*Sled Driver* Brian Shul, Sheila Kathleen O'Grady, 1991 No aircraft ever captured the curiosity & fascination of the public like the SR-71 Blackbird. Nicknamed The Sled by those few who flew it, the aircraft was shrouded in secrecy from its inception. Entering the U.S. Air Force inventory in 1966, the SR-71 was the fastest, highest flying jet aircraft in the world. Now for the first time, a Blackbird pilot shares his unique experience of what it was like to fly this legend of aviation history. Through the words & photographs of retired Major Brian Shul, we enter the world of the Sled Driver. Major Shul gives us insight on all phases of flying, including the humbling experience of simulator training, the physiological stresses of wearing a space suit for long hours, & the intensity & magic of flying 80,000 feet above the Earth's surface at 2000 miles per hour. SLED DRIVER takes the reader through riveting accounts of the rigors of initial training, the gamut of emotions experienced while flying over hostile territory, & the sheer joy of displaying the jet at some of the world's largest airshows. Illustrated with rare photographs, seen here for the first time, SLED DRIVER captures the mystique & magnificence of this most unique of all aircraft.

*Sound Barrier* Neville Duke, Edward Lanchbery, 1955

*Faster and Faster* Raymond Francis Yates, 1956 The speed of animals, man, planes, projectiles, and numerous other objects and machines.

**Mickey Thompson** Tom Madigan, 2019-11-05 Mickey Thompson offers a now-impossible first-person telling of the legendary racer and motorsport impresario's high-speed life, from his earliest days through the height of his competition exploits on drag strips, at Bonneville, the Indy 500, Baja, and more—complemented by some 100 rare images culled from family archives, the NHRA museum, and the collections of friends and fellow racers. Four decades after his tragic death, Mickey Thompson's name and accomplishments remain legendary among motorsports and automotive enthusiasts. Thompson did it all on four wheels: land-speed racing, drag racing, off-road, NASCAR, Indianapolis...anything involving speed. Armed with a restless mind and a keen business sense, Thompson moved from success to success. In the early 1970s, motorsports writer (and former drag racer) Tom Madigan and Thompson embarked on a project to write the latter's autobiography. After two years, extensive interviews, and a near-finished manuscript the whole enterprise fell apart for a number of reasons. Type-written sheets, neatly stacked, were boxed, stored, and mostly forgotten. Mickey Thompson: The Lost Story of the Original Speed King in His Own Words is that never-published work—an amazing biographical artifact from what many consider the golden age of automotive racing.

**High-Speed Showdown** Franklin W. Dixon, 2012-12-04 Someone's rigging the boats at Bayport's offshore race—and putting every racer's life at risk. Fortunately for the racers, Frank and Joe are on hand to investigate the foul play...

*Punching Out* James Cross, 2011-04-26 Punching Out features a unique collection of firsthand stories of the rare individuals who have been baptized by rocket fire, pushed beyond the edge of endurance, and experienced face-to-face encounters with their own mortality. These are the pilots who have survived high-speed ejections and lived to tell their stories to a new generation. Except for aerospace technical research, manuals, and periodicals, this is intended to represent the first major body of work on this subject from an experiential perspective. Many of the pilots whose

stories are contained here are among the most famous names in the history of aviation. But for each, on that fateful day, fame was of no use. Their lives hung in the balance...from long silk parachute lines. Preceding these awe-inspiring stories of ejection survivors are various pages taken from the past: pilots who bailed out and survived, before there were ejection seats. It is their sacrifices, and their experiences, which has led to future generations who can count on this life-saving equipment in that instant of stark terror and confusion known as punching out.

**The Speed of Falling Objects** Nancy Richardson Fischer, 2019-10-01 From the author of *When Elephants Fly* comes an exceptional new novel about falling down, risking everything and embracing what makes us unique. Don't miss this compulsively readable novel about the most unlikely of heroes. Danger "Danny" Danielle Warren is no stranger to falling. After losing an eye in a childhood accident, she had to relearn her perception of movement and space. Now Danny keeps her head down, studies hard, and works to fulfill everyone else's needs. She's certain that her mom's bitterness and her TV star father's absence are her fault. If only she were more—more athletic, charismatic, attractive—life would be perfect. When her dad calls with an offer to join him to film the next episode of his popular survivalist show, Danny jumps at the chance to prove she's not the disappointment he left behind. Being on set with the hottest teen movie idol of the moment, Gus Price, should be the cherry on top. But when their small plane crashes in the Amazon, and a terrible secret is revealed, Danny must face the truth about the parent she worships and falling for Gus, and find her own inner strength and worth to light the way home.

*High-speed Empire* Will Doig, 2018-05 The story of the world's most audacious infrastructure project. Less than a decade ago, China did not have a single high-speed train in service. Today, it owns a network of 14,000 miles of high-speed rail, far more than the rest of the world combined. Now, China is pushing its tracks into Southeast Asia, reviving a century-old colonial fantasy of an imperial railroad stretching to Singapore; and kicking off a key piece of the One Belt One Road initiative, which has a price tag of \$1 trillion and, reaches inside the borders of more than 60 countries. The Pan-Asia Railway portion of One Belt One Road could transform Southeast Asia, bringing shiny Chinese cities, entire economies, and waves of migrants where none existed before. But if it doesn't succeed, that would be a cautionary tale about whether a new superpower, with levels of global authority unimaginable just a decade ago, can pull entire regions into its orbit simply with tracks, sweat, and lots of money. Journalist Will Doig traveled to Laos, Thailand, Malaysia, and Singapore to chronicle the dramatic transformations taking place -- and to find out whether ordinary people have a voice in this moment of economic, political, and cultural collision.

*Flying Freestyle* Jerry Pook, 2009-06-25 A British Royal Air Force pilot recounts his 25-year career in the cockpit during the Cold War in this military memoir. During a twenty-five-year flying career in the RAF, Jerry Pook has flown Hunter Fighter/Ground Attack aircraft in the Gulf, Harriers in West Germany, the supersonic Starfighter with the Dutch Air Force, the Harrier in Belize, Central America and the Tornado bomber at the Tri-national Tornado Training Establishment where he trained German and Italian pilots and navigators. Jerry had a long relationship with the Harrier Fighter/Ground Attack vertical take-off aircraft. This he flew in West Germany at the height of the Cold War operating from Wildenrath and off-base operations with Field Wing operations based in the fields and woods of the German countryside. Jerry saw action during the Falklands War when based on HMS Hermes and flying one of the few RAF Harriers in the Ground Attack role in support of the troops fighting ashore. He then enjoyed flying the American-built Starfighter RF 104G during a three-year exchange tour with the Dutch Air Force—he describes the Starfighter as “beautiful to fly, smooth and sophisticated, supremely fast and powerful—if you took liberties with it you knew it would kill you in an instant.” After three years with No 1 (Fighter) Squadron and again flying the Harrier, he moved to the then new Tornado, flying in its bomber role. This he continued to fly operationally and in the instructional role for thirteen years until grounded from military flying for medical reasons.

The History of Speed Martin Roach, 2020-10-29 'A special treat...The pictures and stories combine to provide a rich texture to telling the difficult story of why we chase speed like an addiction.' Valerie Thompson, the world's fastest female motorcycle racer Ever since we built machines that could transport us, there has been a desire to find ways to make them go faster. For some, going faster isn't enough - they want to be the fastest. This book celebrates those who have built the machines and driven them at ever greater speeds. This is The History of Speed. Bestselling motorsport writer Martin Roach tells the extraordinary story of those who have come to be obsessed by speed. From Camille Jenatzy, 'the Red Devil', who became the first man to drive at over 100kmh in 1899, through the golden age of Malcolm Campbell and his Bluebird, and on to the modern era of jet- and rocket-propelled cars, we have gone faster and faster. But this book is not just about these record-breakers, Roach also looks at the technology, the engines and the inventors who helped progress in speed at all levels, from Formula One to the supercars from the likes of Ferrari and Mercedes that are eagerly snapped up by collectors, rarely to be seen on the road. Accompanied by some of the most stunning images of the cars and those who made and drove them, Roach tells a wonderful story of innovation and invention. He talks to some of the great drivers to find out what inspires them to risk their lives, and finds out from engineers how they developed their ideas. Along the way, we hear some remarkable tale and anecdotes, but also find out how the pursuit of speed can also have its costs, with many tragic heroes and heroines falling along the way. If you've ever thrilled to the roar of a sports car engine, of loved the feel of the g-force as you accelerate away, or even looked on in wonder at a powerful engine, The History of Speed is a book that you will not want to miss out on.
