Punched-Card Systems and the Early Information Explosion, 1880–1945 Lars Heide,2009-04-27 At a time when Internet use is closely tracked and social networking sites supply data for targeted advertising, Lars Heide presents the first academic study of the invention that fueled today’s information revolution: the punched card. Early punched cards helped to process the United States census in 1890. They soon proved useful in calculating invoices and issuing pay slips. As demand for more sophisticated systems and reading machines increased in both the United States and Europe, punched cards served ever-larger data-processing purposes. Insurance companies, public utilities, businesses, and governments all used them to keep detailed records of their customers, competitors, employees, citizens, and enemies. The United States used punched-card registers in the late 1930s to pay roughly 21 million Americans their Social Security pensions, Vichy France used similar technologies in an attempt to mobilize an army against the occupying German forces, and the Germans in 1941 developed several punched-card registers to make the war effort—and surveillance of minorities—more effective. Heide’s analysis of these three major punched-card systems, as well as the impact of the invention on Great Britain, illustrates how different cultures collected personal and financial data and how they adapted to new technologies. This comparative study will interest students and scholars from a wide range of disciplines, including the history of technology, computer science, business history, and management and organizational studies.

Only the Darkness Mike Crowson,2008-07-12 Only the DarknessGill has a safe way of exploring past lives ... but when Concha tries it she experiences an excerpt from the life of the woman who will be her daughter, living in a world of worsening environmental conditions, she tries to change the future by getting her friend Eugene to undertake some genetic engineering for his doctorate. When Concha experiences a glimpse of her great granddaughter Ana's life nothing has changed - why not? What has happened to Eugene's project?The question is whether Concha saw 'the' future or just 'a' future or whether she caused the future she saw. Duplicity and double dealing, greed and lust for wealth and riches at the expense of the world at large may make an exciting story and certainly demand all Gill and Steve's resourcefulness - breaking into the university genetics department and passing information to an environmental organisation.

Box Nine Jack O'Connell,2011-11-08 A narcotics detective wages war against a deadly new stimulant The drug is called Lingo, and it’s the most powerful narcotic Lenore has ever seen. This cheaply manufactured pill races straight for the brain’s language center, supercharging it so that even a dimwitted person can speak and read at 1,500 words per minute. It induces giddiness, confidence, and sexual euphoria—with a side effect of murderous rage. The drug has come to Quinsigamond, a fading industrial center in the heart of Massachusetts, and it’s going to tear this town apart. Lenore believes she can stop that from happening. A narcotics detective with a few addictions of her own—amphetamines and heavy metal, to name a couple—she loves nothing more than her gun, until she meets Dr. Frederick Woo, the linguist assisting her on the case. Together they can stop the drug—if it doesn’t take hold of them first.

How to Find Your Light of Ecstasy Within Billy Dugger,2010-10-14 How to Find Your Light of Ecstasy Within. In How to Find Your Light of Ecstasy Within, author Billy Dugger offers readers a new and very effective way to simply commune with God and get the answers you need. He explains in an everyday conversational style just how organic life actually got started on earth. This is totally different than the evolution theory or the idea that we were created instantly, as some believe. The book is in three separate sections and is 550 pages long. It also answers the three main questions: Where did you come from? Why are you here? Where are you going? The last section includes a very effective meditation technique that takes only a few seconds to use.
