Sorting Excel Data: The Basics & Beyond Maria Langer, 2012 Wildly popular as a spreadsheet application, Microsoft Excel includes a robust collection of data management features, making it an excellent tool for working with lists of data. The ability to sort this data remains one of Excel's strongest and most-used features. But exactly how do you use Excel's sorting features to organize data the way you need to? Ribbon and toolbar buttons, menu commands, dialog boxes, and hidden options-in Excel, sorting can be simple and complicated at the same time, often yielding surprising, undesired results. This guide takes the mystery and confusion out of Excel's sorting features. It starts by covering the basics of simple, one-column sorts. It then builds on that information to explain multi-column sorting, setting up and using custom sort orders, sorting based on cell colors or icons, performing case-sensitive sorts, and sorting by rows instead of columns. Step-by-step, fully illustrated instructions make it clear what you need to do. Sample files available on the Maria's Guides website make it easy to repeat exercises so you can see the same results. Although this book concentrates on Microsoft Excel 2010 for Windows and Microsoft Excel 2011 for Mac OS, it also provides useful tips and instructions for previous versions of Excel. Don't waste time trying to decipher cryptic instructions in Excel's onscreen help. Get the information you need, written in a way you can understand by an experienced author who has been using, teaching, and writing about Excel for more than 20 years.

How to Gather Information, Take Notes, and Sort Evidence Sara Howell, 2013-12-15 Today's students have access to many sources of information. The mere number of sources can be daunting when doing research for a school project. This handy guide explains the advantages of print and digital sources and impresses upon readers the importance of using credible sources. Suggestions for taking and organizing notes are featured, too.

How to Make Sense of Any Mess Abby Covert, 2014 Everything is getting more complex. It is easy to be overwhelmed by the amount of information we encounter each day. Whether at work, at school, or in our personal endeavors, there's a deepening (and inescapable) need for people to work with and understand information. Information architecture is the way that we arrange the parts of something to make it understandable as a whole. When we make things for others to use, the architecture of information that we choose greatly affects our ability to deliver our intended message to our users. We all face messes made of information and people. This book defines the word mess the same way that most dictionaries do: A situation where the interactions between people and information are confusing or full of difficulties. - Who doesn't bump up against messes made of information and people every day? *How to Make Sense of Any Mess* provides a seven step process for making sense of any mess. Each chapter contains a set of lessons as well as workbook exercises architected to help you to work through your own mess.

How to Be Sort of Happy in Law School Kathryn M. Young, 2018-08-07 Each year, over 40,000 new students enter America's law schools. Each new crop experiences startlingly high rates of depression, anxiety, fatigue, and dissatisfaction. Kathryn M. Young was one of those disgruntled law students. After finishing law school (and a PhD), she set out to learn more about the law school experience and how to improve it for future students. Young conducted one of the most ambitious studies of law students ever undertaken, charting the experiences of over 1000 law students from over 100 different law schools, along with hundreds of alumni, dropouts, law professors, and more. *How to Be Sort of Happy in Law School* is smart, compelling, and highly readable. Combining her own observations and experiences with the results of her study and the latest sociological research on law schools, Young offers a very different take from previous books about law school survival. Instead of assuming her readers should all aspire to law-review-and-big-firm notions of success, Young teaches students how to approach law school on their own terms: how to tune out the drumbeat of oppressive expectations and conventional wisdom to create a new breed of law school experience altogether. Young provides readers with practical tools for finding focus, happiness, and a sense of purpose while facing the seemingly endless onslaught of problems law school presents daily. This book is an indispensable companion for today's law students, prospective law students, and anyone who cares about making law students' lives better. Bursting with warmth, realism, and a touch of firebrand wit, *How to Be Sort of Happy in Law School* equips law students with much-needed wisdom for thriving during those three crucial years.

Rose Water and Orange Blossoms Maureen Abood, 2015-04-28 Publishers Weekly's Top 10 Cookbooks for Spring 2015 Pomegranates and pistachios. Floral waters and cinnamon. Bulgur wheat, lentils, and succulent lamb. These lush flavors of Maureen Abood's childhood, growing up as a Lebanese-American in Michigan, inspired Maureen to launch her award-winning blog, *Rose Water & Orange Blossoms*. Here she revisits the recipes she was reared on, exploring her heritage through its most-beloved foods and chronicling her riffs on traditional cuisine. Her colorful culinary guides, from grandparents to parents, cousins, and aunts, come alive in her stories like the heady aromas of the dishes passed from their hands to hers. Taking an ingredient-focused approach that makes the most of every season's bounty, Maureen presents more than 100 irresistible recipes that will delight readers with their evocative flavors: Spiced Lamb Kofta Burgers, Avocado Tabbouleh in Little Gems, and Pomegranate Rose Sorbet. Weaved throughout are the stories of Maureen's Lebanese-American upbringing, the path that led her to culinary school and to launch her blog, and life in Harbor Springs, her lakeside Michigan town.

The Big Sort Bill Bishop, 2009-05-11 The award-winning journalist reveals the untold story of why America is so culturally and politically divided in this groundbreaking book. Armed with startling demographic data, Bill Bishop demonstrates how Americans have spent decades sorting themselves into alarmingly homogeneous communities—not by region or by state, but by city and neighborhood. With ever-increasing specificity, we choose the communities and media that are compatible with our lifestyles and beliefs. The result is a country that has become so ideologically inbred that people don't know and can't understand those who live just a few miles away. In *The Big Sort*, Bishop explores how this phenomenon came to be, and its dire implications for our country. He begins with stories about how we live today and then draws on history, economics, and our changing political landscape to create one of the most compelling big-picture accounts of America in recent memory.

How to Sort Your Fucking Life Out Greg Zuckerman, 2020-10-18 'This book is going to instantly transform your entire life. You will immediately experience huge benefits and you will be happier than ever before.' If you were in any way taken in by that statement, this is not the book for you. Don't waste your time. Definitely don't waste your money. There isn't a cat's chance in hell this book or any book could ever live up to that bollocks. To be honest, this probably isn't the book for you anyway. Most people prefer quick and easy cure-alls to evidence based but complex solutions. Most people buy into any old shit because there was a picture with a quote next to it or because their mum's mate in work said it 'really works'. There's a chance, like a 1 in 1,000 chance, that in fact you might understand what this book is about. If you value logic, understand there are no miracle quick fixes and don't buy into popularist YouTube influencer nonsense, then okay, you have my permission to read this book.

A Different Sort of Normal Abigail Balfe, 2021-07-22 'I REALLY love it. Buy it for your kids, your parents, your grandparents. Mostly buy it for yourself' Holly Smale, author of the Geek Girl series 'This book is what I needed as a kid! Empathetic, joyful and beautifully authentic. I loved it!' Elle McNicoll, author of *A Kind of Spark* 'The beautiful true story of one girl's journey growing up autistic - and the challenges she faced in the 'normal' world' I'm not like the other children in my class . . . and that's an actual scientific FACT. Hi! My name is Abigail, and I'm autistic. But I didn't know I was autistic until I was an adult-sort-of-person*. This is my true story of growing up in the confusing 'normal' world, all the while missing some Very Important Information about myself. There'll be scary moments involving toilets and crowded trains, heart-warming tales of cats and pianos, and funny memories including my dad and a mysterious tub of ice cream. Along the way you'll also find some Very Crucial Information about autism. If you've ever felt different, out of place, like you don't fit in . . . this book is for you. *I've never really felt like an actual-adult-person, as you'll soon discover in this book... 'Funny, fascinating . . . a rewarding and highly entertaining read' Guardian Told through the author's remarkable words, and just as remarkable illustrations, this is the book for those who've never felt quite right in the 'normal' world.

Data Algorithms Mahmoud Parsian, 2015-07-13 If you are ready to dive into the MapReduce framework for processing large datasets, this practical book takes you step by step through the algorithms and tools you need to build distributed MapReduce applications with Apache Hadoop or Apache Spark. Each chapter provides a recipe for solving a massive computational problem, such as building a recommendation system. You'll learn how to implement the appropriate MapReduce solution with code that you can use in your projects. Dr. Mahmoud Parsian covers basic design patterns, optimization techniques, and data mining and machine learning solutions for problems in bioinformatics, genomics, statistics, and social network analysis. This book also includes an overview of MapReduce, Hadoop, and Spark. Topics include: Market basket analysis for a large set of transactions Data mining algorithms (K-means, KNN, and Naive Bayes) Using huge genomic data to sequence DNA and RNA Naive Bayes theorem and Markov chains for data and market prediction Recommendation algorithms and pairwise document similarity Linear regression, Cox regression, and Pearson correlation Allelic frequency and mining DNA Social network analysis (recommendation systems, counting triangles, sentiment analysis)

Kurt Vonnegut Kurt Vonnegut, 2012-10-30 NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Newsweek/The Daily Beast • The Huffington Post • Kansas City Star • Time Out New York • Kirkus Reviews This extraordinary collection of personal correspondence has all the hallmarks of Kurt Vonnegut's fiction. Written over a sixty-year period, these letters, the vast majority of them never before published, are funny, moving, and full of the same uncanny wisdom that has endeared his work to readers worldwide. Included in this comprehensive volume: the letter a twenty-two-year-old Vonnegut wrote home immediately upon being freed from a German POW camp, recounting the ghastly firebombing of Dresden that would be the subject of his masterpiece *Slaughterhouse-Five*; wry dispatches from Vonnegut's years as a struggling writer slowly finding an audience and then dealing with sudden international fame in middle age; righteously angry letters of protest to local school boards that tried to ban his work; intimate remembrances penned to high school classmates, fellow veterans, friends, and family; and letters of commiseration and encouragement to such contemporaries as Gail Godwin, Günter Grass, and Bernard Malamud. Vonnegut's unmediated observations on science, art, and commerce prove to be just as inventive as any found in his novels—from a crackpot scheme for manufacturing "atomic" bow ties to a tongue-in-cheek proposal that publishers be allowed to trade authors like baseball players. ("Knopf, for example, might give John Updike's contract to Simon and Schuster, and receive Joan Didion's contract in return.") Taken together, these letters add considerable depth to our understanding of this one-of-a-kind literary icon, in both his public and private lives. Each letter brims with the mordant humor and openhearted humanism upon which he built his legend. And virtually every page contains a quotable nugget that will make its way into the permanent Vonnegut lexicon. • On a job he had as a young man: "Hell is running an elevator throughout eternity in a building with only six floors." • To a relative who calls him a "great literary figure": "I am an American fad—of a slightly higher order than the hula hoop." • To his daughter Nanny: "Most letters from a parent contain a parent's own lost dreams disguised as good advice." • To Norman Mailer: "I am cuter than you are." Sometimes biting and ironical, sometimes achingly sweet, and always alive with the unique point of view that made him the true cultural heir to Mark Twain, these letters comprise the autobiography Kurt Vonnegut never wrote. Praise for Kurt Vonnegut: Letters "Splendidly assembled . . . familiar, funny, cranky . . . chronicling [Vonnegut's] life in real time."—Kurt Andersen, *The New York Times Book Review* "[This collection is] by turns hilarious, heartbreaking and mundane. . . . Vonnegut himself is a near-perfect example of the same flawed, wonderful humanity that he loved and despaired over his entire life."—NPR "Congenial, whimsical and often insightful missives . . . one of [Vonnegut's] very best."—*Newsday* "These letters display all the hallmarks of Vonnegut's fiction—smart, hilarious and heartbreaking."—*The New York Times Book Review*

Lies, Damned Lies, and Science Sherry Seethaler,2009-01-13 “Comprehensive, readable, and replete with current, useful examples, this book provides a much-needed explanation of how to be a critical consumer of the scientific claims we encounter in our everyday lives.” —April Cordero Maskiewicz, Department of Biology, Point Loma Nazarene University “Seethaler’s book helps the reader look inside the workings of science and gain a deeper understanding of the pathway that is followed by a scientific finding—from its beginnings in a research lab to its appearance on the nightly news.” —Jim Slotta, Ontario Institute for Studies in Education, University of Toronto “How I wish science was taught this way! Seethaler builds skills for critical thinking and evaluation. The book is rich with examples that not only illustrate her points beautifully, they also make it very interesting and fun to read.” —Julia R. Brown, Director, Targacept, Inc. Don’t Get Hoodwinked! Make Sense of Health and Science News...and Make Smarter Decisions! Every day, there’s a new scientific or health controversy. And every day, it seems as if there’s a new study that contradicts what you heard yesterday. What’s really going on? Who’s telling the truth? Who’s faking it? What do scientists actually know—and what don’t they know? This book will help you cut through the confusion and make sense of it all—even if you’ve never taken a science class! Leading science educator and journalist Dr. Sherry Seethaler reveals how science and health research really work...how to put scientific claims in context and understand the real tradeoffs involved...tell quality research from junk science...discover when someone’s deliberately trying to fool you...and find more information you can trust! Nobody knows what new controversy will erupt tomorrow. But one thing’s for certain: With this book, you’ll know how to figure out the real deal—and make smarter decisions for yourself and your family! Watch the news, and you’ll be overwhelmed by snippets of badly presented science: information that’s incomplete, confusing, contradictory, out-of-context, wrong, or flat-out dishonest. Defend yourself! Dr. Sherry Seethaler gives you a powerful arsenal of tools for making sense of science. You’ll learn how to think more sensibly about everything from mad cow disease to global warming—and how to make better science-related decisions in both your personal life and as a citizen. You’ll begin by understanding how science really works and progresses, and why scientists sometimes disagree. Seethaler helps you assess the possible biases of those who make scientific claims in the media, and place scientific issues in appropriate context, so you can intelligently assess tradeoffs. You’ll learn how to determine whether a new study is really meaningful; uncover the difference between cause and coincidence; figure out which statistics mean something, and which don’t. Seethaler reveals the tricks self-interested players use to mislead and confuse you, and points you to sources of information you can actually rely upon. Her many examples range from genetic engineering of crops to drug treatments for depression...but the techniques she teaches you will be invaluable in understanding any scientific controversy, in any area of science or health. ^ Potions, plots, and personalities: How science progresses, and why scientists sometimes disagree ^ Is it “cause” or merely coincidence? How to tell compelling evidence from a “good story” ^ There are always tradeoffs: How to put science and health claims in context, and understand their real implications ^ All the tricks experts use to fool you, exposed! How to recognize lies, “truthiness,” or pseudo-expertise

Another Sort of Learning James V. Schall,2011-05-12 Noting the widespread concern about the quality of education in our schools, Schall examines what is taught and read (and not read) in these schools. He questions the fundamental premises in our culture which do not allow truth to be considered. Schall lists various important books to read, and why.
