On the *Rochester*, there’s no water ration, more books than one person could devour in a lifetime, and an AI who seems more friend than robot. But no one warned Stella that the ship seems to be haunted, nor that it may be involved in a conspiracy that could topple the entire interstellar fleet. Surrounded by mysteries, Stella finds her equal in the brooding but kind nineteen-year-old Captain Hugo. When several attempts on his life spark more questions than answers, and the beautiful Bianca Ingram appears at Hugo’s request, his unpredictable behavior causes Stella’s suspicions to mount. **The Idea Hunter** Andy Boynton, Bill Fischer, 2011-04-04 A different way of discovering and developing the best business ideas Jack Welch once said, Someone, somewhere has a better idea. In this myth-busting book, the authors reveal that great business ideas do not spring from innate creativity, or necessarily from the brilliant minds of people. Rather, great ideas come to those who are in the habit of looking for great ideas all around them, all the time. Too often, people fall into the trap of thinking that the only worthwhile idea is a thoroughly original one. Idea Hunters know better. They understand that valuable ideas are already out there, waiting to be found - and not just in the usual places. Shows how to expand your capacity to find and develop winning business ideas Explains why ideas are a critical asset for every manager and professional, not just for those who do creative Reveals how to seek out and select the ideas that best serve your purposes and goals and define who you are, as a professional Offers practical tips on how to master the everyday habits of an Idea Hunter, which include cultivating great conversations The book is filled with illustrative accounts of successful Idea Hunters and stories from thriving idea companies. Warren Buffet, Walt Disney, Thomas Edison, Mary Kay Ash, Twitter, and Pixar Animation Studios are among the many profiled.

With those basic decisions made, you can get right down to it!

*The Metaphysical Club* Louis Menand, 2002-04-10 The Metaphysical Club is the winner of the 2002 Pulitzer Prize for History. A national bestseller and hugely ambitious, unmistakably brilliant (Janet Maslin, New York Times) book about the creation of modern American thought. The Metaphysical Club was an informal group that met in Cambridge, Massachusetts, in 1872, to talk about ideas. Its

members included Oliver Wendell Holmes Jr. future associate justice of the United States Supreme Court; William James, the father of modern American psychology; and Charles Sanders Peirce, logician, scientist, and the founder of semiotics. The Club was probably in existence for about nine months. No records were kept. The one thing we know that came out of it was an idea -- an idea about ideas. This book is the story of that idea. Holmes, James, and Peirce all believed that ideas are not things out there waiting to be discovered but are tools people invent -- like knives and forks and microchips -- to make their way in the world. They thought that ideas are produced not by individuals, but by groups of individuals -- that ideas are social. They do not develop according to some inner logic of their own but are entirely dependent-- like germs -- on their human carriers and environment. And they thought that the survival of any idea depends not on its immutability but on its adaptability. The *Metaphysical Club* is written in the spirit of this idea about ideas. It is not a history of philosophy but an absorbing narrative about personalities and social history, a story about America. It begins with the Civil War and ends in 1919 with Justice Holmes's dissenting opinion in the case of *U.S. v. Abrams*—the basis for the constitutional law of free speech. The first four sections of the book focus on Holmes, James, Peirce, and their intellectual heir, John Dewey. The last section discusses some of the fundamental twentieth-century ideas they are associated with. This is a book about a way of thinking that changed American life.

*Ideas Against Ideocracy* Mikhail Epstein, 2021-09-09 This groundbreaking work by one of the world's foremost theoreticians of culture and scholars of Russian philosophy gives for the first time a systematic examination of the development of Russian philosophy during the late Soviet period. Countering the traditional view of an intellectual wilderness under the Soviet regime, Mikhail Epstein provides a comprehensive account of Russian thought of the second half of the 20th century that is highly sophisticated without losing clarity. It provides new insights into previously mostly ignored areas such as late-Soviet Russian nationalism and Eurasianism, religious thought, cosmism and esoterism, and postmodernism and conceptualism. Epstein shows how Russian philosophy has long been trapped in an intellectual prison of its own making as it sought to create its own utopia. However, he demonstrates that it is time to reappraise Russian thought, now freed from the bonds of Soviet totalitarianism and ideocracy but nevertheless dangerously engaged into new nationalist aspirations and metaphysical radicalism. We are left with not only a new and exciting interpretation of recent Russian intellectual history, but also the opportunity to rethink our own philosophical heritage.

**Where Do You Get Your Ideas?** Fred White, 2012-11-05 Discover the Journal From Initial Idea to

Completed Story A wardrobe that leads to a fantasy world...a rendition of Hamlet told by Rosencrantz and Guildenstern...the life and times of the Wicked Witch of the West.... Just where do successful writers get their ideas? Author Fred White demystifies the creative process of idea generation by breaking it down into six essential stages: idea recognition, idea incubation, outlining, research, drafting, and revision. In *Where Do You Get Your Ideas?* you will learn: • How to create, organize, and keep a writer's notebook. • Where to look for ideas--in daily observations, books, news articles, and magazines--and how to recognize a story when you see one. • Techniques for developing ideas into creative works of fiction and non-fiction: free-associating, listing, mapping, and collaging. • How to transform a good idea into a great story, novel, or memoir. With practical advice, techniques, and exercises, plus 75 seminal ideas to jump-start your creativity, *Where Do You Get Your Ideas?* will pull back the curtain on the magic of idea generation and reveal the wealth of writing inspiration right in front of you.

*The Sociology of Educational Ideas* Julia Evetts, 2017-05-08 This study, first published in 1973, examines the principles that lie behind educational dilemmas, and helps to clarify the difficulties of explanation, justification and practical action in the educational system. The author explores various key concepts in the education process, such as Intelligence, Equal Opportunity, Knowledge and Selection. She shows that different and often contrasting interpretations of these concepts imply certain assumptions about the nature of man, the genesis and knowledge, the education process and its relation to society. This title will be of interest to students of sociology and education.

*Greek and Roman Political Ideas* Melissa Lane, 2014-05-01 What is politics? What are the origins of political philosophy? What can we learn from the Greeks and Romans? In *Greek and Roman Political Ideas*, acclaimed classics scholar Melissa Lane introduces the reader to the foundations of Western political thought, from the Greeks, who invented democracy, to the Romans, who created a republic and then transformed it into an empire. Tracing the origins of political philosophy from Socrates to Cicero to Plutarch, Lane reminds us that the birth of politics was as much a story of individuals as ideas.

*The Flow of Management Ideas* Stefan Heusinkveld, Marlieke van Grinsven, Claudia Groß, David Greatbatch, Timothy Clark, 2021-06-10 The widespread promotion of management ideas, their regular inclusion in textbooks and business school curricula and their use in organizational change programs has engendered debates about the impact of these ideas on management and organizational practice. Based on analyses of managerial audience members' activities and related meaning-making prior to,

during and after guru events with leading management thinkers, this book sheds new light on how management practitioners come to use management ideas in the different relevant contexts of their working lives. The authors argue that a broader, more differentiated and more dynamic view of managerial audiences is essential in understanding the impact of management ideas as well as the nature of contemporary managerial work. For scholars and students in organisation studies, knowledge management and management consultancy, as well as reflective management practitioners.

History of Political Ideas, Volume 8 Eric Voegelin,1999 Reaching into our own time, Crisis and the Apocalypse of Man confronts the disintegration of traditional sources of meaning and the correlative attempt to generate new sources of order from within the self. Voegelin allows us to contemplate the crisis in its starkest terms as the apocalypse of man that now seeks to replace the apocalypse of God. The totalitarian upheaval that convulsed Voegelin's world, and whose aftermath still defines ours, is only the external manifestation of an inner spiritual turmoil. Its roots have been probed throughout the

eight volumes of History of Political Ideas, but its emergence is marked by the age of Enlightenment. In our postmodern era, discussions of the collapse of the enlightenment project have become commonplace. Voegelin compels us to follow the great-souled individuals who sought to go from disintegration of the present toward evocations of order for the future. Such thinkers as Comte, Bakunin, and Marx suffered through the crisis and fully understood the need for a new outpouring of the spirit. They resolved to supply the deficiency themselves. As a consequence they launched us irrevocably on the path of the apocalypse of man. One of the great merits of Voegelin's analysis is his exposition of the pervasive character of this crisis. It is not confined to the megalomaniacal dreamers of a revolutionary apocalypse; rather, echoes of it are found in the more moderate Enlightenment preoccupation with progress to be attained through application of the scientific method. Faith in the capacity of instrumental reason to answer the ultimate questions of human existence defined men such as Voltaire, Helvétius, Diderot, D'Alembert, and Condorcet. It remains the authoritative faith of our world today, Voegelin argues, demonstrated by our continuing inability to step outside the parameters of the Enlightenment. Are we condemned, then, to oscillate between the rational incoherence of a science that never delivers on its promises and a now discredited revolutionary idealism that wreaks havoc in practice? This is the question toward which Voegelin's final volume points. While not direct, his response is evident everywhere. Crisis and the Apocalypse of Man could have been written only by a man who had reached his own resolution of the crisis.
