Fundamental Concepts for Interactive Paper and Cross-Media Information Spaces Beat Signer,2017-08-04 While there have been dramatic increases in the use of digital technologies for information storage, processing and delivery over the last twenty years, the affordances of paper have ensured its retention as a key information medium. In this book we review a wide variety of projects and technological developments for bridging the paper-digital divide. We present our information-centric approach for a tight integration of paper and digital information that is based on a general cross-media information platform. Different innovative augmented paper applications that have been developed based on our interactive paper platform and Anoto Digital Pen and Paper technology are introduced. For example, these applications include a mobile interactive paper-based tourist information system (EdFest) and a paper-digital presentation tool (PaperPoint). Challenges and solutions for new forms of interactive paper and cross-media publishing are discussed. The book is targeted at developers and researchers in information systems, hypermedia and human computer interaction, professionals from the printing and publishing industry as well as readers with a general interest in the future of paper.

Paper Prototyping Carolyn Snyder,2003-05-12 Do you spend a lot of time during the design process wondering what users really need? Do you hate those endless meetings where you argue how the interface should work? Have you ever developed something that later had to be completely redesigned? Paper Prototyping can help. Written by a usability engineer with a long and successful paper prototyping history, this book is a practical, how-to guide that will prepare you to create and test paper prototypes of all kinds of user interfaces. You'll see how to simulate various kinds of interface elements and interactions. Interactive Books Jacqueline Reid-Walsh,2017-09-27 Movable books are an innovative area of children's publishing. Commonly equated with spectacular pop-ups, movable books have a little-known history as interactive, narrative media. Since they are hybrid artifacts consisting of words, images and movable components, they cross the borders between story, toy, and game. Interactive Books is a historical and comparative study of early movable books in relation to the children who engage with them. Jacqueline Reid-Walsh focuses on the period movable books became connected with children from the mid-17th to the early-19th centuries. In particular, she examines turn-up books, paper doll books, and related hybrid experiments like toy theaters and paignion (or domestic play set) produced between 1650 and 1830. Despite being popular in their own time, these artifacts are little known today. This study draws attention to a gap in our knowledge of children's print culture by showing how these artifacts are important in their own right. Reid-Walsh combines archival research with children's literature studies, book history, and juvenilia studies. By examining commercially produced and homemade examples, she explores the interrelations among children, interactive media, and historical participatory culture. By drawing on both Enlightenment thinkers and contemporary digital media theorists Interactive Books enables us to think critically about children's media texts paper and digital, past and present.

Interactive Storytelling Ido A Iurgel,Nelson Zagalo,Paolo Petta,2009-11-24 The rich programme of ICIDS 2009, comprising invited talks, technical presentations and posters, demonstrations, and co-located post-conference workshops clearly underscores the event's status as premier international meeting in the domain. It thereby confirms the decision taken by the Constituting Committee of the conference series to take the step forward: out of the national cocoons of its precursors, ICVS and TIDSE, and towards an itinerant platform reflecting its global constituency. This move reflects the desire and the will to take on the challenge to stay on the lookout, critically reflect upon and integrate views and ideas, findings and experiences, and to promote interdisciplinary exchange, while ensuring overall coherence and maintaining a sense of direction. This is a significant enterprise: The challenges sought are multifarious and must be addressed consistently at all levels. The desire to involve all research communities and stakeholders must be matched by acknowledging the differences in established practises and by providing suitable means of guidance and introduction, exposition and direct interaction at the event itself and of lasting (and increasingly: living) documentation, of which the present proceedings are but an important part.
