Escape From the Planet of the Retarded Monkeys and Other Stories R Patrick Widner,2011-12 Critics call it controversial, twisted, and just plain messed up. Brain parasites, an insane planet ruled by retarded monkeys, violent video games turning teens into...something else, and a bio-weapon that will make you lose your appetite, for a little while. It's all here. Read it now. You know you want to. Stories from the Theater of Science Fiction.

The Cave Tim Krabbe,Tim Krabbé,2003-05-16 A stunning psychological thriller about friship, drugs, and murder from the author of The Vanishing. Egon Wagter and Axel van de Graaf met when they were both fourteen and on vacation in Belgium. Axel is fascinating, filled with an amoral energy by which the more prudent, less adventurous Egon is both mesmerized and repelled. Even as a teen, Axel has a strange power over those around him. He defies authority, seduces women, breaks the law. Axel chooses Egon as a friend, a friendship that somehow ures over time and ends up determining Egon's fate. During his university studies, Egon frequents Axel's house in Amsterdam, where there is a party every night and women fill the rooms. Though Egon chooses geology over Axel's life of avarice and drug dealing, he remains intrigued by his friend's conviction that the only law that counts is the law he makes himself. Egon believes that Axel is a demonic figure who tempts others only because he knows they want to be tempted. By the time he is in his forties, Egon finds himself divorced and with few professional prospects. He turns for help to Axel, who sends him to Ratanakiri, a fictional country in Southeast Asia. Axel gives Egon a suitcase to deliver-and Egon never returns. Utterly compelling and resonant, The Cave is an unforgettable story of betrayal in the spirit of Tim Krabbé's remarkable first novel, The Vanishing.

The Spy Who Loved Us Thomas A. Bass,2009-02-10 Pham Xuan An was a brilliant journalist and an even better spy. A friend to all the legendary reporters who covered the Vietnam War, he was an invaluable source of news and a font of wisdom on all things Vietnamese. At the same time, he was a masterful double agent. An inspired shape-shifter who kept his cover in place until the day he died, Pham Xuan An ranks as one of the preeminent spies of the twentieth century. When Thomas A. Bass set out to write the story of An's remarkable career for The New Yorker, fresh revelations arrived daily during their freewheeling conversations, which began in 1992. But a good spy is

always at work, and it was not until An's death in 2006 that Bass was able to lift the veil from his carefully guarded story to offer up this fascinating portrait of a hidden life. A masterful history that reads like a John le Carré thriller, *The Spy Who Loved Us* offers a vivid portrait of journalists and spies at war.

The War In-Between Wendy Kozol, 2024-05-07 Explores the ambiguities and contradictions that disrupt the assumed boundaries of battle zones Against the fabric of suffering that unfolds around more spectacular injuries and deaths, *The War In-Between* studies visual depictions of banal, routine, or inscrutable aspects of militarized violence. Spaces of the in-between are both broader and much less visible than battlefields, even though struggles for survival arise out of the same conditions of structural violence. Visual artifacts including photographs, video, data visualizations, fabric art, and craft projects provide different vantage points on the quotidian impacts of militarism, whether it is the banality of everyday violence for non-combatants or the daily struggles of soldiers living with physical and emotional trauma. Three interrelated concepts frame the book's attempt to "stay" in the moment of looking at visual cultures of survival. First, the concept of the war in-between captures those interstitial spaces of war where violence and survival persist side-by-side. Second, this book expands the concept of indexicality to consider how images of the in-between rely on a range of indexical traces to produce alternative visualities about survival and endurance. Third, the book introduces an asymptotic analysis to explore the value in getting close to the diverse experiences that comprise the war in-between, even if the horizon line of experience is always just out of reach. Exploring the capaciousness of survival reveals that there is more to feel and engage in war images than just mangled bodies, collapsing buildings, and industrialized death. *The War In-Between*, Kozol argues, offers not a better truth about war but an accounting of visualities that arise at the otherwise unthinkable junction of conflict and survival.
