Klaas Landsman, Ellen van Wolde

**Bastard Culture!** Mirko Tobias Schäfer, 2011 The computer and particularly the Internet have been represented as enabling technologies, turning consumers into users and users into producers. The unfolding online cultural production by users has been framed enthusiastically as participatory culture. But while many studies of user activities and the use of the Internet tend to romanticize emerging media practices, this book steps beyond the usual framework and analyzes user participation in the context of accompanying popular and scholarly discourse, as well as the material aspects of design, and their relation to the practices of design and appropriation.

**Geospatial Thinking** Marco Painho, Maribel Yasmina Santos, Hardy Pundt, 2010-07-20 For the fourth consecutive year, the Association of Geographic Information Laboratories for Europe (AGILE) promoted the edition of a book with the collection of the scientific papers that were submitted as full-papers to the AGILE annual international conference. Those papers went through a thorough competitive review process. The 13 AGILE conference call for full-papers of original and unpublished fundamental scientific research resulted in 54 submissions, of which 21 were accepted for publication in this volume (acceptance rate of 39%). Published in the Springer Lecture Notes in Geoinformation and Cartography, this book is associated to the 13 AGILE Conference on Geographic Information Science, held in 2010 in Guimarães, Portugal, under the title "Geospatial Thinking". The efficient use of

geospatial information and related technologies assumes the knowledge of concepts that are fundamental components of Geospatial Thinking, which is built on reasoning processes, spatial conc- tualizations, and representation methods. Geospatial Thinking is associated with a set of cognitive skills consisting of several forms of knowledge and cognitive operators used to transform, combine or, in any other way, act on that same knowledge. The scientific papers published in this volume cover an important set of topics within Geoinformation Science, including: Representation and Visualisation of Geographic Phenomena; Spatiotemporal Data Analysis; Geo- Collaboration, Participation, and Decision Support; Semantics of Geoinformation and Knowledge Discovery; Spatiotemporal Modelling and Reasoning; and Web Services, Geospatial Systems and Real-time Appli- tions.

**Economics with Calculus** Michael C. Lovell, 2004  
This textbook provides a calculus-based introduction to economics. Students blessed with a working knowledge of the calculus would find that this text facilitates their study of the basic analytical framework of economics. The textbook examines a wide range of micro and macro topics, including prices and markets, equity versus efficiency, Rawls versus Bentham, accounting and the theory of the firm, optimal lot size and just in time, monopoly and competition, exchange rates and the balance of payments, inflation and unemployment, fiscal and monetary policy, IS-LM analysis, aggregate demand and supply, speculation and rational expectations, growth and development,

exhaustible resources and over-fishing. While the content is similar to that of conventional introductory economics textbook, the assumption that the reader knows and enjoys the calculus distinguishes this book from the traditional text.

**The Dawn of European Civilization** Griffith Hartwell Jones, 1903

**The Challenge of Chance** Klaas Landsman, Ellen van Wolde, 2016-06-09 This book presents a multidisciplinary perspective on chance, with contributions from distinguished researchers in the areas of biology, cognitive neuroscience, economics, genetics, general history, law, linguistics, logic, mathematical physics, statistics, theology and philosophy. The individual chapters are bound together by a general introduction followed by an opening chapter that surveys 2500 years of linguistic, philosophical, and scientific reflections on chance, coincidence, fortune, randomness, luck and related concepts. A main conclusion that can be drawn is that, even after all this time, we still cannot be sure whether chance is a truly fundamental and irreducible phenomenon, in that certain events are simply uncaused and could have been otherwise, or whether it is always simply a reflection of our ignorance. Other challenges that emerge from this book include a better understanding of the contextuality and perspectival character of chance (including its scale-dependence), and the curious fact that, throughout history (including contemporary science), chance has been used both as an explanation and as a hallmark of the absence of

explanation. As such, this book challenges the reader to think about chance in a new way and to come to grips with this endlessly fascinating phenomenon.

**The Speeches in Vergil's Aeneid** Gilbert

Hightet, 2015-03-08 In the Aeneid men, women, gods, and goddesses are characterized by the speeches assigned to them far more than by descriptions of their appearance or behavior. Most of the speeches are highly emotional and individualized, reminding us of the most powerful utterances of Greek tragedy. Gilbert Hightet has analyzed all the speeches in the Aeneid, using statistical techniques as well as more traditional methods of scholarship. He has classified the speeches; identified their models in earlier Greek and Latin literature; analyzed their structure; and discussed their importance in the portrayal of character. He finds that Vergil used standard rhetorical devices with discretion, and that his models were poets rather than orators.

Nevertheless, this study shows Vergil to have been a master dramatist as well as a great epic poet. Originally published in 1972. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding

in 1905.

**Information and Software Technologies** Tomas Skersys, Rimantas Butleris, Rita Butkiene, 2013-11-27 This book constitutes the refereed proceedings of the 19th International Conference on Information and Software Technologies, ICIST 2013, held in Kaunas, Lithuania, in October 2013. The 34 papers presented were carefully reviewed and selected from 60 submissions. The papers focus on the following topics: information systems, business intelligence, software engineering, and IT applications.

**Let Over Lambda** Doug Hoyte, 2008 Let Over Lambda is one of the most hardcore computer programming books out there. Starting with the fundamentals, it describes the most advanced features of the most advanced language: Common Lisp. Only the top percentile of programmers use lisp and if you can understand this book you are in the top percentile of lisp programmers. If you are looking for a dry coding manual that re-hashes common-sense techniques in whatever langue du jour, this book is not for you. This book is about pushing the boundaries of what we know about programming. While this book teaches useful skills that can help solve your programming problems today and now, it has also been designed to be entertaining and inspiring. If you have ever wondered what lisp or even programming itself is really about, this is the book you have been looking for.

**Black Ships and Sea Raiders** Jeffrey P. Emanuel, 2017-12-20 The end of the Bronze Age in the Eastern Mediterranean was a time of social, political, and economic upheaval – conditions

reflected, in many ways, in the world of Homer's Odyssey. Jeffrey P. Emanuel examines the Odyssey's Second Cretan Lie (xiv 191 – 359) in the context of this watershed transition, with particular emphasis on raiding, warfare, maritime technology and tactics, and the evidence for the so-called 'Sea Peoples' who have been connected to the events of this period. He focuses in particular on the hero's description of his frequent raiding activities and on his subsequent sojourn in the land of the pharaohs, and connections between Odysseus' false narrative and the historical experiences of one particular Sea Peoples group: the 'Sherden of the Sea.'

*Late Antique Letter Collections* Cristiana Sogno, Bradley K. Storin, Edward J. Watts, 2019-11-19  
Bringing together an international team of historians, classicists, and scholars of religion, this volume provides the first comprehensive overview of the extant Greek and Latin letter collections of late antiquity (ca. 300–600 c.e.). Each chapter addresses a major collection of Greek or Latin literary letters, introducing the social and textual histories of each collection and examining its assembly, publication, and transmission. Contributions also reveal how collections operated as discrete literary genres, with their own conventions and self-presentational agendas. This book will fundamentally change how people both read these texts and use letters to reconstruct the social history of the fourth, fifth, and sixth centuries.

*Plato and Xenophon* Gabriel Danzig,David Marvin Johnson,Donald R. Morrison,2018 Plato and Xenophon: Comparative Studies contains a wide variety of comparative studies of the writings of Plato and Xenophon, from philosophical, literary, and historical perspectives.

**The Athletic Skills Model** René Wormhoudt,Geert

J.P. Savelsbergh, Jan Willem Teunissen, Keith Davids, 2017-10-12 The Athletic Skills Model offers an alternative to dominant talent development theories in the form of holistic broad-based movement education, focusing on health and wellbeing. It places the emphasis on 'physical intelligence' – including attributes such as agility, flexibility and stability – through adaptable and varied training programmes, creating a skilled athlete before introducing sport specialization. The book sets out the scientific underpinnings of the ASM before going on to offer practical guidance on the content of the programme, how to adapt and vary the programme, and how to apply the approach to different age groups and sports. The ASM's application in the youth development programme at AFC Ajax is explored in depth, before a future of talent development with an emphasis on athletic, rather than sport-specific, expertise is imagined. The Athletic Skills Model introduces an important and timely challenge to conventional wisdom in talent development and is a fascinating read for any upper-level student or researcher interested in youth development, skill acquisition, motor learning or sports coaching, and any coaches wanting to refresh their approach to talent development.

**Trends in Structural Mechanics** J. Roorda, N.K. Srivastava, 2012-12-06 The desire to understand the mechanics of elastic and plastic solids, new materials and the stability, reliability and dynamic behaviour of structures and their components under extreme environmental conditions

has dominated research in structural engineering for many decades. Advances in these areas have revolutionized design methods, codes of practice, and the teaching of structural engineers. In this volume an international body of leading authorities presents some forty papers on current research directions in the specific areas of solid mechanics, structural computation, modern materials and their application, buckling and instability, design of structural systems and components, reliability, seismic analysis, and engineering education. They were presented at a symposium held July 10-12, 1994, at the University of Waterloo, Canada, to honour Professor Archibald Norbert Sherbourne who recently retired from a long and active career of teaching, research and academic administration at this University. The themes of the work contained within this volume reflect Professor Sherbourne's own research interests and will be of interest to both academics and practicing structural engineers.

**How I Learned** Shamus Young,

**Book of the True Poem** Guillaume (de Machaut),Daniel Leech-Wilkinson,R. Barton Palmer,1998 This is the first complete edition and the first English translation of one of the most fascinating poems of the late Middle Ages. Machaut's narrative tells the true story of the aged poet's romance with a young admirer, constructed around the letters and lyric poems they exchanged, and offers unique insights into the making of poetry, music and manuscripts. Introductory essays survey Machaut's biography,

reevaluate the autobiographical content of the poem, explore the literary context, and discuss the miniatures, which are reproduced within the text. Also included is a full listing of variant readings, a commentary on references to contemporary events and the writing of the poem, an outline chronology, indices of lyrics, and a table to convert line numbers between this edition and the incomplete 1875 edition of P. Paris.
