War in the Balkans Richard C. Hall,2014-10-09 This authoritative reference follows the history of conflicts in the Balkan Peninsula from the 19th century through the present day. The Balkan Peninsula, which consists of Albania, Bulgaria, Romania, Moldova, and the former Yugoslavia, resides in the southeastern part of the European continent. Its strategic location as well as its long and bloody history of conflict have helped to define the Balkans' role in global affairs. This singular reference focuses on the events, individuals, organizations, and ideas that have made this region an international player and shaped warfare there for hundreds of years. Historian and author Richard C. Hall traces the sociopolitical history of the area, starting with the early internal conflicts as the Balkan states attempted to break away from the Ottoman Empire to the assassination of Archduke Franz Ferdinand that ignited World War I to the Yugoslav Wars that erupted in the 1990s and the subsequent war crimes still being investigated today. Additional coverage focuses on how these countries continue to play an important role in global affairs and international politics.

Principles of Tourism Management Johanna Muller,2016-06-03 There has been a recent upsurge in the tourism sector across the globe. This has facilitated the progress of tourism industry and its contribution to the economy of the world. This book is a collection of recent theories and concepts in the field. It covers a diverse array of topics such as cultural tourism, sustainable tourism, impact of economic and non-economic factors on tourism, importance of marketing, etc. The aim of this text is to bring forth the most innovative case studies to provide the readers with a truly global overview of the subject. It will serve as a resource guide for students, academicians, professionals and anyone else associated with the tourism sector.

Introduction to Structural Equation Models Otis Dudley Duncan,2014-06-28 Introduction to Structural Equation Models prepares the reader to understand the recent sociological literature on the use of structural equation models in research, and discusses methodological questions pertaining to such models. The material in first seven chapters is almost entirely standard, with the remaining four introducing progressively more open-ended issues, seducing the reader into beginning to think for himself about the properties of models or even to suggest problems that may intrigue the advanced student.

Plant Breeding: Past, Present and Future John E. Bradshaw,2016-03-08 This book aims to help plant breeders by reviewing past achievements, currently successful practices, and emerging methods and techniques. Theoretical considerations are also presented to strike the right balance between being as simple as possible but as complex as necessary. The United Nations predicts that the global human population will continue rising to 9.0 billion by 2050. World food production will need to increase between 70-100 per cent in just 40 years. First generation bio-fuels are also using crops and cropland to produce energy rather than food. In addition, land area used for agriculture may remain static or even decrease as a result of degradation and climate change, despite more land being theoretically available, unless crops can be bred which tolerate associated abiotic stresses. Lastly, it is unlikely that steps can be taken to mitigate all of the climate change predicted to occur by 2050, and beyond, and hence adaptation of farming systems and crop production will be required to reduce predicted negative effects on yields that will occur without crop adaptation. Substantial progress will therefore be required in bridging the yield gap between what is currently achieved per unit of land and what should be possible in future, with the best farming methods and best storage and transportation of food, given the availability of suitably adapted cultivars, including adaptation to climate change. My book is divided into four parts: Part I is an historical introduction; Part II deals with the origin of genetic variation by mutation and recombination of DNA; Part III explains how the mating system of a crop species determines the genetic structure of its landraces; Part IV considers the three complementary options for future progress: use of sexual reproduction in further conventional breeding, base broadening and introgression; mutation breeding; and genetically modified crops.

It gives an overview of the history, key concepts and the main providers of economic statistics.

CAPE Courtney N. Plante,Stephen Reysen,Thomas R. Brooks,Daniel Chadborn,2021-10-19 Researchers across disciplines have been studying the psychology of fans for decades. Seeking to better understand fan behavior and the various factors motivating fans, researchers have studied dozens of variables in hundreds of studies of different fan groups. To date, however, there have been relatively few attempts to integrate this sizable body of work, pulling together findings across from the field to with a broader, more holistic perspective. This book does exactly that, identifying and concisely summarizing research on 28 separate lines of inquiry on the psychology of fans and integrating it all into an empirically-validated model known as the CAPE model. Useful as a textbook for a fandom studies course and as a handbook for fan researchers, this book is essential reading for anyone looking to better understand the state of fan psychology and wanting to conduct their own research exploring the ins and outs of fans of all sorts!

Media and Religion Daniel A. Stout,2013-06-17 This text examines the history, theory, cultural context, and professional aspects of media and religion. While religion has been explored more fully in psychology, sociology, anthropology, and the humanities, there is no clear bridge of understanding to the communication discipline. Daniel A. Stout tackles this issue by providing a roadmap for examining this understudied area so that discussions about media and religion can more easily proceed. Offering great breadth, this text covers key concepts and historical highlights; world religions, denominations, and cultural religion; and religion and specific media genres. The text also includes key terms and questions to ponder for every chapter, and concludes with an in-class learning activity that can be used to encourage students to explore the media-religion interface and review the essential ideas presented in the book. Media and Religion is an ideal introduction for undergraduate students in need of a foundation for this emerging field.

Extremism and Violent Extremism in Serbia Valery Perry,2019-04-30 The topics of extremism, violent extremism, and radicalization leading to terrorism have constituted an increasingly prominent area of policy interest and donor support in recent years, globally and in the western Balkans. Counterterrorism initiatives, as well as efforts to prevent and counter violent extremism (P/CVE), often reveal the need for broader reform, peacebuilding, and democratization strategies. While foreign donors and domestic authorities tend to focus on ISIS-inspired violent jihadism, in many countries in the region, and particularly in the case of Serbia, there are other forms of extremism—namely far-right nationalism, violent hooliganism, and neo-Nazi movements—that are often considered to be more of an imminent threat, particularly as they are often viewed as examples of “normalized” political expression. The dynamics of reciprocal radicalization, in which competing extremisms feed off of, reinforce, and even need one another, can create seemingly intractable conflict spirals of escalation and violence. This volume explores these dynamics in Serbia through original research, taking fresh perspectives that demonstrate that Serbia is vulnerable to many types of extremism, which can best be prevented by achieving the liberal, democratic, rights-based reforms that have remained elusive for more than two decades. This broad and holistic approach is important for Serbia and its neighbors as the security lens through which most research has been focused to date has done little to explain the deep and structural dynamics of radicalization and extremism in the region.

Internet and Society Christian Fuchs,2007-12-12 In this exceptional study, Christian Fuchs discusses how the internet has transformed the lives of human beings and social relationships in contemporary society.

By outlining a social theory of the internet and the information society, he demonstrates how the ecological, economic, political, and cultural systems of contemporary society have been transformed by new ICTs. Fuchs highlights how new forms of cooperation and competition are advanced and supported by the internet in subsystems of society and also discusses opportunities and risks of the information society.

Ordinary People and the Media Graeme Turner,2010 The 'demotic turn' is a term coined by Graeme Turner to describe the increasing visibility of the 'ordinary person' in the media today. In this dynamic and insightful book he explores the 'whys' and 'hows' of the 'everyday' individual's willingness to turn themselves into media content through: · Celebrity culture, · Reality TV, · DIY websites, · Talk radio, · User-generated materials online. Initially proposed in order to analyse the pervasiveness of celebrity culture, this book further develops the idea of the demotic turn as a means of examining the common elements in a range of 'hot spots' in debates within media and cultural studies today. Refuting the proposition that the demotic turn necessarily carries with it a democratising politics, this book examines the political and cultural function of the demotic turn in media production and consumption across the fields of reality TV, print and electronic news and current affairs journalism, citizen and online journalism, talk radio, and user-generated content online. It examines these fields in order to outline a structural shift in what the western media has been doing lately, and to suggest that these media activities represent something much more fundamental than contemporary media fashion.
