Metalworking through History Ana M. Lopez,2009-04-30 Metalworking Through History provides a comprehensive, historic overview of the subject of metalworking while exploring it within its cultural context. It is written from the perspective that the crafting of objects in metal is a unique way of understanding a particular time and culture. As a broad encyclopedia of metalworking, it allows the reader to view the different societies and periods that produced work in this medium as part of a global, interrelated practice. Comprised of over sixty entries on relevant time periods, cultures, makers and processes, the book is a much-needed general reference text in the survey of this craft. The subjects span all the major metalworking periods and peoples, from the rituals of African iron smelting to the twentieth century studio movement. Outstanding individual makers are highlighted to give additional insight into the times at which they were active. Furthermore, the materials and techniques used in the act of metalworking are clearly explained in terms that are easily understood by a practitioner with tacit knowledge of the medium. Suggested further readings and cross-references allow for the expansion of research and additional study. It is an excellent first resource for understanding the concepts and terminology of the ancient and pervasive craft of metalworking. Volume includes eight pages of color plates, and black and white photos throughout. Man and His Handiwork (Classic Reprint) J. G. Wood, 2016-10-01 Excerpt from Man and His Handiwork One half - century before these pages were written, the science of Geology was in its infancy, and those who studied it were either avoided as atheists or ridiculed as fools. The late Dr. Buckland, to whom Geology is so much indebted, succeeded in showing that the charge of atheism was absurd, and that the folly was on the part of those who refused to believe facts that had been proved beyond any possibility of contradiction. He did not, however, escape an occasional sly shaft on the part of his contemporaries who were skilful with pen and pencil, and many were the witty epigrams and caricatures that took Dr. Buckland as their theme. Artisans and Cooperatives Kimberly M. Grimes, B. Lynne Milgram, 2000 With new markets opening up for goods produced by artisans from all parts of the world, craft commercialization and craft industries have become key components of local economies. Now with the emergence of the Fair Trade movement and public opposition to sweatshop labor, many people are demanding that artisans in third world countries not be exploited for their labor. Bringing together case studies from the Americas and Asia, this timely collection of articles addresses the interplay among subsistence activities, craft production, and the global market. It contributes to current debates on economic inequality by offering practical examples of the political, economic, and cultural issues surrounding artisan production as an expressive vehicle of ethnic and gender identity. Striking a balance between economic and ethnographic analyses, the contributors observe what has worked and what hasn't in a range of craft cooperatives and show how some artisans have expanded their entrepreneurial role by marketing crafts in addition to producing them. Among the topics discussed are the accommodation of craft traditions in the global market, fair trade issues, and the emerging role of the anthropologist as a proactive agent for artisan groups. As the gap between rich and poor widens, the fate of subsistence economies seems more and more uncertain. The artisans in this book show that people can and do employ innovative opportunities to develop their talents, and in the process strengthen their ethnic identities.
