*God and Jetfire* Amy Seek, 2015-07-14 A searching, eloquent memoir about the joys and hardships of open adoption God and Jetfire is a mother's account of her decision to surrender her son in an open adoption and of their relationship over the twelve years that follow. Facing an unplanned pregnancy at twenty-two, Amy Seek and her ex-boyfriend begin an exhaustive search for a family to raise their child. They sift through hundreds of Dear Birth Mother letters, craft an extensive questionnaire, and interview numerous potential couples. Despite the immutability of the surrender, it does little to diminish Seek's newfound feelings of motherhood. Once an ambitious architecture student, she struggles to reconcile her sadness with the hope that she's done the best for her son, a struggle complicated by her continued, active presence in his life. For decades, closed adoptions were commonplace. Now, new laws are guaranteeing adoptees' access to birth records, and open adoption is on the rise. God and Jetfire is the rare memoir that explores the intricate dynamics and exceptional commitment of an open-adoption relationship from the perspective of a birth mother searching for her place within it. Written with literary poise and distinction, God and Jetfire is a story of a life divided between grief and gratitude, regret and joy. It is an elegy for a lost motherhood, a celebration of a family gained, and an apology to a beloved son.

**Hurricane Hunters and Tornado Chasers** Gary Jeffrey, Gianluca Garofalo, 2008-01-15 Sketches featuring three storm chasers presented in graphic novel format accompany information about the history of storm chasing and requirements for the job of storm chaser.

*The Gathering Storm* Mack Maloney, Brian Kelleher,

*What Stands in a Storm* Kim Cross, Kimberly Hisako Cross, 2015-03-10 Immersive reporting and dramatic storytelling from the middle of the horrific superstorm of April 2011, a weather event that killed 348 people--Provided by publisher.

*Category 7* Bill Evans, Marianna Jameson, 2007-07-10 A Category 4 hurricane, with winds of up to 155 miles per hour, tears roofs off buildings, smashes windows and doors, and can send floodwaters up to the second floor. Evacuation is suggested for up to six miles inland. Hurricane Katrina was a Category 4 when she made landfall. Hurricane Simone is a Category 7—the biggest, strongest storm in recorded history. When she hits New York City, skyscrapers will fall. Subways and tunnels will flood. Lower Manhattan and much of Queens and Brooklyn will disappear under more than thirty feet of water. All along the Eastern Seaboard, towns and cities are being evacuated as wind-driven rain lashes the coast and storm surges crash through seawalls. Roads are packed with fleeing motorists whose cars are jammed with every personal possession that can be crammed in, plus family members, friends, and beloved pets. A huge natural disaster is brewing in the Atlantic. Except that Simone isn't natural. She's the product of rogue weather science being wielded by billionaire Carter Thompson as part of a personal vendetta against US President Winslow Benson. Once Carter wanted to bring rain to the desert and feed the starving peoples of the planet. Now he wants to show Benson—and the rest of the world—just how powerful wind and water can be. If technology created Simone, perhaps technology can stop her. It's up to Kate Sherman, once a member of Carter's weather team; and Jake Baxter, a weatherman for the CIA, to try, using a secret US Navy weapon. The catch? It has to be deployed inside the hurricane. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Storm Surge** John F. Banas, 2021-06-16 All is not what it seems. A lot can happen to a person in a Disaster Area... Brenda Meyers is

having a bad day. Her daughter is trapped somewhere in New Orleans right before Hurricane Katrina strikes. Her increasingly estranged husband may be on the verge of losing yet another job. To top it all off, her cheating former fiancé is claiming to have evidence that his wife and Brenda's husband are having an affair. But nothing matters more than finding and rescuing her daughter. Brenda insists that a rescue mission can be made before the storm hits. Her husband isn't so keen on the idea – he's heard that the city may flood, making the rescue even harder. So, when her former fiancé offers his boat and his help, Brenda reluctantly accepts, knowing full well that her husband and Ex cannot get along. Her worries prove correct; while racing the raging storm, she uncovers a fiendish plot to murder her well insured husband - who happens to harbor secrets of his own. Will she be able to survive the ravages of Katrina, find her daughter, and prevent a professional hit without painting a target on her own back?

Storm Surge Taylor Anderson, 2014-05-06 In the Pacific, as USS Walker is repaired and updated after a previous battle and Matt Reddy is healing from his wounds, planning begins for a bold raid on the very heart of the Grik Empire. But time is running out for the Alliance army in Indiaa, and the Allied forces in the west must gather in an unprecedented land, air, and sea campaign to destroy the mighty Grik battle fleet and break through to their relief. All other plans go on hold when the attempt proves more difficult—and more heartbreakingly costly—than anyone imagined. Meanwhile, the struggle continues on other fronts near and far: in the jungles of Borno in distant southern Africa and in the Americas, where the Allies are finally learning the terrible truth about the twisted Dominion. The Alliance is on the offensive everywhere, but their enemies have a few surprises, including new weaponry and new tactics...and a stunning geographic advantage that Reddy never suspected. Until now.

What Stands in a Storm Kim Cross, 2016-03 Enter the eye of the storm in this gripping real-life thriller—A Perfect Storm on land—that chronicles America's biggest tornado outbreak since the beginning of recorded weather: a horrific three-day superstorm with 358 separate tornadoes touching down in twenty-one states and destroying entire towns. April 27, 2011 was the climax of a three-day superstorm that unleashed terror from Arkansas to New York. Entire communities were flattened, whole neighborhoods erased. Tornadoes left scars across the land so wide they could be seen from space. But from terrible destruction emerged everyday heroes—neighbors and strangers who rescued each other from hell on earth. “Armchair storm chasers will find much to savor in this grippingly detailed, real-time chronicle of nature gone awry” (Kirkus Reviews) set in Alabama, the heart of Dixie Alley where there are more tornado fatalities than anywhere else in the US. With powerful emotion and captivating detail, journalist Kim Cross expertly weaves together science and heartrending human stories. For some, it's a story of survival; for others it's the story of their last hours. Cross's immersive reporting and dramatic storytelling catapult you to the center of the very worst hit areas, where thousands of ordinary people witnessed the sky falling around them. Yet from the disaster rises a redemptive message that's just as real: in times of trouble, the things that tear our world apart reveal what holds us together.

The Thunderstorm United States. Weather Bureau, Horace Robert Byers, Roscoe R. Braham, 1949

Category 5 Ernest Zebrowski, Judith A. Howard, 2007-05-08 The epic story of the real victims of a perfect storm—overwhelmingly the poor—left behind in the aftermath of a deadly hurricane “A riveting new book.” —Tallahassee Democrat “Not simply an historical account of a storm thirty-seven years ago but a living, breathing entity brimming with the modern-day reality that, yes, it can happen again.” —American Meteorological Society Bulletin Fascinating, easy-to-read, yet informative.” —Richmond Times-Dispatch “Almost like sitting in front of the television watching the events unfold. A page-turner from the very first page.” —Ruston Morning Paper “There is

much we can all learn from this relevant and highly engaging chronicle.” — Biloxi Sun Herald “A must-read for anyone who wants to take an emotional stroll through the rubble of these Gulf Coast fishing communities and learn what happened.” —Apalachicola Times “Should be required reading for anyone living in the path of these terrible storms.” —Moondance.org As the unsettled social and political weather of summer 1969 played itself out amid the heat of antiwar marches and the battle for civil rights, three regions of the rural South were devastated by the horrifying force of Category 5 Hurricane Camille. Camille’s nearly 200 mile per hour winds and 28-foot storm surge swept away thousands of homes and businesses along the Gulf Coast of Louisiana and Mississippi. Twenty-four oceangoing ships sank or were beached; six offshore drilling platforms collapsed; 198 people drowned. Two days later, Camille dropped 108 billion tons of moisture drawn from the Gulf onto the rural communities of Nelson County, Virginia—nearly three feet of rain in 24 hours. Mountainsides were washed away; quiet brooks became raging torrents; homes and whole communities were simply washed off the face of the earth. In this gripping account, Ernest Zebrowski and Judith Howard tell the heroic story of America’s forgotten rural underclass coping with immense adversity and inconceivable tragedy. Category 5 shows, through the riveting stories of Camille’s victims and survivors, the disproportionate impact of natural disasters on the nation’s poorest communities. It is, ultimately, a story of the lessons learned—and, in some cases, tragically unlearned—from that storm: hard lessons that were driven home once again in the awful wake of Hurricane Katrina. Ernest Zebrowski is founder of the doctoral program in science and math education at Southern University, a historically black university in Baton Rouge, Louisiana, and Professor of Physics at Pennsylvania State University’s Pennsylvania College of Technology. His previous books include *Perils of a Restless Planet: Scientific Perspectives on Natural Disasters*. Judith Howard earned her Ph.D. in clinical social work from UCLA, and writes a regular political column for the Ruston, Louisiana, Morning Paper.

**In the Eye of the Storm** Steven M. Banka, 2010-10-11 In 2005 hurricane Katrina hit the gulf coast. In New Orleans it wasn't the hurricane you had to survive but the aftermath that came. Everyone thought the water flooding the city was the worst that could happen, they were wrong. With every chapter seemingly at the end, it got worse. See how one man survived the odds and cheated death. The Convention Center in New Orleans turned into hell for one week. Everything you can imagine bad happened. Be prepared for what you are about to read.

**The Great Hurricane, 1938** Cherie Burns, 2007-12-01 “Before there was the Perfect Storm, there was the Great Hurricane of 1938. A riveting and wonderfully written account.” —Nathaniel Philbrick On the night of September 21, 1938, news on the radio was full of the invasion of Czechoslovakia. There was no mention of any severe weather. By the time oceanfront residents noticed an ominous color in the sky, it was too late to escape. In an age before warning systems and the ubiquity of television, this unprecedented storm caught the Northeast off guard, obliterated coastal communities on Long Island and in New England, and killed nearly seven hundred people. The Great Hurricane, 1938 is a spellbinding hour-by-hour reconstruction of one of the most destructive and powerful storms ever to hit the United States. With riveting detail, Burns weaves together countless personal stories of loved ones lost and lives changed forever—from those of the Moore family, washed to sea on a raft formerly their attic floor, to Katharine Hepburn, holed up in her Connecticut mansion, watching her car take to the air like a bit of paper. “A very good book.” —The Washington Post

**Run the Storm** George Michelsen Foy, 2019-08-06 In the bestselling tradition of *The Perfect Storm* and *The Finest Hours*, “an exquisitely written and dramatic book...a literary page-turner” (Doug Stanton, #1 New York Times bestselling author of *Horse Soldiers*)—the 2015 mysterious disappearance of the SS *El Faro*, a gigantic American cargo ship that sank in the Bermuda Triangle,

taking with it thirty-three lives. On October 1, 2015, the SS El Faro, a massive American cargo ship disappeared in Hurricane Joaquin, a category 4 storm. The ship, its hundreds of shipping containers, and its entire crew plummeted to the bottom of the ocean, three miles down. It was the greatest seagoing US merchant marine shipping disaster since World War II. The massive ship had a seasoned crew, state-of-the-art navigation equipment, and advance warning of the storm. It seemed incomprehensible that such a ship could sink so suddenly. How, in this day and age, could something like this happen? Relying on Coast Guard inquest hearings, as well as on numerous interviews, George Michelsen Foy brings us “the most insightful exploration of this unthinkable disaster” (Outside), a story that lasts only a few days, but which grows almost intolerably suspenseful as deep-rooted flaws leading to the disaster inexorably link together and worsen. We see captain, engineers, and crew fight for their lives, and hear their actual words (as recorded on the ship’s black box) while the hurricane relentlessly tightens its noose around the ship. We watch, minute by minute, all that is happening on board—the ship’s mysterious tilt to one side, worried calls to the engine room, ship-to-shore reports, the courage of the men and women as they fight to survive, and the berserk ocean’s savage consumption of the massive hull. And through it all, the pain and ultimate resilience of the families of El Faro’s crew. Now with a new afterword, this “tour de force of nautical expertise” (Ocean Navigator) is a masterwork of stunning power.

**Storm Kings** Lee Sandlin,2013-03-05 In Storm Kings, Lee Sandlin retraces America's fascination and unique relationship to tornadoes and the weather. From Ben Franklin's early experiments, to the great storm debates of the nineteenth century, to heartland life in the early twentieth century, Sandlin shows how tornado chasing helped foster the birth of meteorology, recreating with vivid descriptions some of the most devastating storms in America's history. Drawing on memoirs, letters, eyewitness testimonies, and numerous archives, Sandlin brings to life the forgotten characters and scientists that changed a nation and how successive generations came to understand and finally coexist with the spiraling menace that could erase lives and whole towns in an instant.

The Storm from Hell Enock Lynn Norrbom,2011-10 Jerry noticed that he was not in a mental fog any longer. In fact, it was like he had not taken a drink at all. The reality of all of this had sobered him up. There seemed to be a lot of noise coming from about two hundred yards away by some rocks. Jerry started to move in the direction of the rocks. There were a lot of lights and people around the edge of the rocks, and as Jerry got closer, he still could not see everything, but he could hear some whistling or high-pitched screaming. Jerry didn't understand until he got much closer and could see three or four dolphins caught in a small pool of water--too small, in fact, for them to survive, and the people around were talking and pointing their flashlights at them. Once Jerry reached them, he asked, Does anyone know just what has caused the water to recede? Just then an older man answered, Well, I don't know for sure, but the news says that the entire west coast is just like this, and no one seems to know why.

**Tornadoes & Superstorms** Gary Jeffrey,2007-01-15 Three stories in graphic novel format illustrate the power of tornadoes and storms by relating events that occurred on three separate occasions in 1925, 1991, and 1997.

**Chem Storm** Joe Barfield,2010-11-28 Jean Alexander, a reporter for The Houston Post, has gained unauthorized access to a chemical plant where she finds five dead bodies. She wants to know why they died.A Civil/Chemical Engineer, Travis Selkirk, agrees to show her the dangers that exist on the Houston Ship Channel.Now they must race to save Houston from a disaster worse than a nuclear explosion”a chemical storm!

**Southern Storm** Samme Chittum,2018-04-03 The gripping true tale of a devastating plane crash, the investigation into its causes,

and the race to prevent similar disasters in the future. On the afternoon of April 4, 1977, Georgia housewife Sadie Burkhalter Hurst looked out her front door to see a frantic stranger running toward her, his clothes ablaze, and behind him the mangled fuselage of a passenger plane that had just crashed in her yard. The plane, a Southern Airways DC-9-31, had been carrying eighty-one passengers and four crew members en route to Atlanta when it entered a massive thunderstorm cell that turned into a dangerous cocktail of rain, hail, and lightning. Forced down onto a highway, the plane cut a swath of devastation through the small town of New Hope, breaking apart and killing bystanders on the ground before coming to rest in Hurst's front yard. Ultimately, only twenty-two people would survive the crash of Flight 242, and urgent questions immediately arose. What caused the pilots to fly into the storm instead of away from it? Could the crash have been prevented? *Southern Storm* addresses these issues and many more, offering a fascinating insider's look at this dramatic disaster and the systemic overhauls that followed it.
