It Started with a Steamboat Steven Harvey,2005 In little over a hundred years America went from a country that lacked a national road system to become a world leader in all forms of fast transportation. It was from 1807 to 1909 that the foundations of cheap fast travel forever changed us as a people and a nation. It all started with a steamboat trip up the Hudson which brought about a mechanical transportation revolution that came ashore and finally took to the air. Our story is about transportation starting with the steamboat, the development of New York's Finger Lakes, and how this helped bring about the modern business world we take for granted. It took only a century for the magical formula of fast transportation speeding up local development and business growth to transform our nation and the world we live in. The reader should always keep in mind the endless cycle of speed, development and business that keeps the ball rolling as time and distance continue to shrink in this ever changing world. Speed changed our lives to the point that we needed to escape it as the Excursionist Age of lakeside resorts, fine wines and dance halls came to life for the working weary and high rollers of the land. New York's Finger Lakes were the crown jewels of this age, having fine wineries and some of the best railroads and steamboats in the land. Out of all of this energy emerged the Wizard of Hammondsport, Glenn H. Curtiss! He would go on to become the fastest man on earth and in the air! Because of these events we no longer think in terms of distance, but instead in the time it takes to get there. We now think in sound bits, eat on the run, as our children live fast pace lives. Here is the story of how this came to be.

Steamboats in the Timber Ruby El Hult,2018-02-27 In the heyday of its water commerce, Lake Coeur d'Alene in northern Idaho was the scene of more steamboating than any other lake, salt or fresh, west of the Great Lakes. The old steamers brought gold, silver, and lead from the mines; lumber from the forests; mail to lonely homesteaders; and romance down the shadowy St. Joe River, whose silken waters flow into the Coeur d'Alene. The old steamboats are gone now from the lake—but here is their story, exciting, nostalgic and complete. Across Lake Coeur d'Alene, in the early days, the big mining boom in the Coeur d'Alene Mountains was carried out, and the ore-hauling stammers came and went. Across the lake water went the timber seekers in their rush to grab the white pine riches of the St. Joe country; and a new fleet of stammers carried timber barons, homesteaders and lumberjacks up the twisting, cottonwood-shaded St. Joe. On holidays the old stammers were transformed into excursion boats. The beauty of the mountain lake and its two rivers lured thousands of people from Spokane and the Palouse farmlands, who crowded into special trains and headed for the banner-draped boats. Gay crowds danced on deck, children had a hectic day, and amorous couples gazed languorously at the blue-and-silver waters as the excursion steamer trailed homeward in the moonlight. Here you will visit the bustling waterfront boom towns of Coeur d'Alene, Harrison, St. Maries, Ferrell, and St. Joe, just as they were in the glory days of steamboating, and as they are today. Romantic and factual history skilfully merge as the old towns, the rivermen, and the boats glide by in easy, informed narrative.

Symington and the Steamboat B.E.G. Clark,2010-06-06 There have been numerous books written about the development of the steamship but most deal with vessels built after Robert Fulton's commercial success of 1807 in America. Very few contain more than a line or so on the many earlier attempts made, and these at best only briefly mention William Symington. Both Fulton and Symington were contemporaries in their early but separate endeavours between 1785 and 1807. Neither were commercially successful by Symington's last vessel of 1803 and possibly his penultimate one of 1801, were the technical equal of the vessel built by Fulton in 1807. -- from dust jacket.

Steam Andrea Sutcliffe,2004 In 1807, Robert Fulton, using an English mail-order steam engine, chugged four miles an hour up the Hudson River and into American folklore as the inventor of the steamboat. However, the true first passenger steamboat in America, and the world, was built from scratch by John Fitch and plied the Delaware River almost two decades earlier. Steam tells the two-decade saga of America's first important venture in technology, a fascinating tale whose cast of characters includes George Washington, Thomas Jefferson, and Benjamin Franklin.
