Detecting and Classifying Low Probability of Intercept Radar Phillip E. Pace, 2009 This comprehensive book presents LPI radar design essentials, including ambiguity analysis of LPI waveforms, FMCW radar, and phase-shift and frequency-shift keying techniques. Moreover, you find details on new OTHR modulation schemes, noise radar, and spatial multiple-input multiple-output (MIMO) systems. They'll Have to Follow You! Mark Albertson,2008-02 'Others may do as you have done, but they'll have to follow you!' so proclaimed Teddy Roosevelt to the sailors and marines assembled on the afterdeck of USS Connecticut, flagship of the Great White Fleet. The United States Navy had come of age, as sixteen coal-burning battleships carried the Stars and Stripes to the far-flung ends of the globe in the most extraordinary peacetime demonstration of naval power in modern times. It is a story set in the closing stages of the Golden Age of Imperialism, a time when the Great Powers engaged in a battleship-building binge that not only set the world tottering on the brink of global catastrophe, but foreshadowed the later contest in nuclear arms between the United States and the Soviet Union. In this companion volume to USS Connecticut: Constitution State Battleship, Mark Albertson captures one of the finest moments of the United States Navy. In the first major strategic initiative by the United States in the twentieth century, the Atlantic Fleet Battleship Force circumnavigated the globe, steaming more than 46,000 miles in the most monumental achievement in modern maritime history, a triumph that helped make the United States a global power, and eventually, a super power. Step aboard one of the ships comprising the Great White Fleet and travel round the world in They'll Have to Follow You!

US Destroyers 1942-45 Dave McComb,2011-03-15 Few if any 20th century warships were more justly acclaimed than the

destroyers of the U.S. Navy's Fletcher class. Admired as they were for their advanced and rakish design, it was their record as workhorses of the Pacific War that placed them among the most battle-tested and successful fighting ships of all time. This title describes the Fletchers and their Allen M. Sumner and Gearing-class derivatives, their machinery, armament, and construction, with a listing of all 343 ships by hull number and builder. It features an operational history of the 287 ships commissioned during World War II, which traces the evolution of night surface action tactics in the Solomon Islands and the parallel development of the Combat Information Center; the drive across the Pacific and liberation of the Philippines with tables showing the rapid introduction of new squadrons; and the radar pickets' climactic stand against kamikaze aircraft at Okinawa. With summaries of losses and decorations and specially commissioned artwork, this is a definitive book on the wartime US destroyer classes.
