**The Disappearances** Emily Bain Murphy,2017-07-04 What if the ordinary things in life suddenly...disappeared? Aila Quinn’s mother, Juliet, has always been a mystery: vibrant yet guarded, she keeps her secrets beyond Aila’s reach. When Juliet dies, Aila and her younger brother Miles are sent to live in Sterling, a rural town far from home—and the place where Juliet grew up. Sterling is a place with mysteries of its own. A place where the experiences that weave life together—scents of flowers and food, reflections from mirrors and lakes, even the ability to dream—vanish every seven years. No one knows what caused these “Disappearances,” or what will slip away next. But Sterling always suspected that Juliet Quinn was somehow responsible—and Aila must bear the brunt of their blame while she follows the chain of literary clues her mother left behind. As the next Disappearance nears, Aila begins to unravel the dual mystery of why the Disappearances happen and who her mother truly was. One thing is clear: Sterling isn’t going to hold on to anyone's secrets for long before it starts giving them up.

**Henry Harwood** Peter Hore,2018 Henry Harwood is best known for his destruction of the Admiral Graf Spee at the battle of the River Plate in December 1939 about which Winston Churchill, then First Lord of the Admiralty, said: 'This brilliant sea fight takes its place in our naval annals and in a long, cold, dark winter it warmed the cockles of the British hearts'. Despite that great victory Harwood remains, until now, one of three great British naval commanders of the Second World War who is without a biography. Admiral Sir Henry Harwood's wider naval career was remarkable and epitomised the Royal Navy in the first half of the twentieth century. He became a naval cadet in 1903, specialised as a torpedo officer in 1911, and for his services in the First World War was awarded the OBE in 1919. He was one of the Navy's intellectuals, gaining first class passes in all his examinations and, during his interwar service on the South American station, learning Spanish. During his service in important staff appointments and at the Imperial Defence College, he made a particular study of international relations and, in the light of perceived failings at sea in the First World War, of tactics and command. He was thus well-qualified when in 1936 he became commodore in command of the South American division of the America and West Indies station, and well prepared to meet and defeat the German pocket battleship \_Admiral Graf Spee\_ with his inferior force of cruisers in 1939. He was promoted assistant chief of the naval staff at the Admiralty, and, in 1942, appointed Commander-in-Chief, Mediterranean, in succession to Sir Andrew Cunningham. Then, commanding a fleet too enfeebled for its tasks, he found Montgomery plotting against him and Churchill loosing confidence in him before being relieved of his command. Invalided out of the Navy in 1945, and subsequently blamed by many for the Navy's perceived failings in the Mediterranean, he died a disappointed man in 1950. The author has been given exclusive and unique access to the Harwood family archives and, in the light of these previously unpublished papers, has set about rehabilitating the character, career and achievements of this great British admiral. For all historians and enthusiasts of the Royal Navy in the Second World War, this will be essential reading.

**Critical Mineral Resources of the United States** K. J. Schulz,2017 As the importance and dependence of specific mineral commodities increase, so does concern about their supply. The United States is currently 100 percent reliant on foreign sources for 20 mineral commodities and imports the majority of its supply of more than 50 mineral commodities. Mineral commodities that have important uses and face potential supply disruption are critical to American economic and national security. However, a mineral commodity's importance and the nature of its supply chain can change with time; a mineral commodity that may not have been considered critical 25 years ago may be critical today, and one considered critical today may not be so in the future. The U.S. Geological Survey has produced this volume to describe a select group of mineral commodities currently critical to our economy and security. For each mineral commodity covered, the authors provide a comprehensive look at (1) the commodity's use; (2) the geology and global distribution of the mineral deposit types that account for the present and possible future supply of the commodity; (3) the current status of production, reserves, and resources in the United States and globally; and (4) environmental considerations related to the commodity's production from different types of mineral deposits. The volume describes U.S. critical mineral resources in a global context, for no country can be self-sufficient for all its mineral commodity needs, and the United States will always rely on global mineral commodity supply chains. This volume provides the scientific understanding of critical mineral resources required for informed decisionmaking by those responsible for ensuring that the United States has a secure and sustainable supply of mineral commodities.
