High David Sheff,Nic Sheff,2019 Just Say Know! With drug education for children more important than ever, this nonfiction book draws on the experiences of the NY Times bestselling father/son team of David and Nic Sheff to provide all the information teens and tweens need to know about drugs, alcohol, and addiction. From David Sheff, author of Beautiful Boy (2008), and Nic Sheff, author of Tweak: Growing Up on Methamphetamines (2008), comes the ultimate resource for learning about the realities of drugs and alcohol for middle grade readers. This book tells it as it is, with testimonials from peers who have been there and families who have lived through the addiction of a loved one, along with the cold, hard facts about what drugs and alcohol do to our bodies. From how to navigate peer pressure to outlets for stress to the potential consequences for experimenting, Nic and David Sheff lay out the facts so that middle grade readers can educate themselves.

Hi! Ethan Long,2015-05-05 A string of comically stylized animals greet each other in masterfully rhyming couplets—an owl’s “hoo” is answered by a cow’s “moo”; a crow’s “caw” is returned with a donkey’s “hee-haw”—all leading up to the “hi!” and “good-bye!” of a human toddler and his mom! The first in a brand-new board book series on animal (and human) first words by award-winning author and illustrator Ethan Long.

Monster High Lisi Harrison,2010-09-01 From Lisi Harrison, the New York Times bestselling author of The Clique and Alphas, comes a new series with a fresh twist on high school, romance, and the horrors of trying to fit in. The monster community has kept a low profile at the local high school, but when two new girls enroll, the town will never be the same. Created just fifteen days ago, Frankie Stein is psyched to trade her father's formaldehyde-smelling basement lab for parties and prom. But with a student body totally freaked out by rumors of monsters stalking the halls, Frankie learns that high school can be rough for a chic freak like her. She thinks she finds a friend in fellow new student Melody Carver-but can a normie be trusted with her big secret?

How High?--That High Diane Williams,2021-10-12 Diane Williams, an American master of the short story who will “rewire your brain” (NPR), is back with a collection in which she once again expands the possibilities of fiction. These stories depict ordinary moments—a visit to the doctor’s office or a married couple’s hundredth dance together—but within the quotidian, Williams delivers a lifetime of insecurities, lusts, rejections, and revelations, making her work equally discomfiting and amusing. With unmatched wit in every sentence, Williams captures whole universes in a story, delivering visionary insights into what it means to be human. Williams’ devotees will be newly enthralled by her elegantly strange, bewitching stories in How High? — That High. Those who have yet to meet “the godmother of flash fiction” (The Paris Review) will find an extraordinary introduction in these pages.

With the Fire on High Elizabeth Acevedo,2019-06-01 From New York Times bestselling author of POET X comes a story of a girl with talent, pride and a little bit of magic that keeps her fire burning bright. Ever since she got pregnant during freshman year, Emoni Santiago’s life has been about making the tough decisions, doing what has to be done for her daughter and her abuela. The one place she can let all that go is in the kitchen. There, she lets her hands tell her what to cook, listening to her intuition and adding a little something magical every time, turning her food into straight-up goodness. Even though she’s always dreamed of working in a kitchen after she graduates, Emoni knows that it’s not worth her time to pursue the impossible. But then an opportunity presents itself to not only enrol in a culinary arts class in her high school, but also to travel abroad to Spain for an immersion program. Emoni knows that her decisions post high school have to be practical ones, but despite the rules she’s made for her life — and everyone else’s rules that she refuses to play by — once Emoni starts cooking, her only choice is to let her talent break free.

High Price Carl Hart,2013-06-11 High Price is the harrowing and inspiring memoir of neuroscientist Carl Hart, a man who grew up in one of Miami’s toughest neighborhoods and, determined to make a difference as an adult, tirelessly applies his scientific training to help save real lives. Young Carl didn't see the value of school, studying just enough to keep him on the basketball team. Today, he is a cutting-edge neuroscientist—Columbia University’s first tenured African American professor in the sciences—whose landmark, controversial research is redefining our understanding of addiction. In this provocative and eye-opening memoir, Dr. Carl Hart recalls his journey of self-discovery, how he escaped a life of crime and drugs and avoided becoming one of the crack addicts he now studies. Interweaving past and present, Hart goes beyond the hype as he examines the relationship between drugs and pleasure, choice, and motivation, both in the brain and in society. His findings shed new light on common ideas about race, poverty, and drugs, and explain why current policies are failing.

High Heat Carl Deuker,2003-03-21 Like the game of baseball, life is quirky and unpredictable, as Shane Hunter discovers in the spring of his sophomore year. Suddenly and without warning his life of privilege is turned upside down. And just as suddenly, life begins to seem utterly without fairness or purpose to him. Exciting, well-written sports scenes transport readers right into the stands while complex issues engage their hearts and minds. For here is a novel of loss, of morality, and of the rare, redemptive power of baseball. Can speaking the truth really determine lives? Just how does one accept, move on, and begin doing the right thing?

Dynamic Resource Allocation in Embedded, High-Performance and Cloud Computing Leando Soares Indrusiak,Piotr Dziurzanski,Amit Kumar Singh,2022-09-01 The availability of many-core computing platforms enables a wide variety of technical solutions for systems across the embedded, high-performance and cloud computing domains. However, large scale manycore systems are notoriously hard to optimise. Choices regarding resource allocation alone can account for wide variability in timeliness and energy dissipation (up to several orders of magnitude). Dynamic Resource Allocation in Embedded, High-Performance and Cloud Computing covers dynamic resource allocation heuristics for manycore systems, aiming to provide appropriate guarantees on performance and energy efficiency. It addresses different types of systems, aiming to harmonise the approaches to dynamic allocation across the complete spectrum between systems with little flexibility and strict real-time guarantees all the way to highly dynamic systems with soft performance requirements. Technical topics presented in the book include: • Load and Resource Models• Admission Control• Feedback-based Allocation and Optimisation• Search-based Allocation Heuristics• Distributed Allocation based on Swarm Intelligence• Value-Based AllocationEach of the topics is illustrated with examples based on realistic computational platforms such as Network-on-Chip manycore processors, grids and private cloud environments.

“Hi, God. I’m Home. Wow!” Beverly Wilkins R.N,2021-01-07 For the last twenty years of her professional life, Beverly Wilkins has been a grief group facilitator, congregational nurse, and visiting nurse. Her occupation as a trained palliative care nurse brought her into intimate contact with

many patients going through their final stage of life. She possesses a serenity and ease of the vocabulary around death and dying because of her complete belief that it really is not the end. In fact, it is more like a birthday following a birthday. We are all born to eventually die to another life, “where there are many mansions. I go and prepare a place for you” (John 14:2 NKJV). This book is a collection of real-life scenarios she has been witness to; she wants to give you calm and peace as you transition to the next stage of light, the only stage that all of us will experience: death. May you feel the promise that God will be there to meet you when you arrive in your new home. No need for angst at the end. Go in peace and live joyously and confidently knowing your final destination is already reserved. Happy birthday as you breathe your last breath. Enjoy the whoosh. Bev

High Performance Computing Alex Veidenbaum,Kazuki Joe,Hideharu Amano,Hideo Aiso,2003-11-18 The 5th International Symposium on High Performance Computing (ISHPC-V) was held in Odaiba, Tokyo, Japan, October 20-22, 2003. The symposium was thoughtfully planned, organized, and supported by the ISHPC Organizing Committee and its collaborating organizations. The ISHPC-V program included two keynote speeches, several invited talks, two panel discussions, and technical sessions covering theoretical and applied research topics in high-performance computing and representing both academia and industry. One of the regular sessions highlighted the research results of the ITBL project (IT-based research laboratory, <http://www.itbl.riken.go.jp/>). ITBL is a Japanese national project started in 2001 with the objective of realizing a virtual joint research environment using information technology. ITBL aims to connect 100 supercomputers located in main Japanese scientific research laboratories via high-speed networks. A total of 58 technical contributions from 11 countries were submitted to ISHPC-V. Each paper received at least three peer reviews. After a thorough evaluation process, the program committee selected 14 regular (12-page) papers for presentation at the symposium. In addition, several other papers with favorable reviews were recommended for a poster session presentation. They are also included in the proceedings as short (8-page) papers. The program committee gave a distinguished paper award and a best student paper award to two of the regular papers. The distinguished paper award was given for “Code and Data Transformations for Improving Shared Cache Performance on SMT Processors” by Dimitrios S. Nikolopoulos. The best student paper award was given for “Improving Memory Latency Aware Fetch Policies for SMT Processors” by Francisco J. Cazorla.

On the High Wire George Theoharis,Sharon Dotger,2015-02-01 The purpose of the work/life balance series is to highlight particular challenges that higher education faculty face as they participate in the demands of the academy and try to prevent those demands from invading their personal lives. On The High Wire looks at a specific subset of university faculty, education faculty with school-aged children, and the specific professional/personal balance these faculty need to find. The title On the High Wire suggests the precarious nature of the “walk” for education faculty who are parents of school-aged children. We know that our identities are central to how we experience the world and how the world reacts to us. This reality is clearly visible in this book. These multiple identities and roles come into conflict at multiple points and in different ways. This book explores these identities and roles through autoethnographic accounts written by varied education faculty in order to make these tensions visible for the field to address.
