A Hybrid Theory of Metaphor M. Tendahl,2009-08-27 A provoking new approach to how we understand metaphors thoroughly comparing and contrasting the claims made by relevance theorists and cognitive linguists. The resulting hybrid theory shows the complementarity of many positions as well as the need and possibility of achieving a broader and more realistic theory of our understanding.

Expressing Our Attitudes Mark Schroeder,2015-08-27 When the logical positivists espoused emotivism as a theory of moral discourse, they assumed that their general theories of meaning could be straightforwardly applied to the subject of metaethics. The philosophical research program of expressivism, emotivism's contemporary heir, has called this assumption into question. In this volume Mark Schroeder argues that the only plausible ways of developing expressivism or similar views require us to re-think what we may have thought that we knew about propositions, truth, and the nature of attitudes like belief and desire. Informed by detailed scrutiny of the structural problems about understanding complex thoughts, he develops a range of alternative expressivist frameworks in detail as illustrations of general lessons, and applies them not just to metaethics, but to epistemic expressions and even to truth itself. Expressing Our Attitudes pulls together over a decade of work by one of the leading figures in contemporary metaethics. Two new and seven previously published papers weave treatments of propositions, truth, and the attitudes together with detailed development of competing alternative expressivist frameworks and discussion of their relative advantages. A substantial new introduction both offers new arguments of its own, and provides a map to reading these essays as a unified argument. Along with its sister volume, Explaining the Reasons We Share, this volume advances the theme that metaethical inquiry is continuous with other areas of philosophy.

The Xenon Tech Archives File 2: The Hybrid Theory Ashley M Jackson,2019-01-30 Xenon Technologies; the lab that started everything. The lab that created CHEM, and the first companion humanoids. The lab that, according to my dream, created Salem. The lab that was the scene of a buried massacre. Captain Scarlet and his team have moved forward in sheer faith of their mission. Justified Killing Whitley R. P. Kaufman,2009 The right of self-defense is seemingly at odds with the general presupposition that killing is wrong; numerous theories have been put forth over the years that attempt to explain how self-defense is consistent with such a presupposition. In Justified Killing: The Paradox of Self-Defense, Whitley Kaufman argues that none of the leading theories adequately explains why it is permissible even to kill an innocent attacker in self-defense, given the basic moral prohibition against killing the innocent. Kaufman suggests that such an explanation can be found in the traditional Doctrine of Double Effect, according to which self-defense is justified because the intention of the defender is to protect himself rather than harm the attacker. Given this morally legitimate intention, self-defense is permissible against both culpable and innocent aggressors, so long as the force used is both necessary and proportionate. Justified Killing will intrigue in particular those scholars interested in moral and legal philosophy.

Welfare, Meaning, and Worth Aaron Smuts,2017-09-22 Welfare, Meaning, and Worth argues that there is more to what makes a life worth living than welfare, and that a good life does not consist of what is merely good for the one who lives it. Smuts defends an objective list theory that states that the notion of worth captures matters of importance for which no plausible theory of welfare can account. He puts forth that lives worth living are net high in various objective goods, including pleasure, meaning, knowledge, and loving relationships. The first part of the book presents a theory of worth, a mental statist account of welfare, and an objectivist theory of meaning. The second part explores the implications for moral theory, the popularity of painful art, and the viability of pessimism about the human condition. This book offers an original exploration of worth as a combination of welfare and meaning that will be of interest to philosophers and ethicists who work on issues in well-being and positive psychology.

The Oxford Handbook of Aphasia and Language Disorders Anastasia M. Raymer,Leslie J. Gonzalez Rothi,2017-11-07 What is immediately clear when meeting individuals with acquired brain damage is that the patterns of communication impairments vary in remarkable ways among these individuals. Aphasia and related communication disorders, while devastating life events for individuals who acquire brain damage, provide lessons of considerable interest to many clinicians and researchers trying to understand the brain's neurological and psychological complexity and develop methods to facilitate optimum recovery of lost language and communication functions following brain damage. The Oxford Handbook of Aphasia and Language Disorders weaves theoretical and neurological foundations with rational, motivated clinical approaches to assessment, diagnosis, and intervention for aphasia and related communication disorders. The contributing authors, experienced clinicians and scientists with strong backgrounds in neurological and cognitive neuropsychological theories, bridge theory to clinical practice, reviewing the extant literature in each aphasia syndrome while exploring implications for guiding clinical decision-making. Introductory chapters provide historical perspectives on the aphasia syndromes following left hemisphere brain damage, and review aphasia assessment across the decades. The bulk of the Handbook covers aphasia syndromes, with chapters that describe each aphasia syndrome in detail, including behavioral, neural, and cognitive neuropsychological correlates and methods to assess and treat each syndrome. Additional chapters provide insights into acquired reading and writing disorders and social and prosodic communication disorders that follow damage to the right cerebral hemisphere. The final chapters examine neural perspectives on aphasia recovery and principles of neuroplasticity in aphasia treatment. As such, this book integrates neural, cognitive, and clinical perspectives to provide a broad understanding of the complexity of language and impairments that can arise following acquired brain damage, and will be of interest to scholars and clinicians in the speech-language, neuropsychology, and rehabilitation professions.

The Language of Desire Daniel Eggers,2021-06-08 Expressivism has been dominating much of the metaethical debate of the past three decades. The aim of this book is to address a number of questions that have been neglected in the previous discussion.These primarily concern the psychological commitments and the methodological status of expressivism as well as important differences and similarities between the approaches of the 'classic' expressivists Ayer, Stevenson, Hare, Blackburn und Gibbard.

Experimental and Theoretical Advances in Biological Pattern Formation Hans G. Othmer,Philip K. Maini,James D. Murray,2012-12-06 This volume contains the proceedings of the NATO ARW on 'Biological Pattern Formation' held at Merton College, University of Oxford, on 27-31 August, 1992. The objective of the workshop was to bring together a select group of theoreticians and experimental biologists to present the latest results in the area of biological pattern formation and to foster interaction across dis- plines. The workshop was divided into 5 main areas: (i) limb development, (ii) Dictyostelium discoideum, (iii) Drosophila, (iv) cell movement, (v) g- eral pattern formation. We thank all the participants for their contributions, enthusiasm, and willingness to collaborate. There was a genuine, open, and extremely fru- ful interaction between the experimentalists and theoreticians which made the workshop a success. We also thank The Welcome Trust for providing additional funding. The local organization fell mainly on Denise McKittrick and Beverley Bhaskhare at the Mathematical Institute, Oxford, and Jeanette Hudson and the staff of Merton College. We greatly appreciate their help and patience. We also thank Jonathan Sherratt, Wendy Brandts and Debbie Benson for helping out in the conference and for providing a happy welcome to parti- pants on a typically cold, wet and windy English summer day.
