How Not to Build a Boat Jill Dickin Schinas, 2013-03-01 When their old GRP yacht was devastated by a Southern Ocean storm, Jill Schinas and her husband, Nick, resolved to build something stronger. Gaily, - and without having researched the matter to the least degree - they threw themselves into the work of designing and constructing the ultimate, ocean-proof, eco-friendly, dream cruising yacht. On their side they had a wealth of sailing experience, which provided a perfect knowledge of what was required, but their only other weapons were irrepressible enthusiasm and the mindset which enables a man to build a radio from a potato or a mast from a lamppost. Had this been a business enterprise no bank would ever have lent the capital, for ranged against the dreamers was a whole battery of forces any one of which would have deterred more realistic people. For a start, neither Jill or Nick had any experience with a welder - and yet they were proposing to build a steel boat. Secondly, they seemed only to have enough money to buy a couple of masts and the sails. Worst of all, they had two kids and a new baby in tow - and no one with a young family ought to attempt anything more ambitious than the washing up. Regardless of these drawbacks, Nick and Jill went ahead. It'll only take a year and a half, said he, confidently. Fifteen years down the line, Mollymawk is afloat and the family have cruised all over the Atlantic; but the boat is still not finished. This is the tale of what went wrong and what went right. Packed full of advice about such things as ocean-worthy design and sail plans, it will also tell you how to operate a cutting torch, how to avoid a leaky stern-gland, how to pour your own rigging sockets, how to handle a ferocious gander, how to sandblast, how to weld in mid-Atlantic, how to amuse three young children in a cabin space the size of a phone booth... and much, much more besides.

Humble Homes, Simple Shacks, Cozy Cottages, Ramshackle Retreats, Funky Forts Dr Derek Diedricksen, 2012-02-01 This Old House meets Wayne's World in this zany guide to designing and building tiny homes Derek Diedricksen has always had a love for small, modest houses ever since his father gave him the book *Tiny Tiny Houses* by Lester Walker for his tenth birthday. Combining his artistic abilities, wild imagination, and his passion for small houses, he self-published *Humble Homes, Simple Shacks, Cozy Cottages, Ramshackle Retreats, Funky Forts*, and *Whatever the Heck Else we could Squeeze in Here* in 2009. This book is a collection of Diedricksen's creative/imaginative sketches for building small houses, shacks, cottages, and forts. The sketches are accompanied

with hand-written commentary, both instructive and comical. Derek's main purpose is to get your creative juices flowing and encourage you to get off the couch and use your hands. Believing that specific building plans squash creativity, he avoids too many detailed instructions, giving you the chance to put your own creative spin on your very own small abode (even if it is just in your imagination).

*Shantyboat* Harlan Hubbard,1977-01-01 *Shantyboat* is the story of a leisurely journey down the Ohio and Mississippi rivers to New Orleans. For most people such a journey is the stuff that dreams are made of, but for Harlan and Anna Hubbard, it became a cherished reality. In their small river craft, the Hubbards became one with the flowing river and its changing weathers. This book mirrors a life that is simple and independent, strenuous at times, but joyous, with leisure for painting and music, for observation and contemplation.

*How to Build Wooden Boats* Edwin Monk,2012-08-02 Clear concise manual for amateurs offers detailed illustrated instructions for building 16 basic wooden craft – rowboats, sailboats, outboards, runabouts, hydroplane, more. 15 halftones. 49 line illustrations.

**Elements of Yacht Design** Norman L. Skene,2023-09-08 This book is intended to be a practical and concise presentation of some of the operations involved in designing yachts of all types. Cumbersome and impractical methods which are so often found in more pretentious works on naval architecture have been avoided. Those presented have been in everyday use by the author. Thus wrote Norman L. Skene in the preface to the fifth edition of *Elements of Yacht Design*. Skene's is one of the most famous books on yacht design ever written. First published in 1904, Skene did several revisions, the last of which was published in 1938 and is reprinted here in its original form. In 1962, the book was completely revised by Francis S. Kinney and republished as *Skene's Elements of Yacht Design*. Kinney's last version was published in 1973 and it is long out of print. While the experts are divided on the relative merits of the different editions, it appears that there is strong demand for Skene's original work. At last the book is again available to the many boatbuilders, aspiring naval architects, and sailors who need it for frequent reference. The index has been completely revised and expanded to make it more useful for today's readers.

A Unit of Water, A Unit of Time Douglas Whynott,2000-05 Six months after being diagnosed with cancer, Joel White, son of the legendary writer E.B. White, began designing the W-76, a wooden sailboat--his final masterpiece. This book offers a poignant depiction of a genius at work even as he faces his own mortality.

**The Cardboard Boat Book** ,2009 A step-by-step instruction manual on how to build a lightweight 'environmentally-friendly' boat with recyclable resources. The boats simply fold up from  $\frac{1}{4}$ " thick cardboard obtaining their strength from the geometry of the component parts. The boats are 8-feet long, weigh about 25-pounds, and can accommodate a 250-pound person without risking structural damage. Each boat is constructed with 21-pieces of cardboard that are used to make 7-component parts. The 7 parts are assembled together with 'environmentally-

friendly' contact cement and paper drywall tape. Once assembled the boats are sealed with an 'environmentally-friendly' water-based waterproof coating. No special tools are required and they are very simple to build. All of the materials used to build a boat are typically found at 'do-it-yourself' home improvement stores. The boats can be outfitted with 12-volt electric fishing motors, although they are typically propelled with traditional Kayak style paddles.

*Build the New Instant Boats* Harold H. Payson, Payson Harold, 1984-12 When Harold Payson - known to associates, friends, and his wife as Dynamite - began supplementing his boatbuilding work by selling boat plans, he got feedback from a number of customers who found the boats too difficult to build. Selling plans for boats that never got built went against Dynamite's Dow

*The Motorboat Book* Ed Sobey,2013-03-01 There's more than one way to power a toy boat. Electric motors, balloons, gears, water jets, belt drives, chemical reactions, steam, and even gravity can be used to propel a small ship across a pool. Also, the boats' propellers and paddles can be side-mounted or at the stern, or even sit above the waterline, like a fan-powered swamp boat. The Motorboat Book will show children how to build more than 20 different models through step-by-step instructions with clear photos. And if they'd rather travel under the water than over it, the book has 6 different submarine projects. In addition to the boatbuilding activities, author Ed Sobey includes instructions on how to build an &"ocean&" to test the boats, as well as accessories such as four different water pumps, waterproof battery and motor cases, and a working foghorn. Most of the boats are built from recycled and easy-to-find materials, but an appendix lists local and online sources for wire, plastic propellers, small motors, and more. Educators will appreciate the Meeting Science Standards summary at the end of the book.
