The Inside Story of China's High-tech Industry Yu Zhou, 2008 In the 1980s, China faced the monumental task of creating, from scratch, internationally competitive companies. This challenge was especially daunting in the information and communications technology sector. The Inside Story of China's High-Tech Industry describes the emergence and growth of this industry through an analysis of China's leading science park, Beijing's Zhongguancun. Zhou argues that, in the case of China, it is the conjunction of export and domestic markets that has provided the main impetus to technological learning and the development of industry competitiveness. This is the best treatment to date of China's most important innovation region.

High-tech Society Tom Forester, 1987 High Tech Society is the most definitive account available of the technology revolution that is transforming society and dramatically changing the way we live and work and maybe even think. It provides a balanced and sane overview of the opportunities as well as the dangers we face from new advances in information technology. In plain English, Forester demystifies computerese, defining and explaining a host of acronyms or computer terms now in use. Tom Forester is Lecturer and Director of the Foundation Programme in the School of Computing and Information Technology, Griffith University, Queensland, Australia. He is the editor/author of five books on technology and society.

The End of the Breakthrough Boris Gill, 2020-02-11 This multi-dimensional Silicon Valley drama presents both bitter and satirical aspects of a hi-tech startup business as viewed by eyes of the Russian-Jewish immigrant. Variety of characters and personal stories illustrate the raging nature of hi-tech enterprise as well as the fundamental conflict between scientists and money makers.

High Tech Trash Elizabeth Grossman, 2006-05-06 The Digital Age was expected to usher in an era of clean production, an alternative to smokestack industries and their pollutants. But as environmental journalist Elizabeth Grossman reveals in this penetrating analysis of high tech manufacture and disposal, digital may be sleek, but it's anything but clean. Deep within every electronic device lie toxic materials that make up the bits and bytes, a complex thicket of lead, mercury, cadmium, plastics, and a host of other often harmful ingredients. High Tech Trash is a wake-up call to the importance of the e-waste issue and the health hazards involved. Americans alone own more than two billion pieces of high tech electronics and discard five to seven million tons each year. As a result, electronic waste already makes up more than two-thirds of the heavy metals and 40 percent of the lead found in our landfills. But the problem goes far beyond American shores, most tragically to the cities in China and India where shiploads of discarded electronics arrive daily. There, they are recycled-picked apart by hand, exposing thousands of workers and community residents to toxics. As Grossman notes, This is a story in which we all play a part, whether we know it or not. If you sit at a desk in an office, talk to friends on your cell phone, watch television, listen to music on headphones, are a child in Guangdong, or a native of the Arctic, you are part of this story. The answers lie in changing how we design, manufacture, and dispose of high tech electronics. Europe has led the way in regulating materials used in electronic devices and in e-waste recycling. But in the United States many have yet to recognize the persistent human health and environmental effects of the toxics in high tech devices. If Silent Spring brought national attention to the dangers of DDT and other pesticides, High Tech Trash could do the same for a new generation of technology's products.

Reyner Banham and the Paradoxes of High Tech Todd Gannon, 2017-09-05 Reyner Banham and the Paradoxes of High Tech reassesses one of the most influential voices in twentieth-century architectural history through a detailed examination of Banham's writing on High Tech architecture and its immediate antecedents. Taking as a guide Banham's habit of structuring his writings around dialectical tensions, Todd Gannon sheds new light on Banham's early engagement with the New Brutalism of Alison and Peter Smithson, his measured enthusiasm for the "clip-on" approach developed by Cedric Price and the Archigram group, his advocacy of "well-tempered environments" fostered by integrated mechanical and electrical systems, and his late-career assessments of High Tech practitioners such as Norman Foster, Richard Rogers, and Renzo Piano. Gannon devotes significant attention to Banham's late work, including fresh archival materials related to Making Architecture: The Paradoxes of High Tech, the manuscript he left unfinished at his death in 1988. For the first time, readers will have access to Banham's previously unpublished draft introduction to that book.

Stability and Change in High-Tech Enterprises Neil Costello, 2013-04-15 How do firms live through and experience change? The authors examine four high-technology firms, providing a rich analysis of their routines, and illustrating how people are continually engaged with change. The book develops a broader concept of routine, and identifies the persistence of routine practices at a strategic level.

Teaching, Learning, Literacy in Our High-Risk High-Tech World James Paul Gee, 2017-04-14 This is a profound look at learning, language, and literacy. It is also about brains and bodies. And it is about talk, texts, media, and society. These topics, though usually studied in different narrow academic silos, are all part of one highly interactive process—human development. Gee argues that children will need to be resilient, imaginative, hopeful, and deliberate learners to survive the deeply complex and unpredictable world in which they live. In a world beset by conflicting ideologies that give rise to hatred, violence, and war, Gee urges us to look to a broader set of ideas from seemingly unrelated disciplines for a viable vision of education. This book proposes a framework of principles that can be used to reconceptualize education, specifically literacy education, to better prepare students to be collaborators toward peace and sustainability. Book Features: Offers a new set of ideas about literacy, learning, and human development in a risk-laden, digitally driven modern world. Uses recent breakthroughs in research on brains, bodies, society, identity, and teaching and learning in and out of school. Stresses the importance of human growth and development to a more peaceful and equitable world.

The Age of Surveillance Capitalism Shoshana Zuboff, 2019-01-15 The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called surveillance capitalism, and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new behavioral futures markets, where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new means of behavioral modification. The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a Big Other operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled hive of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

Pregnancy in a High-tech Age Robin Gregg, 1995-04 Too often, in the debate over reproductive rights and technologies, we lose sight of the fundamental emotional and psychological issues that define the experience of pregnancy. Robin Gregg here draws on the words and stories of over thirty women to provide a first-hand perspective on pregnancy in the modern age. In an age where a new advance in reproductive technology occurs seemingly every month, pregnancy has come to be defined by such medical procedures as prenatal screening,

amniocentesis, fetal monitoring, induced labor, and cesarean sections. Public policymakers, ethicists, religious figures, and the medical establishment control the debate, drowning out the voices of women who grapple in the most immediate sense with the issues. Even feminist theorists often overlook the nuances and paradoxes of the reproductive revolution as experienced by individual, particular women. The reader follows these thirty women as they speak about whether to become pregnant, and by what means; how to choose a health provider; what meaning they attribute to their pregnancies; and how they navigate their way through the contradictory pressures they face during pregnancy. The intimate nature of Gregg's research, consisting as it does largely of women's pregnancy narratives, lends her book a vibrancy often lacking in academic writing about reproduction.

Dream Reaper Craig Canine, 1997-06-08 An important book, rich with history and stories. it brings our most essential industry -- farming -- into new perspective. Reading it made me want to get out a crop. -- Bobbie Ann Mason Copyright © Libri GmbH. All rights reserved.

The Klone and I Danielle Steel, 1999-07-27 Stephanie had a rat for a husband. But after 13 years of marriage and two kids, she was devastated when he left her for a younger woman. Suddenly Stephanie was alone. And after months of trying to find a little romance on New York's wild singles circuit, she was ready to give up, reconciled to just raising her two great, but outspoken, kids. Then a spur-of-the-moment trip to Paris changed everything. She met him on the Left Bank. Peter Baker was a marvelously handsome high-tech entrepreneur also visiting the city. Stephanie was certain it couldn't possibly work. Peter was just too perfect. But much to her amazement, he contacted her when they returned to New York. And at the Long Island rental cottage she shared with her kids, Stephanie embarked on a bizarre and hilarious adventure beyond her wildest dreams. Shy, serious Peter, chairman of a bionic enterprise, was supposed to be away on business. Instead, he's standing at her door, wearing day-glo satin and rhinestones. Naturally, Stephanie thinks it's a joke--until the truth suddenly dawns: this isn't Peter playing a role. This is his double! Calling himself Paul Klone, this wild, uninhibited creature isn't even remotely like Peter except for his identically sexy good looks. This uproarious novel explores the outrageous love triangle that develops between Stephanie, Peter...and the Klone. In a wickedly funny, right-on-target look at finding the perfect mate in an imperfect world, bestselling novelist Danielle Steel reveals insights into the human heart that have made her novels #1 bestsellers around the world.

Representing High Tech Companies Gary M. Lawrence, Carl Baranowski, 1999 This book discusses financing and documenting joint ventures and early-stage strategic partnerships; devising workable nondisclosure agreements and managing an intellectual property portfolio.

High-tech Entrepreneurship in Asia Marina Yue Zhang, Mark Dodgson, 2014-05-14 This volume examines the relationships between high-tech entrepreneurship and innovation in an important new technology - mobile payments - in Korea and China, the countries that led the world in the development and diffusion of this technology.

High Tech Start Up, Revised And Updated John L. Nesheim, 2000-09-22 This revised and updated edition of Nesheim's underground Silicon Valley bestseller incorporates twenty-three case studies of successful start-ups, including tables of wealth showing how much money founders and investors realized from each venture. The phenomenal success of the initial public offerings (IPOs) of many new internet companies obscures the fact that fewer than six out of 1 million business plans submitted to venture capital firms will ever reach the IPO stage. Many fail, according to start-up expert John Nesheim, because the entrepreneurs did not have access to the invaluable lessons that come from studying the real-world venture experiences of successful companies. Now they do. Acclaimed by entrepreneurs the world over, this practical handbook is filled with hard-to-find information and guidance covering every key phase of a start-up, from idea to IPO: how to create a winning business plan, how to value the firm, how venture capitalists work, how they make their money, where to find alternative sources of funding, how to select a good lawyer, and how to protect intellectual property. Nesheim aims to improve the odds of success for first-time high-tech entrepreneurs, and offers an insider's perspective from firsthand experience on one of the toughest challenges they face -- convincing venture capitalists or investment banks to provide financing. This complete, classic reference tool is essential reading for first-time high-tech entrepreneurs, and entrepreneurs already involved in a start-up who want to increase their chances of success to rise to the top.

High-tech Grass Roots J. Cherie Strachan, 2003 Election campaigns in small and mid-sized electoral districts have been run from the grass roots from the beginning of the republic. Yard signs, door-to-door canvassing, and soap-box oratory have characterized state and local elections for years, and many predict their persistence into the 21st century. This book looks at new trends in small-town politics, tracking the infiltration of sophisticated communications technology, the use of political consultants, and the increase in fundraising and campaign expenditures. Original surveys, interviews, and in-depth case studies lead the author to conclude that the new tactics are with us to stay, but that their potentially negative effects--rising campaign budgets and diminished citizen participation--may be mitigated by creative approaches to reform. High Tech and High Heels in the Global Economy Carla Freeman, 2000-03-15 High Tech and High Heels in the Global Economy is an ethnography of globalization positioned at the intersection between political economy and cultural studies. Carla Freeman's fieldwork in Barbados grounds the processes of transnational capitalism--production, consumption, and the crafting of modern identities--in the lives of Afro-Caribbean women working in a new high-tech industry called "informatics." It places gender at the center of transnational analysis, and local Caribbean culture and history at the center of global studies. Freeman examines the expansion of the global assembly line into the realm of computer-based work, and focuses specifically on the incorporation of young Barbadian women into these high-tech informatics jobs. As such, Caribbean women are seen as integral not simply to the workings of globalization but as helping to shape its very form. Through the enactment of "professionalism" in both appearances and labor practices, and by insisting that motherhood and work go hand in hand, they re-define the companies' profile of "ideal" workers and create their own "pink-collar" identities. Through new modes of dress and imagemaking, the informatics workers seek to distinguish themselves from factory workers, and to achieve these new modes of consumption, they engage in a wide array of extra income earning activities. Freeman argues that for the new Barbadian pink-collar workers, the globalization of production cannot be viewed apart from the globalization of consumption. In doing so, she shows the connections between formal and informal economies, and challenges long-standing oppositions between first world consumers and third world producers, as well as white-collar and blue-collar labor. Written in a style that allows the voices of the pink-collar workers to demonstrate the simultaneous burdens and pleasures of their work, High Tech and High Heels in the Global Economy will appeal to scholars and students in a wide range of disciplines, including anthropology, cultural studies, sociology, women's studies, political economy, and Caribbean studies, as well as labor and postcolonial studies.
