Sound Out and Sort, Grades 1 - 2 Karen Seberg,2010-05-18 Instill a love of language in special-education students in grades 1-2 using Sound Out and Sort. This 160-page book contains information on phonemic awareness, phonics, and word study. Students work with speech sounds, letter-sound correspondences, and letter clusters. This book includes warm-up exercises, word-building lessons, picture-word activities, word finds, memory matching, and reproducible activity sheets. The book supports NCTE and NAEYC standards.

Living High and Letting Die Peter Unger,1996-06-20 By contributing a few hundred dollars to a charity like UNICEF, a prosperous person can ensure that fewer poor children die, and that more will live reasonably long, worthwhile lives. Even when knowing this, however, most people send nothing, and almost all of the rest send little. What is the moral status of this behavior? To such common cases of letting die, our untutored response is that, while it is not very good, neither is the conduct wrong. What is the source of this lenient assessment? In this contentious new book, one of our leading philosophers argues that our intuitions about ethical cases are generated not by basic moral values, but by certain distracting psychological dispositions that all too often prevent us from reacting in accord with our commitments. Through a detailed look at how these tendencies operate, Unger shows that, on the good morality that we already accept, the fatally unhelpful behavior is monstrously wrong. By uncovering the eminently sensible ethics that we've already embraced fully, and by confronting us with empirical facts and with easily followed instructions for lessening serious suffering appropriately and effectively, Unger's book points the way to a compassionate new moral philosophy.

Advances in Databases and Information Systems Tadeusz Morzy,Theo Härder,Robert Wrembel,2012-08-21 This volume is the second one of the 16th East-European Conference on Advances in Databases and Information Systems (ADBIS 2012), held on September 18-21, 2012, in Poznań, Poland. The first one has been published in the LNCS series. This volume includes 27 research contributions, selected out of 90. The contributions cover a wide spectrum of topics in the database and information systems field, including: database foundation and theory, data modeling and database design, business process modeling, query optimization in relational and object databases, materialized view selection algorithms, index data structures, distributed systems, system and data integration, semi-structured data and databases, semantic data management, information retrieval, data mining techniques, data stream processing, trust and reputation in the Internet, and social networks. Thus, the content of this volume covers the research areas from fundamentals of databases, through still hot topic research problems (e.g., data mining, XML data processing), to novel research areas (e.g., social networks, trust and reputation, and data stream processing). The editors of this volume believe that its content will inspire the researchers with new ideas for future development. It may also serve as an overview of the ongoing work in the field of databases and information systems.

The Q-sort in Character Appraisal Jack Block,2008 For over half a century, the Q-sort procedure has been fruitfully used to quantitatively and systematically characterize individual personalities in a variety of clinical and other settings. Through the years, the technique has been greatly enhanced by subsequent conceptual and methodological developments and has gained wide currency in a host of appraisal settings. In this long-awaited expansion of his classic 1961 monograph, Jack Block traces the history, rationale, and productive ramifications of the Q-sort technique, as implemented by the long-established California Q-sort. Major versions of the Q-sort currently in use are included, complete with detailed instructions, empirically based savvy, and descriptive prototypes especially apt for the individual sorter's reference frame. Clinical and personality psychologists, psychiatrists, social workers, and graduate students will find this book to be the definitive work on an important and underused personality assessment tool--Jacket.
