At War with the Weather Howard C. Kunreuther,Erwann O. Michel-Kerjan,2011-08-19 Innovative, long-term strategies for reducing vulnerability to large-scale natural disasters and for providing financial support for disaster victims. The United States and other nations are facing large-scale risks at an accelerating rhythm. In 2005, three major hurricanes—Katrina, Rita, and Wilma—made landfall along the U.S. Gulf Coast within a six-week period. The damage caused by these storms led to insurance reimbursements and federal disaster relief of more than $180 billion—a record sum. Today we are more vulnerable to catastrophic losses because of the increasing concentration of population and activities in high-risk coastal regions of the country. The question is not whether but when, and how frequently, future catastrophes will strike and the extent of damages they will cause. Who should pay the costs associated with catastrophic losses suffered by homeowners in hazard-prone areas? In At War with the Weather, Howard Kunreuther and Erwann Michel-Kerjan with their colleagues deliver a groundbreaking analysis of how we currently mitigate, insure against, and finance recovery from natural disasters in the United States. They offer innovative, long-term solutions for reducing losses and providing financial support for disaster victims that define a coherent strategy to assure sustainable recovery from future large-scale disasters. The amount of data collected and analyzed and innovations proposed make this the most comprehensive book written on these critical issues in the past thirty years.

Remember These Things: Neighborhood Connections George M.Watson, Jr.,2014-07-18 Three middle-aged men who grew up in various states along the Northeast corridor migrated to the Washington D.C. area and by co-incidence moved into the same newly built neighborhood situated inside the Capital

Beltway. They become friends practically immediately since they were of the same age group as were the ages of their wives and children. What cements their acquaintance and friendship is when they became aware they were all Vietnam veterans serving in different years and in divergent capacities, one an officer in the Army, the other an enlisted man in the same Army unit with the third serving as an enlisted Marine. They socialize often with their families and among themselves through children's sports events. Their youngsters attend the same elementary school which enhances their social and neighborhood connections. And there are many neighborhood gatherings that all neighbors were welcome to attend. What breaks this placid neighborhood scene are the recent activities of a robber/ opportunist rapist who perplexes the local police departments from advancing any type of lead. The vets through their walks and wanderings with their dogs in Rock Creek Park locate a possible hideout. They share their thoughts and memories of wartime experiences together and attempt to solve the issue without the use of lethal weapons. The story is about their quest for justice and their intimate friendship that proves that not all Vietnam vets turned to drugs and alcohol and became homeless vagabonds and isolated forest dwellers. Many of them like these three guys who still carried their wartime memories succeeded in life and became responsible professionals and caring citizens.

The Storm Ivor van Heerden,Mike Bryan,2006-05-18 The ultimate inside story of the Katrina tragedy—from the cofounder of the LSU Hurricane Center After warning for years about the looming threat of catastrophic flooding in New Orleans, Ivor van Heerden was one of the highest-profile media experts during the Katrina disaster. Over the following eighteen months, he was even more prominent as he challenged the official version of those events and campaigned for an engineering plan that would protect all of southeastern Louisiana, once and for all. In The Storm, van Heerden lays out in full detail the stunning

incompetence among the bureaucrats, the politicians, and the Army Corps of Engineers that culminated in the catastrophe that crippled, perhaps forever, a great American city.

Cinema as Weather Kristi McKim,2013 How do cinematic portrayals of the weather reflect and affect our experience of the world? While weatherly predictability and surprise can impact our daily experience, the history of cinema attests to the stylistic and narrative significance of snow, rain, wind, sunshine, clouds, and skies. Through analysis of films ranging from The Wizard of Oz to The Umbrellas of Cherbourg, from Citizen Kane to In the Mood for Love, Kristi McKim calls our attention to the ways that we read our atmospheres both within and beyond the movies. Building upon meteorological definitions of weather's dynamism and volatility, this book shows how film weather can reveal character interiority, accelerate plot development, inspire stylistic innovation, comprise a momentary attraction, convey the passage of time, and idealize the world at its greatest meaning-making capacity (unlike our weather, film weather always happens on time, whether for tumultuous, romantic, violent, suspenseful, or melodramatic ends). Akin to cinema's structuring of ephemera, cinematic weather suggests aesthetic control over what is fleeting, contingent, wildly environmental, and beyond human capacity to tame. This first book-length study of such a meteorological and cinematic affinity casts film weather as a means of artfully and mechanically conquering contingency through contingency, of taming weather through a medium itself ephemeral and enduring. Using film theory, history, formalist/phenomenological analysis, and eco-criticism, this book casts cinema as weather, insofar as our skies and screens become readable through our interpretation of changing phenomena.

Storms and Grace Robert A. Gardner,2008-03-31 Sometimes its hard to know why you do things, why you make such bad, unexplainable choices so begins the remarkable story of faith, testing, lost and redemption. It is a story not so much about a

person, but a God who loves and preserves those who trust him. Storms and Grace carries you on a journey with a young man who found hope and meaning to life when he found God, but faced with the terrible inner storms lost sight of the Voice: that would not let him go. From Viet Nam to the murderous streets of Detroit you grip the pages breathlessly waiting for the next storm to end. How does a conscientious objector become a heavily armed and unpredictably dangerous time bomb more afraid of himself then any man living? Storms and Grace reaffirms humanities deep longing and hope that divine intervention still lives and is very personal.

Hurricane Watch Jack Williams,Bob Sheets,2002-02-05 The ultimate guide to the ultimate storms, Hurricane Watch is a

fascinating blend of science and history from one of the world's foremost meteorologists and an award-winning science journalist. This in-depth look at these awe-inspiring acts of nature covers everything from the earliest efforts by seafarers at predicting storms to the way satellite imaging is revolutionizing hurricane forecasting. It reveals the latest information on hurricanes: their effects on ocean waves, the causes of the variable wind speeds in different parts of the storm, and the origins of the super-cooled shafts of water that vent at high altitudes. Hurricane Watch is a compelling history of man's relationship with the deadliest storms on earth. Includes: - The story of the nineteenth-century Cuban Jesuit whose success at predicting the great cyclones was considered almost mystical. - A new look at Isaac Cline, whose infamous failure to predict the Galveston Hurricane left him obsessed with the devastating effects of storm surge. - The story of the Hurricane Hunters, including the first man ever to deliberately fly into a hurricane. - A complete account of how computer modeling has changed hurricane tracking. - A history of Project Stormfury: the only significant, organized effort to reduce the damaging strength of severe hurricanes. - A unique firsthand account of Hurricane Andrew by both authors, who were at the National Hurricane Center when Andrew struck. - A listing of the deadliest storms in history.

Mother of Storms John Barnes,1995-05-15 In the mid-Pacific, a gigantic hurricane triggered by nuclear explosions spawns dozens more in its wake. A world linked by a virtual-reality network experiences the devastation, witnessing the death of civilization as we know it and the violent birth of an emergent global consciousness.

The Projection of Britain James G. Mansell,Scott Anthony,2019-07-25 The General Post Office (GPO) Film Unit sat at the creative epicentre of Britain in the 1930s. It nurtured a vital crop of artistic talent, built a forum for a new kind of cinematic address and created Britain's first self-consciously

national cinema. In 2011, UNESCO added its work to the UK Memory of the World Register, recognising its status as part of Britain's cultural heritage. Elements of the GPO Film Unit's story are well known: John Grierson's development of documentary cinema; the influence of Mass Observation and Surrealism on its cinematic vision; the Watt–Auden–Britten collaboration Night Mail. The Projection of Britain: A History of the GPO Film Unit brings together primary materials and critical appraisals to revisit, re-contextualise and revitalise these seminal moments in British cinema. Here, the insights of an archivist, a musicologist, a design historian, a sports historian, a geographer and a postman – among others – have been edited into a rich critical archaeology of a compelling moment in cinematic history. Interspersed with these essays are primary materials – memoirs, magazine articles, posters and government documents – that detail everything from Alberto Cavalcanti's vision for the documentary movement to a claim for the clothes Humphrey Jennings lost while shooting on location. In recent years there has been a resurgence of interest in the GPO Film Unit and its work, on the big screen, in DVD boxsets and on the web. The Projection of Britain ties together the Unit's diverse artistic, historical and cultural threads into an essential one-stop resource. Provocative, imaginative and ambitious, this expansive study is the definitive companion to an extraordinary episode in cinematic history.
