Lessons from the Mountain Mary McDonough, 2011-10-24 “[Not] the typical celebrity memoir . . . as much an account of her decades-long spiritual journey as it is a look back at her TV and movie career.” —Spiritual Pop Culture “Mary is a whole lot more than Erin on *The Waltons*. This book shows how she’s handled all the highs and lows with grace.” —George Clooney For nine seasons, Mary McDonough was part of one of the most beloved families in television history. Just ten years old when she was cast as the pretty, wholesome middle child Erin, Mary grew up on the set of *The Waltons*, alternately embracing and rebelling against her good-girl onscreen persona. Now, as the first cast member to write about her experiences on the classic series, she candidly recounts the joys and challenges of growing up Walton—from her overnight transformation from a normal kid in a working class, Irish Catholic family, to a Hollywood child star, to the personal challenges that led her to take on a new role as an activist for women’s body image issues. Touching, funny, sometimes heartbreaking, and always illuminating, *Lessons from the Mountain* is the story of everything Mary McDonough

learned on her journey over—and beyond—that famous mountain. Includes Never Before Published Bonus Chapter! “A fascinating look at what it’s like to grow up in front of and beyond the cameras.” —Eve Plumb “For someone who started out as a sweet little girl afraid to speak up, it certainly is a pleasure to hear her shout from the top of the mountain now!” —Alison Arnglim, New York Times bestselling author “[A] poignant memoir . . . the actress shares intimate, behind-the-scenes memories.” —Smashing Interviews Magazine

The Making of Goddess Durga in Bengal: Art, Heritage and the Public Samir Kumar

Das, Bishnupriya Basak, 2021-05-21 This book examines the making of the Goddess Durga both as an art and as part of the intangible heritage of Bengal. As the ‘original site of production’ of unbaked clay idols of the Hindu Goddess Durga and other Gods and Goddesses, Kumartuli remains at the centre of such art and heritage. The art and heritage of Kumartuli have been facing challenges in a rapidly globalizing world that demands constant redefinition of ‘art’ with the invasion of market forces and migration of idol makers. As such, the book includes chapters on the evolution of idols, iconographic

transformations, popular culture and how the public is constituted by the production and consumption of the works of art and heritage and finally the continuous shaping and reshaping of urban imaginaries and contestations over public space. It also investigates the caste group of Kumbhakars (Kumars or the idol makers), reflecting on the complex relation between inherited skill and artistry. Further, it explores how the social construction of art as ‘art’ introduces a tangled web of power asymmetries between ‘art’ and ‘craft’, between an ‘artist’ and an ‘artisan’, and between ‘appreciation’ and ‘consumption’, along with their implications for the articulation of market in particular and social relations in general. Since little has been written on this heritage hub beyond popular pamphlets, documents on town planning and travelogues, the book, written by authors from various fields, opens up cross-disciplinary conversations, situating itself at the interface between art history, sociology of aesthetics, politics and government, social history, cultural studies, social anthropology and archaeology. The book is aimed at a wide readership, including students, scholars, town planners, heritage preservationists, lawmakers and readers interested in heritage in general and Kumartuli in

particular.

Perception, Design and Ecology of the Built Environment Mainak Ghosh, 2020-01-24 This edited volume is a compilation of the 'built environment' in response to many investigations, analyses and sometimes mere observations of the various dialogues and interactions of the built, in context to its ecology, perception and design. The chapters concentrate on various independent issues, integrated as a holistic approach, both in terms of theoretical perspectives and practical approaches, predominantly focusing on the Global South. The book builds fabric knitting into the generic understanding of environment, perception and design encompassing 'different' attitudes and inspirations. This book is an important reference to topics concerning urbanism, urban developments and physical growth, and highlights new methodologies and practices. The book presumes an understanding unearthed from various dimensions and again woven back to a common theme, which emerges as the reader reads through. Various international experts of the respective fields working on the Global South contributed their latest research and insights to the different parts of the book. This

trans-disciplinary volume appeals to scientists, students and professionals in the fields of architecture, geography, planning, environmental sciences and many more.

Social and Economic Dimensions of Carrageenan Seaweed Farming Diego Valderrama, Junning Cai, Nathanaël Hishamunda, Neil B. Ridler, 2013 Carrageenan is a gelling agent extracted from red seaweeds and it has multiple applications in the food processing and other industries. Increasing demand for carrageenan has led to rapid expansion of carrageenan seaweed (primarily *Kappaphycus* and *Eucheuma*) farming in tropical areas. This expansion is expected to continue, but many issues need to be addressed to enable the sector to develop its full potential in contributing towards sustainable livelihoods, human development and social well-being. Including six country case studies and a global synthesis, this document provides a comprehensive and balanced assessment of the

economic, social and governance dimensions of carrageenan seaweed farming. Information and insights provided by this document should facilitate evidence-based decision-makings in both the public and private sectors.

In the Name of the Goddess Tapati Guha-Thakurta, 2015 Each year, Kolkata's Durga Puja scales new heights as the most spectacular and extravagant event in the city's calendar. From the turn of the twenty-first century, the festival has taken on a particular artistic dispensation that is unique to the contemporary city, demanding a new order of attention and analysis. Based on field-research conducted between 2002 and 2012, this book unravels the anatomy of this newly-conjured 'art' event, by tracking the new production processes, the mounting trends of publicity and sponsorship as well as the practices of mass spectatorship that make for the transformed visual culture of the festival. This new visual aesthetic, it is argued, has become the most important marker of the rapidly mutating identity of today's Durga Puja in Kolkata, bringing into the fray new categories of artists and designers,

new genres of public art, and new spaces for art production and reception in the city. The book's central concern lies in conceptualizing a specically contemporary and artistic history of the urban festival. In keeping with its title, the book examines the diversity of images and practices - from the consumerist spectacle and the bonanza of awards to the efflorescence of public installations and art and craft productions - that unfurls in this season 'in the name of the goddess'. While proling the Durga Pujas as Kolkata's biggest public art event, the book also addresses the ambivalence of the designations of 'art' and 'artist' in this eld of production and viewership. One of the main aims of this study has been to lay open the claims of 'art' in this festival both as a set of insistent projections as well as a mesh of incomplete formations. The new artistic nomenclature of the festival, it is shown, is not easily secured and has to struggle to assert itself within the body of the religious event and the ephemeral mass spectacle.

Foreign Direct Investment and Sustainable Development in International Investment Governance

United Nations Publications, 2020-04-13 Foreign direct investment (FDI) is a principal means of financing the 2030 Agenda for Sustainable Development and the corresponding 17 Sustainable Development Goals. FDI's potential contributions to sustainable development in Asia-Pacific can only be realized if the right conditions and policies are in place and if both the quantity and quality of FDI to, from, and within the region increase. This requires not only identifying and prioritizing FDI projects in key sustainable development sectors - such as renewable energy, education, health, water and sanitation, etc. - but also developing and operationalizing FDI policies and legal and regulatory frameworks at national and international levels that maximize the sustainable development potential of FDI in local economies. This publication sets explores the latter point further by focusing on two emerging and important issues related to international investment governance: sustainable development-orientation in international investment agreements (IIA) and the coherence between IIAs and national investment laws in Asia-Pacific. This publication comprises of three chapters. The first chapter sets the scene analyses recent FDI trends, both in terms of flows of inward and outward

investment as well as FDI policymaking and international investment governance; the second chapter provides an in depth analysis of the extent to which the bilateral investment treaties of Asia-Pacific least developed countries and landlocked developing countries are oriented towards sustainable development; and, the third and final chapter examines the extent of coherence between the IIA regimes and national frameworks for investment in Thailand and Viet Nam. The chapters in this publication offer promising signs that the momentum for and political will to reform the IIA regime to make it more sustainable development-oriented and coherent are picking up, and ESCAP stands ready to further support its member States in their efforts to achieve both.
