Surveillance as Social Sorting David Lyon,2005-08-19 Surveillance happens to all of us, everyday, as we walk beneath street cameras, swipe cards, surf the net. Agencies are using increasingly sophisticated computer systems - especially searchable databases - to keep tabs on us at home, work and play. Once the word surveillance was reserved for police activities and intelligence gathering, now it is an unavoidable feature of everyday life. Surveillance as Social Sorting proposes that surveillance is not simply a contemporary threat to individual freedom, but that, more insidiously, it is a powerful means of creating and reinforcing long-term social differences. As practiced today, it is actually a form of social sorting - a means of verifying identities but also of assessing risks and assigning worth. Questions of how categories are constructed therefore become significant ethical and political questions. Bringing together contributions from North America and Europe, Surveillance as Social Sorting offers an innovative approach to the interaction between societies and their technologies. It looks at a number of examples in depth and will be an appropriate source of reference for a wide variety of courses.

Fargo Rock City Chuck Klosterman, 2007-11-01 Empirically proving that—no matter where you are—kids wanna rock, this is Chuck Klosterman's hilarious memoir of growing up as a shameless metalhead in Wyndmere, North Dakota (population: 498). With a voice like Ace Frehley's guitar, Klosterman hacks his way through hair-band history, beginning with that fateful day in 1983 when his older brother brought home Mötley Crüe's *Shout at the Devil*. The fifth-grade Chuck wasn't quite ready to rock—his hair was too short and his farm was too quiet—but he still found a way to bang his nappy little head. Before the journey was over, he would slow-dance to Poison, sleep innocently beneath satanic pentagrams, lust for Lita Ford, and get ridiculously intellectual about Guns N' Roses. C'mon and feel his noize.

Cash Machine Charges Great Britain. Parliament. House of Commons. Treasury Committee, 2005 About one third of ATMs now make direct charges to consumers, and in 2004 it is estimated that UK consumers paid £140 million in charges made whilst accessing funds through cash machines. The Committee's report examines the principle and increasing trend towards charging, the clarity of presentation of these charges to the consumer, the likely impact on financial exclusion and low-income households, and key areas for action from government, regulators and the industry. Findings include that although there has been an increase in free machines as well as charging machines, their location and the lack of transparency about which machines make charges hinders genuine competition and consumer choice. Recommendations include that there should be a clearer indication of the amount of surcharge on external signage with standardised labelling for all free and charging machines. The LINK network agreement needs to improve consumer representation and its enforcement mechanisms. The trend towards ATM charges should not be allowed to exacerbate existing financial exclusion, and the Government should ensure that the switch to direct payment of benefits does not disadvantage recipients in their access to cash.
