The Colombian Peace Process and the Principle of Complementarity of the International Criminal Court Kai Ambos,2010-06-30 Striking a balance between peace and justice has long been debated by scholars and practitioners. There has been definite progress in a world in which blanket amnesties were at times granted with little hesitation. There is a growing understanding that accountability has both pragmatic and principled arguments in its favor. Practical arguments as much as shifts in norms have created a situation in which the choice is increasingly seen as which forms of accountability rather than a stark one between peace and justice. The Colombian Justice and Peace Law 975 and its implementation offer an interesting and unique approach to dealing with the international crimes committed in Colombia's decades-long armed conflict. Yet, will this approach suffice with regard to Colombia's obligations under international law to investigate and prosecute international crimes? Does it meet the standards of the ICC, which has been monitoring the Colombian situation for some time now? In particular, does it pass the complementarity test laid out in the ICC statute or will the ICC have to intervene in Colombia to enforce international criminal law?

Organizing the Blind Roberto Garvía,2016-11-10 This book is a case study which narrates the history of the National Organization of the Spanish Blind (ONCE), established in 1937 during the Spanish Civil War. Contrary to other affluent countries where most blind people live on welfare benefits, the Spanish blind enjoy full employment. Furthermore, the average income of the Spanish blind is higher than that of the sighted. Why is this so? Why the

blind, and not the deaf mute, or any other group of disabled people? This book shows that ONCE answers these questions. The book explains ONCE'S origins, the shifting strategies that the organization has pursued to adapt to an ever-changing environment, its original goals and the way they have mutated and been interpreted, its conflicting relationship with an authoritarian regime, its struggle to find its place in a democratic regime, and its relations with other groups of disabled people. A historical narrative, the book lies at the intersection between disability and organization studies, history and sociology. It will be of interest to all scholars of disability studies, the sociology of work, the history of medicine and contemporary Spanish history.

Manual para la elaboración e implementación de un modelo de evaluación por competencias José Gregorio Contreras Fernández, 2014 El presente libro denominado MANUAL PARA LA ELABORACIÓN E IMPLEMENTACIÓN DE UN MODELO DE EVALUACIÓN POR COMPETENCIAS, es el resultado de once años de trabajo, asesoría y acompañamiento a tres grandes instituciones públicas, en donde he sido Rector y de las cuales me siento muy orgulloso. Este manual parte primero desde lo que es la fundamentación, es decir el manejo de conceptos claves como: competencias, evaluación enseñar y aprender desde la perspectiva de procesos. De modo que el lector tenga una clara concepción de lo que debe saber sobre el tema y así poder plantear un modelo y los pasos que se deben seguir para su implementación. Este manual le permite a los docentes crear un modelo práctico de evaluación que facilita la promoción y el éxito de los estudiantes. En la mayoría de países latinoamericanos se habla mucho de competencias, pero no se tiene bien claro que son y cómo aplicarlas en el contexto de la escuela y más complicado aún el cómo volverlas un elemento base para el proceso de evaluación. Este manual pretende ofrecer un enfoque o concepción básica de competencia en donde el docente en un lenguaje sencillo pueda entenderla en toda su esencia y aplicación. Otro aspecto importante de este manual está en ofrecer procedimientos que faciliten el proceso de evaluación en las instituciones educativas, acompañado de una serie de instrumentos que le permitan a las instituciones contar con herramientas que evidencien los avances de la evaluación en las instituciones, herramientas que le darán mayor forma al diseño curricular.
