War Footing Frank J Gaffney,2013-05-11 America has been at war for years, but until now, it's not been clear with whom. We have been fighting without being clear for what. We have been waging war without using the full resources we need to win. With the publication of War Footing, Frank Gaffney and his colleagues make it clear not only whom the enemy is and how high the stakes are, but also how we can prevail. Their book explains that we are engaged in nothing less than a War for the Free World —a fight to the death with Islamofascists who adhere to a political ideology bent on our destruction. It then offers ten specific steps that Americans, as individuals and as communities, can take to ensure our way of life and the safety and well-being of our children. These steps include specific recommendations about how to know the enemy, support our troops, provide for our energy security, stop investing in terror, equip the country for war at home, counter an EMP attack, secure our borders and interior against illegal immigration, wage political warfare, launch regional initiatives, and wield effective diplomacy. This definitive, highly readable owner's manual for the War for the Free World has been written by one of the most prominent national security experts of our time, Frank J. Gaffney, and his extraordinary team of respected experts. Among them are R. James Woolsey, Victor Davis Hanson, Generals Tom McInerney, USAF (Ret.) and Paul Valley, USA (Ret.); Alex Alexiev, Andrew McCarthy, Claudia Rosett, Michael Rubin, Daniel Goure, Caroline Glick, Michael Waller, and many others.

Nano R. Smith,2007-02 By Rob Smith ISBN: 978 1846930386 Published: 2007 Pages: 354 Description Nanotechnology is for mankind a long-term research project. It is certainly the science of the future but whether it will bear fruit in the next ten years or the next hundred years nobody knows. But after biotechnology it is certainly where most of the high-risk investment money is heading. The risk from a grey goo engulfing the world - as prophesied by some - while not impossible is thankfully unlikely as so many safeguards can be built in. I hope that this book will help to advance the cause of nanotechnology by showing what it can do for mankind. About the Author Rob Smith graduated in Electronics, Physics and Mathematics and then spent some years working for large electronics companies and restoring Astronomical Observatories. After his first wife suddenly died he picked up the pieces of his life and married again, this time to a lady from Russia. Having lived for some years in Spain he and his new family returned to Hampshire where he now works as a Lecturer.
