Model Racing Carlo Tonalezzi,2019-04-30 BUILD - RACE - WIN - REPEAT...The Rise & Fall of the Golden Years of Slot Car Racing Explained. Text includes articles from the main magazines of the period. Also includes a Worldwide Racing Directory, listing active slot car raceways from different countries in 5 continents...! By 1966, model-car racing was so popular that it threatened to replace bowling as the nation's favorite indoor sport. For as grand as the outcome, the force that propelled slot-car racing into a national pastime was a simple one: the realism of the original slot cars. The builders and racers of these models knew that the quest for speed should not come at the cost of the way a car looked. Their design was at the heart of their very integrity. In this new effort, author, researcher and slot-car racer Carlo Tonalezzi charts the meteoric rise of this hobby-sport and photographs classic model racing cars in their natural habitat: The commercial racing tracks. Models made by Russkit, AMT, COX, MPC, Monogram, and more are captured on vintage tracks from the American Model Car Raceways. These realistic beauties were made during the Golden Years of Model Racing. True pieces of Americana, they are today as magnificent as ever. Read all about what really happened during this exciting period of model racing bliss!

The Routledge History of Modern Latin American Migration Andreas E. Feldmann,Xochitl Bada,Jorge Durand,Stephanie Schütze,2022-10-26 The Routledge History of Modern Latin American Migration offers a systematic account of population movements to and from the region over the last 150 years, spanning from the massive transoceanic migration of the 1870s to contemporary intraregional and transnational movements. The volume introduces the migratory trajectories of Latin American populations as a complex web of transnational movements linking origin, transit, and receiving countries. It showcases the historical mobility dynamics of different national groups including Arab, Asian, African, European, and indigenous migration and their divergent international trajectories within existing migration systems in the Western Hemisphere, including South America, the Caribbean, and Mesoamerica. The contributors explore some of the main causes for migration, including wars, economic dislocation, social immobility, environmental degradation, repression, and violence. Multiple case studies address critical contemporary topics such as the Venezuelan exodus, Central American migrant caravans, environmental migration, indigenous and gender migration, migrant religiosity, transit and return migration, urban labor markets, internal displacement, the nexus between organized crime and forced migration, the role of social media and new communication technologies, and the effects of the COVID-19 pandemic on movement. These essays provide a comprehensive map of the historical evolution of migration in Latin America and contribute to define future challenges in migration studies in the region. This book will be of interest to scholars of Latin American and Migration Studies in the disciplines of history, sociology, political science, anthropology, and geography.
