The Sports Gene David Epstein, 2014-04-29 The New York Times bestseller – with a new afterword about early specialization in youth sports – from the author of *Range: Why Generalists Triumph in a Specialized World*. The debate is as old as physical competition. Are stars like Usain Bolt, Michael Phelps, and Serena Williams genetic freaks put on Earth to dominate their respective sports? Or are they simply normal people who overcame their biological limits through sheer force of will and obsessive training? In this controversial and engaging exploration of athletic success and the so-called 10,000-hour rule, David Epstein tackles the great nature vs. nurture debate and traces how far science has come in solving it. Through on-the-ground reporting from below the equator and above the Arctic Circle, revealing conversations with leading scientists and Olympic champions, and interviews with athletes who have rare genetic mutations or physical traits, Epstein forces us to rethink the very nature of athleticism.

**Photographing Indoor Sports** Alan Hess, 2014-03-21 This is a book about photographing low-light and indoor sports—not as a professional working for a major sports publication or website—but as a parent or friend trying to capture a great memory. In *Photographing Indoor Sports*, author and photographer Alan Hess takes you through the basics of shooting basketball in the gym, martial arts at a dojo, water polo inside, and night football games under the lights. Photographing these sports can be a challenge, because you need to use action-stopping shutter speeds without a lot of light. This means using lenses that open as wide as possible and ISO settings that can introduce a lot of digital noise. This book covers all of these techniques to help you get that ideal sports shot in low light—and hopefully have some fun along the way. Follow along with Alan and you will: Learn how to handle low-light scenarios by adjusting your White Balance setting, noting where the lights are the brightest, and watching as the action crosses into different areas Understand the importance of using a wide-open lens with a high ISO setting to get the right exposure for your low-light action shots Explore post-processing techniques such as noise reduction and black-and-white conversion with Silver Efex Pro and the Saturation Slider in Adobe Camera Raw or Photoshop Lightroom
