The Ecolitan Enigma L. E. Modesitt, Jr.,2007-04-01 L.E. Modesitt, Jr.'s science fiction novels have been pleasing readers for nearly two decades. Among his earlier novels were three books set in the future universe of the Ecolitan Institute. Now Modesitt returns to that world to tell another story of cultural conflict and interstellar diplomacy. The Ecolitan Enigma is sure to thrill his old fans and win new ones. Nathaniel Firstborn Whaler is an Ecolitan, both a professor at the Institute and a field agent with extraordinary powers. Sent to a backwater colony planet nominally to determine its economic viability, Whaler evades assassin's bullets only steps from the spaceport. He soon uncovers evidence that the planet will become the flashpoint for interstellar conflict between two empires, with each prepared to blame the Ecolitan Institute should war break out. Whaler must do everything in his power to stop what might become the worst disaster in human history. And Nathaniel whaler just may have more power than any man in the galaxy. A shocking novel of what could happen if the fanatical defense of the environment crossed the line into deadly terror. When environmental consultant Jack McDarvid's boss is killed in a shootout near the Capitol, McDarvid becomes enmeshed in a diabolical plot behind the scenes of the environmental movement. This highly charged novel contains all the ingredients of a political thriller.--Library Journal Other Series by L.E. Modesitt, Jr. The Saga of Recluce The Imager Portfolio The Corean Chronicles The Spellsong Cycle The Ghost Books The Ecolitan Matter The Forever Hero Timegod's World Other Books The Green Progression Hammer of Darkness The Parafaith War Adiamante Gravity Dreams The Octagonal Raven Archform: Beauty The Ethos Effect Flash The Eternity Artifact The Elysium Commission Viewpoints Critical Haze Empress of Eternity The One-Eyed Man Solar Express At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Ecolitan Prime L. E. Modesitt,L. E. Modesitt, Jr.,2003-11 This new omnibus from L. E. Modesitt, Jr., includes the third and fourth of his four- volume Ecolitan series, The Ecologic Envoy and The Ecolitan Enigma, both starring Nathaniel Whaler. Four hundred years after winning secession from the Terran Empire (as chronicled in the earlier omnibus, Empire & Ecolitan), the star system Accord wants to sign a simple trade treaty with the Empire on microchip export tariffs. But if the agreement is so minor, why is Professor Nathaniel Whaler, chief economist at the Ecolitan Institute and his world's top commando killer, chosen as Accord's Envoy? Because the Imperial capital is a maddening bureaucracy of sniveling diplomats, high-profile figureheads, powers behind the throne, and spies---everywhere, spies. So the Envoy has to face red tape, politics, prejudice, as well as and a gauntlet of kidnappers, assassins, snipers, and bombs. And some ministry---but which?---doesn't want the treaty. In fact, some in the Empire still blame Accord for Earth's poisoning and for the defection of fifty star systems after the war between Imperial nuclear might and Ecolitan bio-ecological weaponry. A hidden cabal wants to fight that war again---even if, this time, the entire galaxy dies. And only Nathaniel Whaler, the Ecologic Envoy, has the power to stop the catastrophe. This omnibus concludes one of L. E. Modesitt's most powerful science fiction series.

An Introduction to Quantitative Methods for Historians Roderick Floud,2013-11-05 Many statements made by historians are quantitative statements, involving the use of measurable historical evidence. The historian who uses quantitative methods to analyse and interpret such information needs to be well acquainted with the particular methods and techniques of analysis and to be able to make the best use of the data that are available. There is an increasing need for training in such methods and in the interpretation of the large volume of literature now using quantitative techniques. Dr Floud's text, which is relevant to all branches of historical inquiry, provides a straightforward and intelligible introduction for all students and research workers. The simpler and more useful techniques of descriptive and analytical statistics are described, up to the level of simple linear regression. Historical examples are used throughout, and great attention is paid to the need to ensure that the techniques are consistent with the quality of the data and with the historical problems they are intended to solve. Attention is paid to problems of the analysis of time series, which are of particular use to historians. No previous knowledge of statistics is assumed, and the simple mathematical techniques that are used are fully and clearly explained, without the use of more mathematical knowledge than is provided by an O-level course. A bibliography is provided to guide historians towards the most useful further reading. This student friendly text was first published in 1973.
