Hands-On Science: Matter Lola M. Schaefer, 2023-07-11 Press Here meets Bill Nye the Science Guy in this interactive STEM picture book about solids, liquids, and gases, bringing science experiments to life. Welcome to the chemistry lab! Through imagination, exploration and play, readers see that matter comes in all shapes and sizes and can change from solid to liquid to gas. Each page of this engaging book instructs the reader to smash clay to change its shape, tilt the book to pour liquid, or blow to make bubbles, bringing the science experiments to life. After predicting what will happen next, eager readers turn the page to see the results. Educator and author Lola M. Schaefer draws on her years in the classroom to make science fun and accessible through engaging and playful text. Back matter includes a simple experiment for investigating matter in the real world.

Hands-On Science Activities for Grades K-2 Marvin N. Tolman, 1998-11-25 This resource is one of three grade-level volumes in the Science Curriculum Activities Library, a unique instructional series for K-6 teachers that provides nearly 500 exciting hands-on investigations to teach students thinking and reasoning skills along with basic science concepts and facts. Each level volume in the series focuses on three major areas of science normally taught in grades K-6 and offers a store of stimulating earth, life, and physical science activities that can be used with virtually any science text. The activities follow the discovery/inquiry approach and encourage students to analyze, synthesize, and infer based on their own hands-on experiences. Book I Hands-On Science Activities for Grades K-2

provides 119 inquiry experiences, including investigations such as What is in Sea Water? (Water) ... How Well Can You See in the Dark? (The Five Senses) ...and How Can You Make Large Sugar Crystals from Tiny Ones? (Nature of Matter). Book II Hands-On Science Activities for Grades 3-4 provides 193 inquiry experiences such as How Can You Make Rain? (Weather) ...How Does the Skin Help Regulate Body Temperature? (Body Systems) ...and Where Did the First Metal Magnet Come From? (Magnetism). Book III Hands-On Science Activities for Grades 5-6 provides 187 investigations, including How Can You Make s Soda Straw Rocket? (Above the earth) ...How Can We Test Food for Protein? (Health & Nutrition) ...and How Do Detectives Use Color to Solve Crimes? (Light). All of these hands-on science investigations are complete and ready for use, including a title written in question form, a list of materials needed, step-by-step procedures to be carried out by the student, and special tips and background information for the teacher. Many activities also include illustrations to supplement the student procedures and special sections (For Problem Solvers) that encourage students toward independent investigation. And some activities are identified as appropriate to Take home and do with family and friends. To help you quickly find the appropriate activities, each grade-level volume includes a Listing of Activities by Topic that lists topics and subtopics and identifies one or more activities in that volume that can be used to introduce or reinforce the particular concept. With the hands-on activities in this unique Library, no teacher need be a scientist to conduct an effective and exciting science program! Moreover, the process skills emphasized in these experiences virtually assure students' increased insight and retention of content.

The Curious Kid's Science Book Asia Citro, 2015-09-08 What happens if you water plants with juice? Where can you find bacteria in your house? Is slug slime as strong as a glue stick? How would your child find the answers to these questions? In *The Curious Kid's Science Book*, your child will learn to design his or her own science investigations to determine the answers! Children will learn to ask their own scientific questions, discover value in failed experiments, and — most importantly — have a blast with science. The 100+ hands-on activities in the book use household items to playfully teach important science, technology, engineering, and math skills. Each creative activity includes age-appropriate explanations and (when possible) real life applications of the concepts covered. Adding science to your at-home schedule will make a positive impact on your child's learning. Just one experiment a week will help build children's confidence and excitement about the sciences, boost success in the classroom, and give them the tools to design and execute their own science fair projects.

Hands-on Physical Science Laurie E. Westphal, 2008 Introduce your students to the fascinating world of physical science with these creative and adventurous experiments in chemistry and physics. Grades 4-8

Hundreds of simple and easy experiments explore the various scientific principles behind natural phenomena like friction, centrifugal force, and the underlying laws of physics that help make machines work. These fun yet practical experiments make it easy for anyone to become a rocket scientist! Sound and light may seem like things we know everything about, but by conducting the

easy to navigate science experiments in *Hands-On Science: Sound and Light* by Sarah Angliss and Maggie Hewson, young learners will see that there is much more than meets the eye. Through these informative and easy to conduct experiments and activities, budding scientists will discover the interesting and often-changing characteristics of materials in their everyday world.

Hands-On Science: Motion Lola M. Schaefer, 2024-02-27 Press Here meets Bill Nye the Science Guy in this interactive STEM picture book about forces and motion. Welcome to the physics lab! In this picture book, young scientists use their imagination to bring experiments to life. They poke whipped cream in the illustrations, tilt the book to roll a ball down a ramp, and slide beanbags to test friction. After predicting what will happen next, eager readers turn the page to see the results. Educator and author Lola M. Schaefer draws on her years in the classroom to make science fun and accessible. Back matter encourages kids to notice the pushes and pulls all around them and includes a simple physics experiment.

Wacky Science Phil Parratore, 2010 *Wacky Science* helps teachers embark on an extremely exciting adventure--teaching hands-on science in the classroom! Gifted students love science, and they particularly love hands-on science. One of the most exciting things about teaching hands-on science is being able to observe how students gravitate toward these motivating activities and their extraordinary ability to extrapolate additional scientific information from the concepts being taught. People of all ages, backgrounds, and educational abilities love to do science that they can directly touch, hear, observe, smell, and experience. This book contains many high-level, abstract scientific concepts that have been developed into hands-on activities. Including experiments in botany, entomology, paleontology, physics, and zoology, among others, these fun, exciting, and highly motivational activities will have students begging for more.

Good Housekeeping Amazing Science Good Housekeeping, 2021-08-24 Awesome S.T.E.A.M.-based science experiments you can do right at home with easy-to-find materials designed for maximum enjoyment, learning, and discovery for kids ages 8 to 12 Join the experts at the Good Housekeeping Institute Labs and explore the science you interact with every day. Using the scientific method, you'll tap into your own super-powers of logic and deduction to go on a science adventure. The engaging experiments exemplify core concepts and range from quick and simple to the more complex. Each one includes clear step-by-step instructions and color photos that demonstrate the process and end result. Plus, secondary experiments encourage young readers to build on what they've discovered. A "Mystery Solved!" explanation of the science at work helps your budding scientist understand the outcomes of each experiment. These super-fun, hands-on experiments include: Building a solar oven and making s'mores Creating an active rain cloud in a jar Using static electricity created with a balloon to power a light bulb Growing your own vegetables—from scraps! Investigating the forces that make an object sink or float And so much more! Bursting with more than 200 color photos and incredible facts, this sturdy hard cover is the perfect classroom resource or gift for any aspiring biologist, chemist, physicist, engineer, and mathematician!

Hands-On Science Activities for Grades K-2 Marvin N. Tolman, 1999-01-01

Hands-on science, 2007 Hands-on learning is 'learning by doing'. It requires students to become active participants as they investigate, experiment, design, create, role-play, cook and more, gaining an understanding of essential scientific concepts from these experiments. Hands-on learning motivates students and engages them in their learning. Instead of being told 'why' something occurs, they see it for themselves, directly observing science in action. -- P. iii.

Hands-On Science Mysteries for Grades 3 - 6 James Robert Taris, Louis James

Taris,2006-08-18 In Hands-On Science Mysteries for Grades 3-6, the authors connect science to real-world situations by investigating actual mysteries and phenomena, such as the strange heads on Easter Island, the ghost ship Mary Celeste, and the “Dancing Stones” of Death Valley. The labs are designed to encourage the development of science inquiry, in which students will observe, take notes, make diagrams, interpret data, and arrive at solutions, and include extensions for further investigation.

Hands-On Physical Science Activities For Grades K-6 Marvin N. Tolman,2006-04-07 This is the second edition of Marvin N. Tolman’s bestselling book Hands-On Physical Science Activities for Grades K-6. Like all the books in The Science Problem-Solving Curriculum Library series, this revised edition offers compelling activities that help teach students thinking and reasoning skills along with basic science concepts and facts. The book’s activities follow the discovery/inquiry approach and encourage students to analyze, synthesize, and infer based on their own hands-on experiences. This new edition includes an expanded Teacher Information section, inquiry-based models and complex cooperative learning projects using materials found around the home. Many of the activities easily become great science fair ideas as well as activities that correlate with the national standards. Designed to be user friendly, the book includes 175 easy-to-use, hands on activities and is organized into eight sections: Nature of Matter Energy Light Sound Simple Machines Magnetism Static Electricity Current Electricity
