running your household (and life!) in a new way... It started with the Sh*t I Do List. Tired of being the “shefault” parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is Fair Play: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, Fair Play helps you prioritize what's important to your family and who should take the lead on every chore, from laundry to homework to dinner. “Winning” this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in.

Teaching the Dimensions of Literacy Stephen Kucer,Cecilia Silva,2012-10-12 Teaching the Dimensions of Literacy provides both the conceptual knowledge to support teachers' instructional decisions in the reading/literacy classroom and a multitude of instructional strategy lessons for classroom use with both monolingual and bilingual students. It proposes that teachers need to help children become code breakers (the linguistic dimension), meaning makers (the cognitive dimension), text users and critics (the sociocultural dimension), and scientists (the developmental dimension). Acknowledging and addressing all four dimensions, this text links literacy theory, literacy research, and literacy practice in a useable way. Covering both reading and writing, it features clear, concise, and useable reading and writing strategy lessons and ways to modify them for different types of students. Changes in the Second Edition: Entirely reorganized, the text is more user friendly, builds a stronger link between theory and practice, and makes it is easier for teachers to locate appropriate strategy lessons to use with their students. Academic literacy is addressed more fully.

Research Design and Methods for Studying Cultures Victor C. De Munck,2009 This is a practical guidebook for conducting field research on cultural issues. The first third of the book describes how one constructs a research design. The rest of the book describes different methods that the author used during his own NSF sponsored cross-cultural research on romantic love in Russia, Lithuania, and the U.S. The methods described are: freelists, pile or Q sorts questionnaires, consensus analysis, interviews, process analysis, and participant observation. Participant observation is intentionally left to the end, to emphasize that it is the most difficult of all methods and also to show that participant observations is a more powerful tool when preceded by more structured and systematic methods of data collection. The strengths and weaknesses of these methods are discussed as are the 'pitfalls' that occur when a research design is implemented in the field. The book is useful for anyone who is preparing to conduct fieldwork on socio- cultural issues.

Treating Addiction, Second Edition William R. Miller,Alyssa A. Forcehimes,Allen Zweben,2019-08-15 What we wish to offer you, then, is an updated professional resource that combines both clinical and scientific perspectives. We hope this book will be helpful to professionals who are already treating addictive disorders and also to those who are just learning how to treat addictions. We also encourage health professionals more generally to think of addictions as falling within their own normal scope of work, and we have kept this in mind in our writing. In addiction treatment, it makes a difference what you do and how you do it, and it is far easier to develop evidence-based practice from the outset than to change already established habits.--Page x.
