Living for Jesus and Japan Shibuya Hiroshi, Chiba Shin, 2013-11 Uchimura Kanzo (1861-1930) was an independent, original, and thought-provoking pioneer of Christianity in modern Japan. His theological values were organically linked with his aspiration for living and practicing such evangelical ideas as prophetic existence, neighborly love, social justice, pacifism, patriotism, and internationalism in the sphere of public life. Uchimura's commitment to the interaction between religious thought and social life is apparent in his well-known epitaph: I for Japan; Japan for the World; the World for Christ; and All for God. In this interdisciplinary, multi-angled approach to Uchimura Kanzo, the contributors shed light on the inner logic, meanings, and modes of interaction between the religious and social thought observable in Kanzo. Political Bribery in Japan Richard H. Mitchell, 1996-09-01 Scholars often use the term structural corruption when discussing modern Japan's political system--a system that forces politicians to exchange favors with businessmen in return for funds to finance their political careers. Scholars argue that the origins of corruption can be found in the iron triangles formed by politicians, bureaucrats, and businessmen during the postwar era or during the Pacific War years. In this examination of malfeasance in Japanese public office, Richard Mitchell systematically surveys political bribery in Japan's historical and cultural contexts from antiquity to the early 1900s. Mitchell's narrative serially considers scandals involving courtiers in the ancient imperial government, corruption among the shogun's samurai officials, and political bribery among bureaucrats and party politicians in the mid-nineteenth century. Mitchell concludes that bribery was as ubiquitous in premodern Japan as it has been in recent times. Focusing on the period since 1868, Mitchell discusses in fascinating detail changes in political bribery in the wake of suffrage expansion, estimates of the enormous amount of campaign money needed to win a Diet seat in both the prewar and postwar periods, and the low conviction rate of suspected takers of bribes. Here is a highly readable and reliable survey of an important yet largely neglected topic in English-language studies of Japanese political history.

Asia Ernie Patrick J. Killen, 2022-01-12 Pat Killen's collection of stories and memories of the exhilarating life of Earnest Hoberecht (pronounced Ho-bright), good old boy and war correspondent for United Press, stationed in Asia 1945-1988, is part modern history, part fascination, part legend. He reveals some secrets about Ernie's confidant, Gen. Douglas MacArthur, and tells of Ernie's four wives, one a part-Asian beauty, and his efforts to keep afloat a major international news service.

Proton Pump Inhibitors: A Balanced View T. Chiba,P. Malfertheiner,H. Satoh,2013-09-23 The discovery of proton pump inhibitors (PPIs) and their development over the years has dramatically changed the management of acid-related diseases. Today, the therapeutic domain of PPIs ranges from relief of symptoms to cure of mucosal lesions in the upper gastrointestinal tract. PPIs are among the most widely sold drugs in the world and are now even available as over-the-counter medication. This publication presents the experience of the last 25 years during which PPIs have become of enormous value in gastroenterology. The authors provide an update on a variety of subjects, starting with an introduction to the discovery and development of PPIs. This is followed by chapters on pharmacokinetics, pharmacodynamics and pharmacogenetics, gastroesophageal reflux disease, gastroprotection, Helicobacter pylori eradication treatment, peptic ulcer disease, functional dyspepsia, acid suppression in exocrine pancreatic insufficiency, and gastrointestinal and systemic side effects. Readers who are interested in a current overview of PPIs and their various applications will find this book of great value.

Molecular Strategies of Creatures to Survive in Acidic Environments Hiroshi Kobayashi,2021-07-16 Creatures often suffer changes in conditions of their surroundings from the womb to the tomb through the climate alterations and their own movements, and may have various strategies in place to overcome such environmental changes. Among the conditions they encounter, the pH of environments surrounding creatures varies dramatically during lifespans, especially in microorganisms. In humans, the skin covering the body prevents acidification inside the body, and cells are surrounded by body fluid whose pH is kept at 7.4. Nevertheless, pH surrounding cells is often acidified, especially diseased areas, such as cancer nests, inflammatory loci, and infarction areas. Life sciences at the molecular level have been focused on studies in near neutral pH conditions because neutral pH is favourable for many creatures. For a deeper understanding of life, it is essential to clarify molecular mechanisms of how organisms and cells keep their activities when their surroundings are acidified, in the “acidic world”. This book summarises the current achievements concerning how cellular functions are kept in acidic environments for a wide range of living organisms, from bacteria to humans. Research results obtained to date allow the prediction that all creatures have different sets of genes and use them under different pH conditions. However, we only know little about the “acidic world”, and a huge number of uncovered questions are waiting to be resolved. Their elucidation would help to open up a new way of understanding life.
