension activities on protected horticulture. It also offers a useful reference guide for policymakers and practicing farmers, and can be used as a textbook for postgraduate courses.

Transforming the Struggles of Tamars Lina Andronoviene, 2014-05-29 This book explores the unprecedented challenge of involuntary singleness for women, and the implications of disregarding this challenge for the Christian (and particularly, baptistic) communities of faith. It argues that these communities not only fail involuntarily single women, but also in so doing, suffer a serious detriment to their own communal health and Christian witness. Taking the challenge of involuntary singleness as a test case, this book explores the method of convictional theology and argues for a holistic framework that can draw together the personal, communal, and visionary spheres of human existence. Although primarily a work of theological ethics, it also draws from a number of different disciplines, including cultural studies and sociology as well as intersections of science and theology.
