Eiffel's Tower for Young People Jill Jonnes, 2019-05-28 Eiffel's Tower for Young People is a vivid, lively pageant of people and cultures meeting—and competing—on the world stage at the dawn of the modern era. The 1889 World's Fair was a worldwide event showcasing the cutting-edge cultural and technological accomplishments of the world's most powerful nations on the verge of a new century. France, with its long history of sophistication and cultivation and a new republican government, presented the Eiffel Tower, the world's tallest structure, crafted from eighteen thousand pieces of wrought iron and 2.5 million rivets, as a symbol of national pride and engineering superiority. The United States, with its brash, can-do spirit, full of pride in its frontier and its ingenuity, presented the rollicking Wild West show of Buffalo Bill Cody and Annie Oakley, and the marvelous new phonograph of Thomas Edison. With historical photos throughout, outsized personalities, squabbling artists, and a sprinkling of royalty, this dramatic history opens a window to a piece of the past that, in its passions

and politics, is an unforgettable portrait of a unique moment in history.

A History of Mechanical Engineering Ce Zhang, Jianming Yang, 2020-01-03 This book explores the history of mechanical engineering since the Bronze Age. Focusing on machinery inventions and the development of mechanical technology, it also discusses the machinery industry and modern mechanical education. The evolution of machinery is divided into three stages: Ancient (before the European Renaissance), Modern (mainly including the two Industrial Revolutions) and Contemporary (since the Revolution in Physics, especially post Second World War). The book not only clarifies the development of mechanical engineering, but also reveals the driving forces behind it – e.g. the economy, national defense and human scientific research activities – to highlight the links between technology and society; mechanical engineering and the natural sciences; and mechanical engineering and related technological areas. Though mainly intended as a textbook or supplemental reading for graduate students, the book also offers a unique resource for researchers and engineers in mechanical engineering who wish to broaden their horizons.

Caboodle of Short Stories P. Kasturi Rangan, This collection of 5 stories for children and the age defying adults has been written over a period of many years now. The first story was written some 10 years back and I had no idea that one day I will bring it out as a compendium of my short stories. The feedbacks I received when I published the first ones as stand alone stories propelled me without a conscious but irresistible rudder towards this goal. I write a story without any set boundary or time when I feel like it towards the act of writing. I simply put down on paper the incessant urge I feel to weave a story. Some of these stories started with just an off-hand comment from a colleague or friend whereas others were more of an exertion of thought towards reaching a certain goal. The goal is always to produce a story that will be liked by children as well as by adults who are still young at heart. Physical age is not counted! Most of the stories that I see for children nowadays seem to me

to be preachy. They seem to treat the child as a vessel of change by turning their thoughts towards behaving better or giving out some morals to shape their course of life. Its as if we adults (some only in appearance) want the child to behave or live an utopian life when such utopia exists only in our dreams. I have tried my best to refrain from such efforts and to treat kids as kids and provide them a situation, a problem and a possible solution. The teaching part is left out and the learning is for to the child to figure out. If the story puts a smile on the face of the reader, I shall feel my purpose is achieved. I strongly feel that a child should be left alone to enjoy his or her childhood. They shall soon have to grow up and conform to societal and other pressures. The pressure to live in a certain way will come with time. These stories are meant to provide them an alternative way to enjoy their time and to plot for their next adventure. The adventure called 'Life'. Thanks to all who knowingly or surreptitiously helped with the course of these stories. Their comments and behaviours have made these stories flow, sometimes into unknown territories from which I had to struggle hard to rescue them and sometimes myself as well. I hope you like them. Illustrations for the stories have been done by Sahayaa Jeevan. Thanks a lot for your help. P. Kasturi Rangan

Tricky Vic Greg Pizzoli, 2015-03-10 A New York Times Book Review Best Illustrated Children's Book of 2015 In the early 1900s, Robert Miller, a.k.a. "Count Victor Lustig," moved to Paris hoping to be an artist. A con artist, that is. He used his ingenious scams on unsuspecting marks all over the world, from the Czech Republic, to Atlantic ocean liners, and across America. Tricky Vic pulled off his most daring con in 1925, when he managed to sell the Eiffel Tower to one of the city's most successful scrap metal dealers! Six weeks later, he tried to sell the Eiffel Tower all over again. Vic was never caught. For that particular scam, anyway. . . . Kids will love to read about Vic's thrilling life, and teachers will love the informational sidebars and back matter. Award-winner Greg Pizzoli's humorous

and vibrant graphic style of illustration mark a bold approach to picture book biography.
