The Wonderful World of Birds - How to Make Friends With Our Feathered Friends John Davidson,Dueep J. Singh,2013-05-15 The Wonderful World of Birds - How to Make Friends With Our Feathered Friends Table of Contents Introduction Knowing More about the Birds around You - Fun Facts of the More Common Bird Species Blackbirds Sparrows Hawks Cranes Goldfinch Ducks Blue Jays Chickadees Egrets Vultures Falcons Gulls Finches Owls The Territorial Rights of Birds How to Make Bird Houses Different Styles of Bird Houses Special Birdhouse Plans for Different Bird Species Taking Care of Your Bird Pets Feeding Your Feathered Friends Starting A Bird Watching Club Conclusion Introduction Did you know that some of the birds which people believed would never ever be extinct because they were so numerous have disappeared in the 20th and the 21st century? The last passenger pigeon, which once covered the skies of North America, died in captivity in 1904. In the same manner, it took just five years to kill off all the vultures, the Kites, the Eagles and the house sparrow (Passer Domesticus) and many other birds once common in cities, in parts of the Indian subcontinent. Blame it all on pesticides and also humans encroaching the natural habitats of birds. So why should you be interested in the wonderful world of birds, you may ask? Well, it is a well-known fact that a number of bird species are disappearing from the face of the earth, just like the Great Auk and the dodo at the rate of 10- 25 per year. So what, you may say, after all, there are so many other birds to choose from. Just calculate. 25 species going extinct per year, never to make their appearance on earth again. At this rate, we are not going to see a living bird in the next 50 to 75 years. That is reality. There may come a generation, which may ask its grandparents, "what were those silly little creatures, you called birds? We can just hear their songs on audio. What were they like to look at?" And the grandparents trying desperately to describe the magic world of birds. Imagine a world without nightingales singing in Berkeley Square, bluebirds flying over the white cliffs of Dover, peacocks in purple adorning and other such songbirds disappearing from your windowsill, garden and lives. Imagine no bird nesting in your garden or waking you up to birdsong, bright and early in the morning. So if you begin to take an interest in birds, there is a chance that you may want to help save them and your children might grow up to be keen ornithologists.

Why Do Birds Suddenly Disappear? 200 birds, 12 months, 1 lapsed birdwatcher Lev Parikian,2018-05-17 At twelve years old, Lev Parikian was an avid birdwatcher. He was also a fraud, a liar and a cheat. Those lists of birds seen and ticked off? Lies. One hundred and thirty species? More like sixty. Then, when he turned fifty, he decided to right his childhood wrongs. He would go birdwatching again. He would not lie. He would aim to see two hundred species of British bird in a year. Why Do Birds Suddenly Disappear? is the story of that year, a story about birds, family, music, nostalgia, the nature of obsession and obsession with nature. It's about finding adventure in life when you twig it's shorter than you thought, and about losing and regaining contact with the sights, sounds and smells of the natural world. It's a book for anyone who has ever seen a small brown bird and wondered what it was, or tried to make sense of a world in which we can ask, 'What's that bird?' and 'What's for lunch?' and get the same answer.
