1 and 2 Thessalonians Ben Witherington,2006-11-02 Paul's two letters to the Thessalonians stand as some of the very earliest Christian documents, yet they appear well into Paul's missionary career, giving them a unique context well worth exploring. In this first full-scale socio-rhetorical commentary on 1 and 2 Thessalonians, Ben Witherington gleans fresh insight from reading Paul's text in the light of rhetorical concerns and patterns, early Jewish theology, and the first-century historical situation in Macedonia.

Witherington's distinctive socio-rhetorical approach helps unearth insights that would otherwise remain hidden using only form criticism, epistolary categories, and traditional criticism. Witherington details Thessalonica's place as the metropolis of Macedonia, and he carefully unpacks the social situation of Paul and his recipients. Scholars will appreciate the careful analysis and rhetorical insights contained here, while Witherington's clear prose and sensitivity to Paul's ideas make this work ideal for all who desire a useful, readable commentary on 1 and 2 Thessalonians.

War in the Balkans Richard C. Hall,2014-10-09 This authoritative reference follows the history of conflicts in the Balkan Peninsula from the 19th century through the present day. The Balkan Peninsula, which consists of Albania, Bulgaria, Romania, Moldova, and the former Yugoslavia, resides in the southeastern part of the European continent. Its strategic location as well as its long and bloody history of conflict have helped to define the Balkans' role in global affairs. This singular reference focuses on the events, individuals, organizations, and ideas that have made this region an international player and shaped warfare there for hundreds of years. Historian and author Richard C. Hall traces the sociopolitical history of the area, starting with the early internal conflicts as the Balkan states attempted to break away from the Ottoman Empire to the assassination of Archduke Franz Ferdinand that ignited World War I to the Yugoslav Wars that erupted in the 1990s and the subsequent war crimes still being investigated today. Additional coverage focuses on how these countries continue to play an important role in global affairs and international politics.

*Emotions in Contemporary TV Series* Alberto N. García,2016-04-08 This edited collection offers a wide range of essays showcasing current research on emotions in TV series. Parameter Setting Thomas Roeper,Edwin Williams,2012-12-06 In May 1985 the University of Massachusetts held the first conference on the parameter setting model of grammar and acquisition. The conference was conceived in the belief that there is a new possibility of tightly connecting grammatical studies and language acquisition studies, and that this new possibility has grown out of the new generation of ideas about the relation of Universal Grammar to the grammar of particular languages. The papers in this volume are all concerned in one way or another with the 'parametric' model of grammar, and with its role in explaining the acquisition of language. Before summarizing the accompanying papers, I would like to sketch the intellectual background of these new ideas. It has long been the acknowledged goal of grammatical theorists to explicate the relation between the experience of the

child and the knowledge of the adult. Somehow, the child selects a unique grammar (by assumption) compatible with a random partially unreliable sample of some language. In the earliest work in generative grammar, starting with Chomsky's *Aspects*, and extending to such works as Jackendoff's *Lexicalist Syntax* (1977), the model of this account was the formal evaluation metric, accompanied by a general rule writing system. The model of acquisition was the following: the child composed a grammar by writing rules in the rule writing system, under the constraint that the rules must be compatible with the data, and that the grammar must be the one most highly valued by the evaluation metric.

**Executive Functions in Health and Disease** Elkhonon Goldberg, 2017-07-04

*Executive Functions in Health and Disease* provides a comprehensive review of both healthy and disordered executive function. It discusses what executive functions are, what parts of the brain are involved, what happens when they go awry in cases of dementia, ADHD, psychiatric disorders, traumatic injury, developmental disorders, cutting edge methods for studying executive functions and therapies for treating executive function disorders. It will appeal to neuropsychologists, clinical psychologists, neuroscientists and researchers in cognitive psychology. Encompasses healthy executive functioning as well as dysfunction Identifies prefrontal cortex and other brain areas associated with executive functions Reviews methods and tools used in executive function research Explores executive dysfunction in dementia, ADHD, PTSD, TBI, developmental and psychiatric disorders Discusses executive function research expansion in social and affective neuroscience, neuroeconomics, aging and criminology Includes color neuroimages showing executive function brain activity

**Misconceptions in Chemistry** Hans-Dieter Barke, Al Hazari, Sileshi

Yitbarek, 2008-11-18 Over the last decades several researchers discovered that children, pupils and even young adults develop their own understanding of how nature really works. These pre-concepts concerning combustion, gases or conservation of mass are brought into lectures and teachers have to diagnose and to reflect on them for better instruction. In addition, there are 'school-made misconceptions' concerning equilibrium, acid-base or redox reactions which originate from inappropriate curriculum and instruction materials. The primary goal of this monograph is to help teachers at universities, colleges and schools to diagnose and 'cure' the pre-concepts. In case of the school-made misconceptions it will help to prevent them from the very beginning through reflective teaching. The volume includes detailed descriptions of class-room experiments and structural models to cure and to prevent these misconceptions.

**New Waves in Philosophy of Action** J. Aguilar, A. Buckareff, K.

Frankish, 2010-10-29 A collection of original, state-of-the-art essays by some of the best young philosophers working on the myriad problems of action and agency. Each one has already made important contributions to the philosophy of action and cognate areas. The chapters reflect their research and make a significant contribution to some debate in the field.

**Extremism and Violent Extremism in Serbia** Valery Perry, 2019-04-30

The topics of extremism, violent extremism, and radicalization leading to terrorism have constituted an increasingly prominent area of policy interest and donor support in recent years, globally and in the western Balkans. Counterterrorism initiatives, as well as efforts to prevent and counter

violent extremism (P/CVE), often reveal the need for broader reform, peacebuilding, and democratization strategies. While foreign donors and domestic authorities tend to focus on ISIS-inspired violent jihadism, in many countries in the region, and particularly in the case of Serbia, there are other forms of extremism—namely far-right nationalism, violent hooliganism, and neo-Nazi movements—that are often considered to be more of an imminent threat, particularly as they are often viewed as examples of “normalized” political expression. The dynamics of reciprocal radicalization, in which competing extremisms feed off of, reinforce, and even need one another, can create seemingly intractable conflict spirals of escalation and violence. This volume explores these dynamics in Serbia through original research, taking fresh perspectives that demonstrate that Serbia is vulnerable to many types of extremism, which can best be prevented by achieving the liberal, democratic, rights-based reforms that have remained elusive for more than two decades. This broad and holistic approach is important for Serbia and its neighbors as the security lens through which most research has been focused to date has done little to explain the deep and structural dynamics of radicalization and extremism in the region.

**Circular Use of Resources** József H.c Popp, Fogarassy Csaba, David Christian Finger, 2020 Circular solutions are essential to tackle the eminent challenges of depleting resources and emerging environmental problems. The complex nature of material and energy systems and the changing of economic and technological conditions differ among countries and, therefore, lead to the application of vastly different practices in developed and rapidly developing countries of the world. A wide variety of theoretical approaches can be used to facilitate a shift from the linear use of resources to circular systems, e.g., circular product planning, life cycle planning, sharing and platform economy, refurbishing, and remanufacturing, to name but a few. The introduction and examination of circular solutions can be based on theoretical models in order to guarantee ensure successful application. Successful application of innovative technology approaches, business solutions, and organizational development can be facilitated through theoretical models and new scientific results that support innovation processes. This Special Issue reprint focuses on sustainable and innovative methods which help and enable the proper use and recovery of resources. We present a collection of research papers, reviews, research reports, and case studies that introduce or discuss circular solutions for the sustainable use of resources.

*A Better Way to Live* Og Mandino, 2010-12-29 The author recounts his descent into despair and his discovery of spiritual nourishment in the works of Aristotle, Emerson, Ben Franklin, and Plato, and enumerates the seventeen rules that helped transform his life. Og Mandino was one of the leading inspirational authors in the world. But once, he was a thirty-five-year-old derelict who nearly spent his last few dollars on a suicide gun. In *A Better Way to Live*, he describes the joyously redemptive process that turned a down-and-out alcoholic into a millionaire and a happy man within ten years. Og Mandino is the only person who could tell this heartwarming tale of personal triumph—because it is his own true story. And it can profoundly influence your life. Here are the principles that turned Og Mandino’s life around: his seventeen “Rules to Live By.” These simple, easy-to-follow rules comprise a sound, wise prescription for inner growth and for a fulfilling everyday life

that will work for you—just as it worked for Og Mandino. You can avoid spending even one more day feeling failure, grief, poverty, shame, or self-pity. Here is a better way to live: a way that literally saved Og Mandino's life, a way that can help make your dreams come true.

**Scales for Identifying Gifted Students (SIGS-2)** Gail R. Ryser, Kathleen McConnell, Laila Y. Sanguras, Todd Kettler, 2021-09-03 Scales for Identifying Gifted Students—Second Edition (SIGS-2) offers the most comprehensive observational instrument available for identifying gifted students grades K–12. Used as part of a comprehensive process for identifying gifted children, SIGS-2 offers schools an instrument with extensive statistical and research support. This Examiner's Manual includes the information the examiner needs to administer, score, and interpret the SIGS-2. Information relating to the standardization, reliability, and validity of the SIGS-2 is also found in the manual. To explore the full collection of SIGS-2 print and online resources, please visit:

**Planning Primer** Kenneth D. Orth, 1997 This pamphlet is an introduction to planning. It introduces you to the manner in which a planner approaches, analyzes and solves a problem. It begins with planning fundamentals, and proceeds step by step through a six step planning process. After the last step, some situations are identified in which planning can help you make decisions. A suggested list of sources for additional information completes the pamphlet.

**Inclusive Teaching in the Early Childhood Science Classroom** John T. Almarode, 2021-04-13 Focused on engaging all students, Inclusive Teaching in the Early Childhood Science Classroom walks readers through the process of planning, developing, and implementing science instruction for early learners. Drawing on a range of pedagogical processes and approaches, this comprehensive text links science to other disciplines and explores how we develop language, social-emotional, and content learning through early childhood science. Each chapter is framed around an essential question and features success criteria and reflection tasks to guide readers through the content. Aligned with the Next Generation Science Standards and addressing the Interstate New Teacher Assessment and Support Consortium Model Core Teaching Standards, this textbook is critical reading for preservice teacher education students enrolled in an inclusive early childhood or early childhood science methods course.

Talking About Leaving Elaine Seymour, 2000-08-01 This intriguing book explores the reasons that lead undergraduates of above-average ability to switch from science, mathematics, and engineering majors into nonscience majors. Based on a three-year, seven-campus study, the volume takes up the ongoing national debate about the quality of undergraduate education in these fields, offering explanations for net losses of students to non-science majors. Data show that approximately 40 percent of undergraduate students leave engineering programs, 50 percent leave the physical and biological sciences, and 60 percent leave mathematics. Concern about this waste of

talent is heightened because these losses occur among the most highly qualified college entrants and are disproportionately greater among women and students of color, despite a serious national effort to improve their recruitment and retention. The authors' findings, culled from over 600 hours of ethnographic interviews and focus group discussions with undergraduates, explain the intended and unintended consequences of some traditional teaching practices and attitudes. Talking about Leaving is richly illustrated with students' accounts of their own experiences in the sciences. This is a landmark study-an essential source book for all those concerned with changing the ways that we teach science, mathematics, and engineering education, and with opening these fields to a more diverse student body.

**Women & Other Animals** Bonnie Jo Campbell, 2002-09 An anthology of stories on human relationships. The story, Eating Aunt Victoria, traces the relationship of teenagers and their mother's lesbian lover, while in Bringing Home the Bones an accident in which a woman loses a leg improves her relations with her children.

*The Berkut* Joseph Heywood, 2015-03-01 A lost classic by beloved novelist Joseph Heywood that helped put the writer on the map, THE BERKUT begins at dusk as SS Colonel Gunter Brumm parachutes silently through the sulphuric haze in the smoldering ruins of Berlin, past the Soviet troops that encircle the skeleton that the city has become in April 1945. With the precision and skill that has marked his brilliant military career, Brumm has completed the first stage of a simple yet seemingly impossible mission: to evade the Allied forces swarming over Europe and to smuggle Herr Wolf, the greatest war criminal of the twentieth century, to safety. Less than twenty-four hours later a special Russian team snakes its way into Berlin's city limits, headed for the Reich Chancellery. It is led by Vasily Petrov, the Berkut-named after the Russian eagles trained to hunt wolves, a man handpicked by Stalin himself for his ability to track down his quarry and driven by the knowledge that failure means certain death. THE BERKUT is a classic story of pursuit, of hunters and the hunted, that pits two elite teams against each other-both of them brave, resourceful, of great physical prowess and so fully motivated that only the winners will survive. Scores of other characters populate this engrossing thriller: priests, deserters, partisans, Nazis on the run, Swiss guides, Austrian refugees-as well as a larger-than-life OSS operative who is the only person among the hundreds of thousands of Allied troops in Europe who realizes that Herr Wolf is not only alive but on the verge of escaping justice. Joseph Heywood's novel is a story of enormous conviction and urgency, made even more compelling for being based on facts that have yet to be proven fiction.

**Postsocialism** C.M. Hann, 2003-09 Social scientist did not predict the collapse of the socialist system in 1989-91. Their attempts to explain postsocialism have not been comprehensive. This book examines why, for the first time from an anthropological standpoint.
