Jan E. Dizard

Mortal Stakes Jan E. Dizard, 2003 An introduction to hunting including who hunts, how they compare socially and politically with nonhunters, and how they see themselves and are seen by others.

The Middling Sort Margaret R. Hunt, 2023-12-22 To be one of the middling sort in urban England in the late seventeenth or eighteenth century was to live a life tied, one way or another, to the world of commerce. In a lively study that combines narrative and alternately poignant and hilarious anecdotes with convincing analysis, Margaret R. Hunt offers a view of middling society during the hundred years that separated the Glorious Revolution from the factory age. Thanks to her exploration of many family papers and court records, Hunt is able to examine what people thought, felt, and valued. She finds that early capitalism and early modern family life were far more insecure than their classical models supposed. Commercial needs and social needs coincided to a large extent. The family is central to Hunt's story, and she shows how financial struggles brought conflict, ambiguity, and tension to the home. She investigates the way gender intertwined with class and family hierarchy and the way many businesses survived as precarious successes, secured through the sacrifices made by female as well as male family members. *The Middling Sort* offers a dynamic portrait of a society struggling to minimize the considerable social and psychic dislocation that accompanied England's launch of a full-scale market economy.

Hunting with the Twenty-Two Charles Singer Landis, 2016-01-26 The perfect rifle for hunting small game and varmints in settled and semi-settled agricultural and grazing districts should be quiet, safe to shoot there and inexpensive; and, owing to the small size of the vital areas of most of such game, should be superlatively accurate. Its bullet should, whenever possible, either expand and remain in the game, or destroy itself completely upon impact with earth, sod, stones or rock. It should kill well, yet not cause needless mangling or suffering. The .22 caliber rifle, both in the rim fire and in the flatter-shooting center fire, gives the least report, throws the lightest and smallest projectile, is among the most accurate of all calibers, and is the least expensive to shoot. In the .22 long rifle caliber, it is also the easiest to supply with factory ammunition, which can be purchased at nearly any village hardware store. In center fire, it is cheap to reload, has very light recoil, and causes but little annoyance to farmers and stock raisers. In Eastern farming or estate country, the .22 caliber, both rim and center fire, is the quietest and yet the most effective of all our rifle calibers for either field or woods hunting of small game. In short, from the thoroughly practical standpoint of being usable where any sort of rifled firearm may be shot, it has more advantages and fewer disadvantages than any other caliber. Further, the use of a .22 caliber rifle in the field or in the forests is much like the use of a 20 gauge shotgun on quail or a fine fly rod to dangle dry flies before trout or small mouth black bass. It is the equipment of the man of appreciation and discernment who wishes to develop and depend upon skill rather than upon force and smashing power. After all, most of us go hunting for sport. We wish to enjoy ourselves to the full while gunning, consequently we do not wish to be stopped, neither do most of us wish to annoy landowners. Nevertheless, we need a weapon of precision, great mechanical refinement, X-ring accuracy, and yet which is of a type which appeals to those who have substituted skill and ability in hunting and

shooting for the 30 killing pattern of the 12 gauge shotgun. The real story of what has been done, can be done, and what you can do if properly equipped and instructed and shooting a splendidly accurate, properly sighted, precision-built .22 caliber rifle in field and forest has never been adequately told in a book exclusively devoted to hunting and shooting small game and varmints with .22 caliber rifles. The author went into this as much as space permitted in 1931 in ".22 Caliber Rifle Shooting," but that work is now out of print, the issue having become exhausted. This book, by text and illustration, covers the subject. It is in no part a work of fiction. The shooting related in this book actually occurred. It tells you exactly how to hunt successfully, and to shoot each common variety of North American small game and varmints, where to find them, how to locate and hunt them, and gives numerous examples of rifles and cartridges which produced unusual results. For the youth or the man with his first .22 caliber rifle, for the small bore target shot who has enjoyed only one-half of an experience with a .22 rifle (the remaining half to be found afield), and for the crank rifleman, reloader, small bore ballistics shark and experimenter, this book is a must. Read this work in the spirit in which it was written, that of sportsmen writing one to another; of old timers in the game of field shooting giving their experiences, their hunting lore, their ammunition developments, their misses and their long range hits. This is the book for any small game and varmint hunter who has a rifle and wants to use it more successfully. If you can read this work without learning anything about hunting with the small caliber rifle, you certainly know game shooting with the .22 rifle. May it bring you many happy days in the field.

Advanced Hunting on Deer and Elk Trails Francis E. Sell, 2017-09-15

Successful deer and elk hunting goes far beyond luck, it is dependent for the most part upon knowledge and procedure. The man who takes his hunting seriously will be fascinated by the techniques and thinking of the perfectionist, Francis E. Sell. In his first book, *The American Deer hunter*, the author thoroughly grounds the student of hunting practices in fundamentals. *Advanced Hunting*, his second book on the subject, is a postgraduate course, detailing the many refinements which all add up to more action and greater interest. There is not a hunter alive, no matter how broad his experience, who would not glean much from this volume. It will have a tremendous influence on the young enthusiast as a guide to his approach, his attitude, his trend of thought. The book contains the sort of information which should be read and even studied on occasion by every analytical hunter. Some of the pertinent subject matter includes: game highways, trail watching, sign reading, habits, food preference, noise and weather, woodland tattletales, woods ranging, shooting ranges, treatment of bagged game and all phases of equipment including: guns, ammunition, binoculars, sportswear and camping necessities.

Hunting Game Helene Tursten, 2019-02-26 Helene Tursten's explosive new series features Detective Inspector Embla Nyström, a sharp, unforgiving woman working in a man's world. When one of her peers is murdered during a routine hunting trip, Embla must track down the killer while confronting a dark

incident from her past. Twenty-eight-year-old Embla Nyström has been plagued by chronic nightmares and racing thoughts ever since she can remember. She has learned to channel most of her anxious energy into her position as Detective Inspector in the mobile unit in Gothenburg, Sweden, and into sports. A talented hunter and prizewinning Nordic welterweight, she is glad to be taking a vacation from her high-stress job to attend the annual moose hunt with her family and friends. But when Embla arrives at her uncle's cabin in rural Dalsland, she sees an unfamiliar face has joined the group: Peter, enigmatic, attractive, and newly divorced. And she isn't the only one to notice. One longtime member of the hunt doesn't welcome the presence of an outsider and is quick to point out that with Peter, the group's number reaches thirteen, a bad omen for the week. Sure enough, a string of unsettling incidents follow, culminating in the disappearance of two hunters. Embla takes charge of the search, and they soon find one of the missing men floating facedown in the nearby lake. With the help of local reinforcements, Embla delves into the dark pasts of her fellow hunters in search of a killer.

A Life Afield A. Hunter Smith, 2014-12-01 In *A Life Afield*, A. Hunter Smith welcomes readers to sit by his fireside as he recounts twelve evocative tales from his extensive experience as a hunter and hunting guide. Though Smith could draw from some 350 years of ancestral sportsman stories, he instead describes his own successes and mishaps with an intimacy that captivates audiences. Through his narratives Smith shares his philosophy on hunting and rambling in the outdoors and questions what it means to be a true sportsman in today's Deep South. As his stories make clear, the South's outdoor heritage has changed drastically within the last twenty-five years or more. The beauty and majesty of the natural world, as well as the principles of honor, integrity, and humanity found within circles of sportsmen, are seemingly no longer reward enough for the sporting world of today. As Smith would argue, many of the age-old and time-proven wisdoms of woodsmanship are in danger of being forgotten or dismissed by a new era of "immediate reward" for minimal effort. *A Life Afield* reminds readers what it means to be a woodsman: to hold the woods and waters deep within one's heart. Taken as a whole, the collection chronicles the author's quest to adulthood, influenced by his outdoor adventures and friendships, while also subtly providing solid lessons in sporting ethics, gun safety, and general woodsmanship. *A Life Afield* includes a foreword by Ellison D. Smith, IV, an environmental attorney and brother of the author.

Hunting in Florida in 1874 J. W. P. Jenks, 2015-06-13 Excerpt from *Hunting in Florida in 1874* Though a native of Massachusetts, it was my fortune, at the age of thirteen, to enjoy squirrel, opossum and fox hunting in interior Virginia; at nineteen, deer, 'coon and bear chasing in southwestern Georgia; at twenty-five, plover, duck and hawk shooting in southeastern New England; at forty, a sight of wild chamois in the high Alps, and at fifty-five, a camp life of fifty consecutive days in the miasmatic swamps and everglades around

Lake Okechobee in southern Florida. The object of this narrative is to give a detailed account of this latter experience in the most forbidding of all wild regions; but to the naturalist a perfect elysium. The mention of Florida suggests the invalid, but should not in the case of myself or my three companions, the one an experienced collector of forty, inured to all the hardships of camp life, and recognized by naturalists as Doctor P., and the other two, youths of eighteen, inexperienced, but enthusiastic, whom we will call Erwin and Fred. For hunting-dress outfit, I was provided with a suit of sail-cloth, colored yellowish-brown or butternut, to resemble dead leaves, the sack-coat prepared with ten pockets, besides one, full size of the skirt, for large specimens, the pants with six pockets, two blue flannel shirts, with inside pockets for watch, money and photographs, all wrapped in oil silk bags, (carefully keeping paper money from contact with the oil silk surface, by first enclosing it in an envelope,) military boots and brogans, and four pair of thick woolen socks. Any sort of vest is an incumbrance on hunting excursions. A huswife well provided with sewing materials, extra buttons, pieces of cloth in variety for mending garments and dressing wounds, was not omitted.
