Stuart B. Schwartz

Tropical Cyclones of the North Atlantic Ocean George W. Cry, United States. Weather Bureau, 1965

The Hurricane Roger A Pielke, 2013-12-19 First published in 1990, this book describes the nature of the hurricane, one of the world's most dangerous weather hazards. It examines the formation, development, movement, and impact of these tropical cyclones, and assess the ability of science to describe, forecast, and control them.

Sea of Storms Stuart B. Schwartz, 2016-07-26 A panoramic social history of hurricanes in the Caribbean The diverse cultures of the Caribbean have been shaped as much by hurricanes as they have by diplomacy, commerce, or the legacy of colonial rule. In this panoramic work of social history, Stuart Schwartz examines how Caribbean societies have responded to the dangers of hurricanes, and how these destructive storms have influenced the region's history, from the rise of plantations, to slavery and its abolition, to migrations, racial conflict, and war. Taking readers from the voyages of Columbus to the devastation of Hurricane Katrina, Schwartz looks at the ethical, political, and economic challenges that hurricanes posed to the Caribbean's indigenous populations and the different European peoples who ventured to the New World to exploit its riches. He describes how the United States provided the model for responding to environmental threats when it emerged as a major power and began to exert its influence over the Caribbean in the nineteenth century, and how the region's governments came to assume greater responsibilities for prevention and relief, efforts that by the end of the twentieth century were being questioned by free-market neoliberals. Schwartz sheds light on catastrophes like Katrina by framing them within a long and contentious history of human interaction with the natural world. Spanning more than five centuries and drawing on extensive archival research in Europe and the Americas, *Sea of Storms* emphasizes the continuing role of race, social inequality, and economic ideology in the shaping of our responses to natural disaster.

North Carolina's Hurricane History Jay Barnes, 2001 An illustrated history of more than 50 great storms that have pounded the Tar Heel state from the days of the first European explorers through to 1999's devastating hurricane Floyd, which caused six billion dollars in damages. Newspaper reports, eye-witness accounts and weather records are used.

The Great Hurricane, 1938 Cherie Burns, 2007-12-01 "Before there was the Perfect Storm, there was the Great Hurricane of 1938. A riveting and wonderfully written account." –Nathaniel Philbrick On the night of September 21, 1938, news on the radio was full of the invasion of Czechoslovakia. There was no mention of any severe weather. By the time oceanfront residents noticed an ominous color in the sky, it was too late to escape. In an age before warning systems and the ubiquity of television, this unprecedented storm caught the Northeast off guard, obliterated coastal communities on Long Island and in New England, and killed nearly seven hundred people. The Great Hurricane, 1938 is a spellbinding hour-by-hour reconstruction of one of the most destructive and powerful storms ever to hit the United States. With riveting detail, Burns weaves together countless personal stories of loved ones lost and lives changed forever—from those of the Moore family, washed to sea on a raft formerly their attic floor, to Katharine Hepburn, holed up in her Connecticut mansion, watching her car take to the air like a bit of paper. "A very good book." –The Washington Post

Hurricane Watch Jack Williams, Bob Sheets, 2002-02-05 The ultimate guide to the ultimate storms, Hurricane Watch is a fascinating blend of science and history from one of the world's foremost meteorologists and an award-winning science journalist. This in-depth look at these awe-inspiring acts of nature covers everything from the earliest efforts by seafarers at predicting storms to the way satellite imaging is revolutionizing hurricane forecasting. It reveals the latest information on hurricanes: their effects on ocean waves, the causes of the variable wind speeds in different parts of the storm, and the origins of the super-cooled shafts of water that vent at high altitudes. Hurricane Watch is a compelling history of man's relationship with the deadliest storms on earth. Includes: - The story of the nineteenth-century Cuban Jesuit whose success at predicting the great cyclones was considered almost mystical. - A new look at Isaac Cline, whose infamous failure to predict the Galveston Hurricane left him obsessed with the devastating effects of storm surge. - The story of the Hurricane Hunters, including the first man ever to deliberately fly into a hurricane. - A complete account of how computer modeling has changed hurricane tracking. - A history of Project Stormfury: the only significant, organized effort to reduce the damaging strength of severe hurricanes. - A unique firsthand account of Hurricane Andrew by both authors, who were at the National Hurricane Center when Andrew struck. - A listing of the deadliest storms in history.

Hurricane Andrew Kristine Harper, 2005 Details the course and effect of Hurricane Andrew, which hit the southeastern United States in 1992, and describes the recovery efforts that followed the storm.

After the Hurricanes United States. Congress. House. Committee on the Budget, 2005

Lowcountry Hurricanes Walter J. Fraser, Jr., 2009-03-01 At once sobering and thrilling, this illustrated history recounts how, for the past three hundred years, hurricanes have altered lives and landscapes along the Georgia-South Carolina seaboard. A prime target for the fierce storms that develop in the Atlantic, the region is especially vulnerable because of its shallow, gradually sloping sea floor and low-lying coastline. With an eye on both natural and built environments, Fraser's narrative ranges from the first documented storm in 1686 to recent times in describing how the lowcountry has endured some of the severest effects of wind and water. This chronology of the most notable lowcountry storms is also a useful primer on the basics of hurricane dynamics. Fraser tells how the 800-ton *Rising Sun* foundered in open water near Charles Town during the hurricane of 1700. About one hundred persons were aboard. All perished. Drawing on eyewitness accounts, he describes the storm surge of an 1804 hurricane that submerged most of Tybee Island and swept over the fort on nearby Cockspur Island, drowning soldiers and civilians. Readers may have their own memories of Hurricanes Andrew, Opal, and Hugo. Although hurricanes frequently lead to significant loss of life, Fraser recounts numerous gripping instances of survival and rescue at sea and ashore. The author smoothly weaves the lowcountry's long social, political, and economic history with firsthand reports and data accumulated by the National Weather Service and the National Oceanic and Atmospheric Administration. Generously illustrated with contemporary and historical photographs, this is a readable and informative resource on one of nature's most awesome forces.

The Galveston Hurricane Kristine Brennan, 2002 An account of the tragic Galveston hurricane of 1900 that claimed

over six thousand lives.

Characteristics of the Hurricane Storm Surge D. Lee Harris,United States. Weather Bureau,1963 Because of this lack of basic data, theoretical research has been largely restricted to calculations based on unverified postulates concerning the phenomena involved and on attempts to evaluate them by the available empirical data. Although studies of this kind have led to a better understanding of the phenomena, they have not led to the development of any outstandingly successful prediction systems.

Hurricanes Dorothy M. Souza,1996 Describes the characteristics of hurricanes and explains methods of monitoring, forecasting, predicting, and tracking storms

The Hurricane Roger A Pielke,2013-12-19 First published in 1990, this book describes the nature of the hurricane, one of the world's most dangerous weather hazards. It examines the formation, development, movement, and impact of these tropical cyclones, and assess the ability of science to describe, forecast, and control them.

Lists of North Carolina Hurricanes ,
Fifteen Hurricanes That Changed the Carolinas Jay Barnes,2022-03-16 This informative and engaging book tells the true stories of the hurricanes that had the greatest impact on North Carolina and South Carolina, from the eighteenth century to the present day. Hurricane historian Jay Barnes offers an illuminating and compelling account of the Carolinas' most recent storm disasters, Matthew and Florence, as well as thirteen other memorable hurricanes in the Tar Heel and Palmetto States, including Hazel, Hugo, Fran, and Floyd. In Barnes's hands, the examination of these powerful tropical cyclones leads to a broader view of the history of the Carolinas, revealing not only their terrifying and deadly consequences but also the perseverance of the region's people in the face of such extraordinary disasters. In recounting the rich hurricane history of the Carolinas, from the mountains to the coast, Barnes urges readers to consider the storms to come and profiles how a warming planet and rising seas will affect future Carolina hurricanes.

The Great Hurricanes of North Carolina John Hairr,2008-05-09 From the horrific Independence Hurricane of 1775, the most lethal storm to strike its coast, to the ruinous Hugo in September 1989, a path has been cut along the shores of the Tarheel State-a path not easily forgotten. Engagingly written and illustrated with historical photos that graphically depict the disastrous effects of these mighty storms, this book is a gripping read!

Hurricanes and the Middle Atlantic States Rick Schwartz,2007 This reference traces the region's 400-year recorded hurricane history, from Jamestown to the present, drawing on accounts in newspaper articles, books, private journals, and interviews. Emphasizing the human side of a hurricane's aftermath rather than scientific aspects, each hurricane account tells how individuals and communities reacted to the storms. Storms are profiled in year-by-year entries from the 1600's to the current century.

Hurricane Destruction in South Carolina Tom Rubillo,2006-06-01 In late September 1989, South Carolina was rocked by the colossal force of Hurricane Hugo. A category four hurricane, Hugo devastated the coast and other regions of the state, claiming dozens of lives and causing billions of dollars in damage. Hugo was the Palmetto State's most destructive natural disaster in recent memory, but the story of that storm is only part of the larger history of hurricanes in South Carolina. A History of Hurricane Destruction in South Carolina: Hell and High Water examines more than thirty major hurricanes that have struck the state since the 1800s, offering a revealing look at the destruction and loss that results from these violent manifestations of nature's power. Author Tom Rubillo brings to bear a breadth of research and incorporates first-person accounts of the storms and the struggle of survivors forced to rebuild in the wake of tremendous losses. Hell and High Water is at once a history of the damage wrought by the fury of hurricanes and a reminder that the next great storm could be no more than a season away.
