This book addresses questions such as: Why should I give a paper and where might I give a paper? How does the conference system works? How do I prepare an abstract/outline/synopsis? How do I chose my material and prepare it for a conference presentation? How can I prepare effective conference aids? How can I overcome my nerves? How can I prepare and present effective posters for poster presentations? As with the other titles in the Success in Research series, this guide takes a hands-on approach and includes checklists, top tips, exercises and examples to help you remember what you have read and put it immediately to work! Teens, Libraries, and Social Networking Denise E. Agosto, June Abbas, 2011-05-18 Learn how teens use social networking technologies and how these same technologies can be used to engage them in library services. *Teens and Social Networking Now: What Librarians Need to Know* is organized around ten major topics, including using social networking sites to connect teens to young adult literature, social networking and legislative issues, social networking and safety/privacy issues, and the social and educational benefits of social networking. Expert practitioners explain how such issues can and should impact library services to young adults, focusing on concrete suggestions and specific steps for best practices and program designs that will help librarians utilize social networking tools to enhance library services to teens, both online and in the library. As background, the book explores the reasons so many teens use these sites. It also shares a profile of an award-winning public library's use of social networking to engage teen library users and a national survey of the ways YA librarians are using social networking to deliver public library services.

Inspirational Writing for Academic Publication Gillie Bolton, Stephen Rowland, 2014-06-13 Do you feel under increasing pressure to produce high quality publications, or struggle to translate your great ideas into inspirational – and engaging – writing? Gillie Bolton introduces her three ‘key phases’ method (Write for Myself, Redraft for my Reader, Edit for Posterity) to make the writing process less

daunting, and offers support and advice on how to develop your own writing voice to use this to engage readers in your research. 'Characters' at different career stages help you to identify your own writing level, and before and after examples of work from a range of disciplines clearly illustrate the key writing techniques. Drawing on case studies, as well as their own extensive writing experience, the authors suggest strategies for dealing with common difficulties such as: Time and energy management Restoring flagging enthusiasm Maintaining inspiration Dealing with potential burnout and writer's block. Each chapter concludes with a set of constructive exercises which develop these critical skills and inspire you to improve and enjoy your own academic writing. Ideal for upper level students and early career researchers. Dr Gillie Bolton is an international authority on writing and author of a long publication list including nine books, academic papers, as well as professional articles, poetry, and for a lay readership. Stephen Rowland, Emeritus Professor of University College London, is author of four books on the nature of research and learning in a range of contexts.

From Sky and Earth to Metaphysics Anna-Teresa Tymieniecka, 2014-10-13 This is an exceptional volume which expands upon the World Phenomenology Institute's recent research: the study of the beautiful intertwining of the skies and the cosmos with the human pursuits of philosophy, literature and the arts. The relationship of humans to the cosmos is examined through the exploration of phenomenology, metaphysics and the arts. The authors of this volume write on a variety of topics

which all seek to open the reader's eyes to the relationship of humans and our perception of our place in the cosmos. This volume offers a framework in which to present a rich panorama; a variety of perspectives illustrating how the perception of the interplay between human beings and the celestial realm advances in common experience and worldviews. This attempt to uncover our cosmic position is a great and worthwhile intellectual challenge. Philosophy as well as literature and the arts are nourished by this human quest for knowledge and understanding.

Managing the Small College Library Rachel Applegate, 2010-09-16 This book helps directors of small college libraries to plan, staff, and organize their facilities and make the right decisions to effectively contribute to their college's mission. The purpose of this book is to provide the director of a small college library—typically defined as a facility managed by one to seven librarians—with information on every important managerial function specific to their facilities. This content will be much more useful for these library specialists than that of management books covering generic library management or targeted towards large academic settings. *Managing the Small College Library* covers the key responsibilities of the small college library director: personnel, planning, budgeting, and serving key constituencies. The author draws upon her in-depth knowledge of bureaucratic, political, and human resources managerial theory to explain how librarians can advance the mission of their library. It also includes an in-depth discussion of tenure and academic status for librarians, and examines the effects of both public and religious affiliation.

A History of Psychology in Western Civilization Bruce K. Alexander, Curtis P. Shelton, 2014-07-03 This book is a re-introduction to psychology. It focuses on great scholarly thinkers, beginning with Plato, Marcus Aurelius and St Augustine, who gave the field its foundational ideas long before better known 'founders', such as Galton, Fechner, Wundt and Watson, appeared on

the scene. Psychology can only achieve its full breadth and potential when we fully appreciate its scholarly legacy. Bruce Alexander and Curtis Shelton also argue that the fundamental contradictions built into psychology's history have never been resolved, and that a truly pragmatic approach, as defined by William James, can produce a 'layered' psychology that will enable psychologists to face the fearsome challenges of the twenty-first century. A History of Psychology in Western Civilization claims that contemporary psychology has overemphasized the methods of physical science and that psychology will need a broader scientific orientation alongside a scholarly focus in order to fully engage the future.

Divorced Fathers and Their Families Florence W. Kaslow, 2012-12-09 This book focuses on the experience of father's lives after a divorce, and how mental health professionals can help them create a healthy transition. Through the use of case examples critical issues are highlighted and discussed with supportive empirical findings and clinical insights. Traditionally, the marital legal sessions as well as the ultimate marriage settlement focus on the issues confronted by the ex-wife and mother and on

the custody and visitation plan for the children. This is actually supported by law in some places. This can remove the father from important qualitative issues such as what it is like to have children in two households, relationships with two sets of grandparents, where holidays will be spent, fair rotations of responsibility and how continuing parental discord can be resolved. The issues examined in this volume are relevant to a range of professionals who deal with divorcing couples from psychologists and family therapists to legal advisors and judges.
