Abbruzzese,2004 In 74 chapters, Gastrointestinal Oncology brings together a diverse group of specialists to provide the most authoritative, up-to-date and encyclopedic volume currently available on the subject. The first part of this text introduces a series of concepts and topics taht are important to gastrointestinal malignancies in general. These topics include epidemiologic principles, prevention, screening, familial GI cancers, developmental and molecular biology, pathobiology, general therapeutic principles, emerging therapies, and palliative care. The second part of the book covers each of the specific cancers affecting the human gastrointestinal tract. A Realistic Theory of Social Entrepreneurship Arvind Ashta,2019-11-22 Using evidence from the microfinance sector, which is considered a leading sector of social entrepreneurship, this book attempts to push the boundaries of research in this field. While recent studies consider that commercial enterprises, not-for-profits and social enterprises are formed by entrepreneurs with different personal identities, they do not explain why these personalities may change before they convert their social enterprises, and change further at the stage of transitioning into commercial enterprises. Presenting a theory of development and evolution for social enterprises which examines the dynamics associated with change, impact and growth and an in-depth critical view of motivation, funding and profit, this book examines how that impacts the social mission and enterprise structure in the wake of hybrid and for-profit models and corporate philanthropy. The author highlights the ‘cracks’ in social entrepreneurship and asks how they are being filled, institutionally.

*Advanced Technologies for Microfinance: Solutions and Challenges* Ashta, Arvind,2010-08-31 Advanced Technologies for Microfinance: Solutions and Challenges is the first book to systematically address technology's impact on microfinance. It discusses a wide variety of technology applications that will define the next generation of the microfinance movement and it addresses the tough questions surrounding technology in microfinance. For instance, what are the disadvantages of technology-enabled microfinance and what will it mean for the inclusiveness and empowerment of the service? This dynamic collection is a must-have for anyone interested in microfinance, whether you are a donor, lender, or investor.

Colonialism and Missionary Linguistics Klaus Zimmermann,Birte Kellermeier-Rehbein,2015-03-10 A lot of what we know about “exotic languages” is owed to the linguistic activities of missionaries. They had the languages put into writing, described their grammar and lexicon, and worked towards a standardization, which often came with Eurocentric manipulation. Colonial missionary work as intellectual (religious) conquest formed part of the Europeans' political colonial rule, although it sometimes went against the specific objectives of the official administration. In most cases, it did not help to stop (or even reinforced) the displacement and discrimination of those languages, despite oftentimes providing their very first (sometimes remarkable, sometimes incorrect) descriptions. This volume presents exemplary studies on Catholic and Protestant missionary linguistics, in the framework of the respective colonial situation and policies under Spanish, German, or British rule. The contributions cover colonial contexts in Latin America, Africa, and Asia across the centuries. They demonstrate how missionaries dealing with linguistic analyses and descriptions cooperated with colonial institutions and how their linguistic knowledge contributed to European domination.

**Environmental Hazards and Neurodevelopment** Cindy Croft,2021-03-31 This title includes a number of Open Access chapters. The rate of identification of children with neurobiological disabilities has been on the increase in recent years. Millions of dollars in research are being spent to understand the factors influencing these increases. The articles within this compendium shed vital light on this issue, confirming that various ordinary chemical hazards-of the sort encountered by countless children in their everyday lives-are having serious impacts on development. This volume investigates the impact of exposure to tobacco smoke, household chemicals, lead, agricultural toxins, and flame retardants.

Child and Adolescent Psychiatry David Coghill,2009 The importance of the mental health of young people is increasingly recognised, leading to a much needed expansion of services and significant increase in staff numbers, including doctors, psychologists and specialist nurses. This handbook is an comprehensive but also rapidly accessible text in this growing speciality.
