A Hybrid Theory of Metaphor M. Tendahl,2009-08-27 A provoking new approach to how we understand metaphors thoroughly comparing and contrasting the claims made by relevance theorists and cognitive linguists. The resulting hybrid theory shows the complementarity of many positions as well as the need and possibility of achieving a broader and more realistic theory of our understanding.

The Xenon Tech Archives File 2: The Hybrid Theory Ashley M Jackson,2019-01-30 Xenon Technologies; the lab that started everything. The lab that created CHEM, and the first companion humanoids. The lab that, according to my dream, created Salem. The lab that was the scene of a buried massacre. Captain Scarlet and his team have moved forward in sheer faith of their mission. Though something uncovered lurks in the shadows, unknowingly jeopardizing their entire mission.

One Step Closer Jeff Blue,2020-12-08 From the unique perspective of the executive who discovered them, One Step Closer reveals how Brad Delson's college internship was a catalyst for a group of young musical visionaries, led by Mike Shinoda, which gave rise to a band that survived countless rejections, exceeded everyone's expectations but their own, and became the voice of a generation. This against-all-odds story chronicles the early days of Linkin Park, from their first demo and Whisky a Go Go performance as Xero, through their tireless efforts to perfect their iconic sound and the discovery of Chester Bennington. Jeff Blue was there when no one else believed—first as their publisher, then as their A&R guy. This is his memoir of that incredible journey. Riveting and inspiring, One Step Closer is a testament to perseverance, as well as a detailed behind-the-scenes account of the building of a dream and what it takes to make it.

THE HYBRID GRAND UNIFIED THEORY E. Escultura,V. Lakshmikantham,2009-03-01 In this book, an attempt is made to provide a hybrid grand unified theory to understand the universe, both in its micro/quantum aspects as well as macro/galactic aspects. The book describes a truly hybrid theory as it encompasses both the modern and ancient theories of the universe, together with its functioning at all levels of human comprehension. One of its authors, Dr Escultura, was nominated in 2005 for a Nobel Prize for his flux theory of gravitation. From then on this theory has been improved, clarified and is now known as the hybrid grand unified theory. This book deals with this new bold theory, unifying mathematics and physics, and answering some open fundamental questions and paradoxes in these disciplines. The book also describes what the ancient scientists knew about these matters.

Hybrid Theory Penn Cassidy,2021-06-07 I'm changing... From the inside out I'm changing and I can't stop it. Who I was, who I thought I could be... It's all gone now. A single moment was all it took to shatter everything I thought I knew about myself. A single moment was all it took to make me the most wanted woman in the world. This is the third and final book in the Noc City Trilogy. Reader beware, heavy triggers, sexual content and severe language may not be suitable for everyone. This version has the original cover art.

Noc City (The Complete Trilogy) Penn Cassidy,2021-06-15 The Complete Noc

City Trilogy - Special Edition! Book 1 Noc City Book 2 Blood Moon Book 3 Hybrid Theory Book 1 Noc City They call me the Angel of Noc City, but it's all a lie. The cameras see what they want to see as my father spins half truths and dangerous propaganda. Darklings are dangerous. Monstrous. Unholy. They're a threat to humans everywhere, and they need to be destroyed, despite the decades of peace. But what happens when Noc City's poster girl discovers she's one of the monsters they fear? I can tell you what happens. Chaos. Fear. War. I thought death was my only way out. Sweet, dark oblivion. But I was wrong. The way out might just be through a room of chains, blood, and cravings...of sex, pain, and betrayal. My way out of this hell might rest in the hands of the most dangerous creatures Noc City's ever known. Book 1 Blood Moon I've been beaten... I've been humiliated... I've been shackled... I've peered behind the masks and uncovered a world of secrets and evil I never knew existed, and now it's time to choose my side. These men are ruthless, powerful leaders who have seen things I could only dream of. They're cunning, sinister and too alluring for their own good. I've gone from captive to complicit in a matter of weeks, and they're each tempting the darkest parts of myself I've hidden for so long now. I know what needs to be done. Even if it means jumping right back into the snake pit. I'm a darkling, after all, and I'll fight tooth and claw to bring justice to my kind. All bets are off because I'm out for blood. Book 3 Hybrid Theory I'm changing... From the inside out I'm changing and I can't stop it. Who I was, who I thought I could be... It's all gone now. A single moment was all it took to shatter everything I thought I knew about myself. A single moment was all it took to make me the most wanted woman in the world. This is a DARK reverse harem series with a LOT of blood, MMF, and swears, not to mention references to suicide, abuse, and trauma. 18+ due to graphic violence and sexual situations.

Arguments, Stories and Criminal Evidence Floris J. Bex, 2011-02-15 In this book a theory of reasoning with evidence in the context of criminal cases is developed. The main subject of this study is not the law of evidence but rather the rational process of proof, which involves constructing, testing and justifying scenarios about what happened using evidence and commonsense knowledge. A central theme in the book is the analysis of one's reasoning, so that complex patterns are made more explicit and clear. This analysis uses stories about what happened and arguments to anchor these stories in evidence. Thus the argumentative and the narrative approaches from the research in legal philosophy and legal psychology are combined. Because the book describes its subjects in both an informal and a formal style, it is relevant for scholars in legal philosophy, AI, logic and argumentation theory. The book can also appeal to practitioners in the investigative and legal professions, who are interested in the ways in which they can and should reason with evidence.

Hybrid Logic and its Proof-Theory Torben Braüner, 2010-11-17 This is the first book-length treatment of hybrid logic and its proof-theory. Hybrid logic is an extension of ordinary modal logic which allows explicit reference to individual points in a model (where the points represent times, possible worlds, states in a computer, or something else). This is useful for many applications, for example when reasoning about time one often wants to formulate a series of statements about what happens at specific times. There is little consensus about proof-theory for ordinary modal logic. Many modal-logical proof systems lack important properties and the relationships between proof systems for different modal logics are often unclear. In the present book we demonstrate that hybrid-logical proof-theory remedies these deficiencies by giving a spectrum of well-behaved proof systems (natural deduction, Gentzen, tableau, and axiom systems) for a spectrum of different hybrid logics (propositional, first-order, intensional first-order, and intuitionistic).

Hybrid Simulation Victor Saouma, Mettupalayam Sivaselvan, 2014-04-21 Hybrid Simulation deals with a rapidly evolving technology combining computer simulation (typically finite element) and physical laboratory testing of two complementary substructures. It is a cost effective alternative to shaking table test, and allows for the improved understanding of complex coupled systems. Traditionally, numerical simulation an

The Philosophy of Well-Being Guy Fletcher, 2016-04-14 Well-being occupies a central role in ethics and political philosophy, including in major theories such as utilitarianism. It also extends far beyond philosophy: recent studies into the science and psychology of well-being have propelled the topic to centre stage, and governments spend millions on promoting it. We are encouraged to adopt modes of thinking and behaviour that support individual well-being or 'wellness'. What is well-being? Which theories of well-being are most plausible? In this rigorous and comprehensive introduction to the topic, Guy Fletcher unpacks and assesses these questions and many more, including: Are pleasure and pain the only things that affect well-being? Is desire-fulfilment the only thing that makes our lives go well? Can something be good for someone who does not desire it? Is well-being fundamentally connected to a distinctive human nature? Is happiness all that makes our lives go well? Is death necessarily bad for us? How is the well-being of a whole life related to well-being at particular times? Annotated further reading and study and comprehension questions follow each chapter, and a glossary of key terms is also included, making *The Philosophy of Well-Being* essential reading for students of ethics and political philosophy. This title is also suitable for those in related disciplines such as psychology, politics and sociology.

Handbook of Hybrid Systems Control Jan Lunze, Françoise Lamnabhi-Lagarrigue, 2009-10-15 Sets out core theory and reviews new methods and applications to show how hybrid systems can be modelled and understood.

Having it Both Ways Guy Fletcher, Michael R. Ridge, 2014 The two main competing traditions in mainstream metaethics are cognitivism and non-cognitivism. The traditional view of this divide is that the cognitivist understands moral (and other normative) judgments as representational states (e.g. beliefs) whereas the non-cognitivist understands them instead as non-

representational states - typically as desire-like states of some kind (e.g. emotions, plans, preferences). Because moral and other normative judgments genuinely do seem to have both belief-like and desire-like elements, this debate has seen each side going through seemingly endless epicycles to either accommodate or debunk what the other side explains easily. Recently, there has been an explosion of interest in theories which transcend these categories by holding that moral and other normative judgments are themselves constituted by both belief-like and desire-like elements and/or that moral and other normative judgments 'express' both belief-like and desire-like states. These are called hybrid theories. The papers in this volume, all new, both provide a guide to the state of the art in this debate and push it forward along numerous fronts--

Noncognitivism in Ethics Mark Schroeder, 2010-04-05 According to noncognitivists, when we say that stealing is wrong, what we are doing is more like venting our feelings about stealing or encouraging one another not to steal, than like stating facts about morality. These ideas challenge the core not only of much thinking about morality and metaethics, but also of much philosophical thought about language and meaning. *Noncognitivism in Ethics* is an outstanding introduction to these theories, ranging from their early history through the latest contemporary developments. Beginning with a general introduction to metaethics, Mark Schroeder introduces and assesses three principal kinds of noncognitivist theory: the speech-act theories of Ayer, Stevenson, and Hare, the expressivist theories of Blackburn and Gibbard, and hybrid theories. He pays particular attention both to the philosophical problems about what moral facts could be about or how they could matter which noncognitivism seeks to solve, and to the deep problems that it faces, including the task of explaining both the nature of moral thought and the complexity of moral attitudes, and the 'Frege-Geach' problem. Schroeder makes even the most difficult material accessible by offering crucial background along the way. Also included are exercises at the end of each chapter, chapter summaries, and a glossary of technical terms - making *Noncognitivism in Ethics* essential reading for all students of ethics and metaethics.

Coupling Between a Center-driven Dipole and Parasitic Elements of Different Lengths Charles J. Drane, 1974 Formulas are derived as approximate representations for the current and charge distributions along the elements of a linear array of parallel, nonstaggered cylindrical wires of generally unequal length. One element is a center-driven dipole electromagnetically coupled to the other elements, which are parasitic. These formulas are derived in extension of the well-known King-Wu three-term theory. As such, they represent an improvement--particularly for the charge distributions, which often vary so rapidly near the driving point of the driven element that they cannot be handled by the simpler trigonometric terms of the three-term theory. As in the three-term theory, there are only three unknown coefficients to be evaluated for each antenna element. (Modified author abstract).

Without Trimmings Mark McBride, Visa A. J. Kurki, Visa Aj Kurki, 2022 Professor Matthew Kramer is one of the most important legal philosophers of our time - even if the label 'legal philosopher' does not do justice to the breadth of his work. This collection of essays brings together esteemed philosophers, as well as junior scholars, to critically assess Kramer's

philosophy. The contributions focus on Kramer's work on legal philosophy, metaethics, normative ethics, and political philosophy. The volume is divided into six parts, each focusing on different aspect of Kramer's work. The first part, Rights and Right-holding, contains five essays addressing Kramer's work on rights and right-holding, including the Hohfeldian analysis and the interest theory of right-holding. The four essays in the second part, General Jurisprudence, focus on Kramer's work in general jurisprudence, from the compatibility of legal positivism with universal legal error, to his robust defense of inclusive legal positivism, concluding with reflections on his writings on the rule of law. The third part, General Matters of Ethics, contains two essays addressing Kramer's metaethical work on moral realism as a moral doctrine. The fourth and fifth parts, Freedom and Liberalism, have four essays falling within political philosophy, probing Kramer's work on negative freedom and political liberalism, respectively. The sixth part, Applied Ethics, contains two essays on Kramer's work on capital punishment and freedom of expression. The collection is rounded off by reflections on, and replies to, the contributions by Kramer himself.

The Theory and Practice of Recognition Onni Hirvonen, Heikki J.

Koskinen, 2022-09-23 This volume presents new essays on the theory and practice of recognition. In order to retain its overall plausibility as a critical social theory, contemporary recognition theory needs to be able to successfully combine theory with real-life perspectives, in both contemporary and historical contexts. Contemporary recognition theory has developed into an established and active multidisciplinary research programme. The chapters in this volume have two main purposes. First, they engage in theoretical development of the contemporary theories of recognition. They explore the conceptual histories and the environments of recognition, as well as the connection between recognition and authenticity, emancipation, and social ontology. Second, they connect the theoretical insights of contemporary recognition with analyses of contemporary and historical social practices. These contributions explore themes such as populism and polarization, models of harmful invisibilization and social ignorance, the problem of evil and suffering, and social justice phenomena such as the #MeToo movement. The Theory and Practice of Recognition will be of interest to scholars and advanced students working in social and political philosophy, social ontology, political theory, and sociology.
