**The Weather** Maïke Biederstadt, 2021-09-07 From raucous stormy seas to a welcomingly vivid rainbow, weather's most exciting moments come to brilliant life in this fantastic new pop-up book. In her hugely successful books *Creatures of the Deep* and *What's in the Egg*, as well as her enormously popular series of greeting cards for the Museum of Modern Art, Maïke Biederstaedt has established herself as one of the preeminent paper artists working today. Now Biederstaedt takes book engineering to new heights as she immerses readers in five electrifying weather scenarios. As each spread unfolds, a meticulously designed landscape emerges--a freighter balances like a nutshell between high waves in the sea; a tornado takes terrifying aim at a truck trying to outrun it; a rain-spewing storm cloud towers like a skyscraper over a farm house. Nature's delicate beauty emerges in the intricate shapes of a snowflake and in the luminous arc of a rainbow. Each page features an informative description of its weather event and the book closes with sobering commentary on the effects of climate change. A wondrous introduction to weather for budding climatologists, this is also an artistic tour de force that collectors will treasure.

*Cook Like a Pro* Ina Garten, 2018-10-23 #1 NEW YORK TIMES BESTSELLER • Cook with confidence no matter how much experience you have in the kitchen with the help of the beloved Food Network star “Garten has kicked things up a level, this time encouraging readers to try more ambitious recipes that are still signature Ina: warm, comforting, homey.”—Chicago Tribune NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Food Network • Food & Wine • PopSugar • The Atlanta Journal-Constitution • Country Living • The Feast •

Eater • The Kitchn • Delish In this collection of foolproof recipes, Ina brings readers' cooking know-how to the next level by answering questions, teaching techniques, and explaining her process right in the margin of each recipe—it's as if she's in the kitchen by your side guiding you through the recipe. When you make her Cauliflower Toasts with prosciutto and Gruyère, she shows you the best way to cut a cauliflower into perfect florets without getting them all over the kitchen (from the stem end, with the head turned upside-down!) and when making her Red Wine-Braised Short Ribs, Ina shares a fantastic tip for keeping your stovetop clean (roast the short ribs in the oven rather than browning them in a pan on the stove!). You'll discover dozens more ingenious tips and shortcuts throughout, such as how to set up an elegant home bar, how to peel two heads of garlic quickly, how to use a paring knife to create a pro-worthy pattern on her decadent Chocolate Chevron Cake, and the key to making unbelievably creamy Truffled Scrambled Eggs (add the eggs to the skillet before the butter melts—who knew?!). Both beginners and advanced cooks will love this book filled with new dishes that will become part of your repertoire and practical cooking advice that will give you more confidence in the kitchen. Your friends and family will be so impressed!

Science and Empires P. Petitjean,Cathérine Jami,A.M. Moulin,2012-12-06 SCIENCE AND EMPIRES: FROM THE

INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium Science and Empires - Historical Studies about Scientific Development and European Expansion is the product of an International Colloquium, Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries. Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed Sciences and Empires as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group. of a gamble. Its subject, reflected in the title Sciences and Empires, is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

*Glosario Del Banco Mundial* World Bank, 1996 This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a

preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national organizations will be found at the end of the Glossary.

**Routledge Diccionario Técnico Inglés** Routledge,1997 This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors*. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficult accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

**The Primordial Emotions** Derek A. Denton,2005 To understand what is happening in the brain in the moment you decide, at will, to summon to consciousness a passage of Mozart's music, or decide to take a deep breath, is like trying to catch a phantom by the tail. Consciousness remains that most elusive of all human phenomena - one so mysterious, one that even our highly developed knowledge of brain function can only partly explain. This book is unique in tracing the origins of consciousness. It takes the investigation back many years in an attempt to uncover just how consciousness might have first

emerged. Consciousness did not develop suddenly in humans - it evolved gradually. In 'The Primordial Emotions', Derek Denton, a world renowned expert on animal instinct and a leader in integrative physiology, investigates the evolution of consciousness. Central to the book is the idea that the primalemotions - elements of instinctive behaviour - were the first dawning of consciousness. Throughout he examines instinctive behaviours, such as hunger for air, hunger for minerals, thirst, and pain, arguing that the emotions elicited from these behaviours and desire for gratification culminated in the first conscious states. To develop the theory he looks at behaviour at different levels of the evolutionary tree, for example of octopuses, fish, snakes, birds, and elephants. Coupled with findings from neuroimaging studies, and the viewpoints on consciousness from some of the key figures in philosophy and neuroscience, the book presents an accessible and groundbreaking new look at the problem of consciousness.

**Nineteen Eighty-Four** George Orwell, 2021-01-09 Nineteen Eighty-Four: A Novel, often published as 1984, is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, Nineteen Eighty-Four centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys

an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

Modern Times Paul Johnson, 1992 Originally published in 1983 and named one of the Best Books of the Year by The New York Times, this bestselling history is now revised and updated and includes a new final chapter. A far-reaching and masterful work, it explores the events, ideas, and personalities of the seven decades since the First World War.

*Librarianship and Human Rights* Toni Samek, 2014-07-21 In this book, the reader will encounter a myriad of urgent library and information voices reflecting contemporary local, national, and transnational calls to action on conflicts generated by failures to acknowledge human rights, by struggles for recognition and representation, by social exclusion, and the library institution's role therein. These voices infuse library and information work worldwide into social movements and the global discourse of human rights, they depict library and information workers as political actors, they offer some new possibilities for strategies of resistance, and they challenge networks of control. This book's approach to library and information work is grounded in practical, critical, and emancipatory terms; social action is a central pattern. This book is conceived as a direct challenge to the notion of library neutrality, especially in the present context of war, revolution, and social change. This book, for example, locates library and information workers as participants and interventionists in social conflicts. The strategies for social action worldwide documented in this book were selected because of their connection to elements of the Universal Declaration of Human Rights (1948) that relate particularly to core library values, information ethics, and global

information justice. The first monograph of its kind Locates librarianship front and centre in knowledge societies Mainstreams critical librarianship

**Biodiversity** N. Biedinger, Wilhelm Barthlott, Matthias Winiger, 2013-06-29 Biodiversity, sometimes simply understood as diversity of species, is a specific quality of life on our planet, the dimensions and importance of which have just lately been fully realized. Today we know that biological diversity is a global asset of incalculable value to present and future generations (Kofi Annan). Biodiversity is spread unequally over the world: in fact, the main share of biological resources worldwide is harboured predominantly by the so-called developing countries in the tropics and sub tropics. Therefore, Biodiversity - A Challenge for Development Research and Policy was chosen as the title for an international conference which was held in Bonn in 1997 as one of the first major events organized by the then newly established North-South Centre for Development Research (ZEF) at Rheinische Friedrich-Wilhelms-Universität Bonn (Germany). Since the ZEF, founded by the Senate of the University of Bonn in 1995, has played a central role in turning Bonn into a centre for international cooperation and North-South dialogue. The Centre is a product of the Bonn Berlin agreement of July 1994 which was adopted to offset the effects caused by the Parliament and much of the Government moving to Berlin. It fits in well with the double strategy to strengthen Bonn's position as an international science arena and as an eminent place for development policy and the national and supranational agencies dealing with this issue.
