Advanced Design John Reis,2022-04-17 This book is about design. Everybody does design, from artists to engineers, from interior designers to industrial designers. We design our days and we design our lives. This book presents the three universal activities that everyone uses, no matter who they are or what they do. These three activities are 1.) clarify an ambiguous project, 2.) generate ideas, and 3.) select one idea for implementation. This book also presents how the psychology of design impacts our effectiveness with each of these three activities, from creativity through decision making, intuition through analysis, and cognitive enhancement through design biases. Although the examples provided in this book primarily target the diverse disciplines of art (painting) and engineering, they can be easily understood and adapted by designers in any discipline. This book helps advanced design students and working professionals in any discipline to understand why and when the basic design principles they were taught work or do not work and, as a result, improve their design effectiveness.

East Bay Hills: A Brief History Amelia Sue Marshall,2017 Like the mist rising from San Francisco Bay encircles the towering redwoods, the little-known legends of the East Bay Hills enrich a glorious history. Follow the trails of Saclan and Jalquin-Yrgin people over the hills and through the valleys. Ride with the mounted rangers through the Flood of '62. Break into a sealed railroad tunnel with a pack of junior high school boys. Learn how university professors, civil servants and wealthy businessmen planned for years to create a chain of parks twenty miles along the hilltops. Author Amelia Sue Marshall explores the heritage of these storied parklands with the naturalists who continue to preserve them and the old-timers who remember wilder days.
