Fabrigami is the Asian art of folding fabrics to create three-dimensional objects ranging from the practical to the whimsical. Like paper, there are countless beautiful fabric designs to choose from, only fabric has the virtue of being extremely durable. Fabrigami began as origami legend Florence Temko's final project. Everyone knows that origami is the art of paper folding, but Temko had begun experimenting with folding fabric to make objects that are just as beautiful but more lasting than paper. Sadly, Temko passed away before the book was completed, but her collaborator, Jill Stovall, continued their work. Now, Stovall—with the help of Scott Stern, a rising young star of origami—brings Fabrigami to print for everyone to use and enjoy. This origami book begins by presenting instructions on how to treat fabric so it holds a shape when folded. Then Stovall shares a series of fun craft projects with simple origami-style diagrams that you can use to make a range of lovely objects. Stiffening the fabric requires some practice, but the folds are all easy enough to be considered origami-for-kids projects and are a great way to learn origami. Folding Paper Meher McArthur, Robert James Lang, 2012 Folding Paper is the first major exhibition to explore the rich tradition of paper folding in Japan and Europe, its evolution from children's craft to fine art, and its inventive applications in science, design, and the global peace movement. Approximately 140 spectacular works by more than 50 artists from 15 different countries demonstrate that origami has become such a refined form of artistic, scientific, and spiritual expression there is almost nothing a square sheet of paper cannot be folded into. The works range from lifelike and representational to mathematical and computer-generated to lyrical and abstract to social and political. The exhibition also includes origami-related woodblock prints, murals, books, wall projections, videos, and a unique interactive origami-making component. The exhibition is organized into 4 sections: 1) The History of Origami; 2) Animals and Angels: Representations of Real and Imagined Realms; 3) Angles and Abstractions: Geometric Forms and Conceptual Constructions; and 4) Inspirational Origami: Impact on Science, Industry, Fashion, and Beyond. Folding Paper was developed by independent curator, author, and educator Meher McArthur, former curator of East Asian Art at Pacific Asia Museum in Pasadena, California. The exhibition will debut in Los Angeles at the Japanese American National Museum in March 2012. The award-winning documentary film, *Between the Folds*, features 18 of the artists in the exhibition and would correlate wonderfully with exhibition programming. Folding Paper is a dynamic exhibition with a compelling message: origami is an international fine art form that is also at the cutting edge of math, science, and design. The exhibition was generously supported by the E. Rhodes & Leona B. Carpenter Foundation.
