Drama Education and Dramatherapy Clive

Holmwood,2014-06-05 Dramatherapy is increasingly being used in schools and educational establishments as a way of supporting young people's emotional needs. This book examines the space between drama education and Dramatherapy exploring the questions: Does a therapist teach? When does the role of the drama teacher border on that of therapist? How do these two professions see and understand each other and the roles they play? In Drama Education and Dramatherapy, Clive Holmwood draws on his experience as a Dramatherapist and examines the history of drama education and Dramatherapy, exploring the social, political, therapeutic and artistic influences that have impacted these two professions over the last century. He also discusses how these fields are intrinsically linked and examines the liminal qualities betwixt and between them. The book considers two specific case studies, from the therapist's and teacher's perspectives discussing what happens in the drama class and therapy space including how the dramatic form is understood, explored and expressed both educationally and therapeutically. The 'them and us' mentality, which often exists in two different

professions that share a common origin is also explored. The book contemplates how teachers and Dramatherapists can work collaboratively in the future, bringing down barriers that exist between them and beginning a working dialogue that will ultimately and holistically support the children and young people they all work with. This book will be of interest to those involved in using drama in an educational or therapeutic context, including: drama teachers, arts therapists, teachers of arts therapy and researchers within wider arts, applied arts and educational faculties within colleges and universities.

Dramatherapy with Children, Young People, and Schools

Lauraine Leigh, 2012 This professional handbook evaluates the considerable benefits of dramatherapy in educational settings. A variety of highly experienced dramatherapists, educational psychologists and childhood experts comment on its merits in relation to the involvement of school staff, children, adolescents and families.

Process in the Arts Therapies Ann Cattanach, 1999 Arts therapists are becoming increasingly interested in process as it is manifested in their work. The multiplicity of levels at which process operates is the theme of this new book. What happens during a

therapy session is examined, as are the client's response, which is experienced through the medium of the art form itself, and the evolution of the relationship between therapist and client.

Perspectives from across the arts therapy spectrum are included, with contributions from practitioners in dramatherapy, play therapy, music therapy, and dance movement therapy. Re-evaluating the nature of practice, *Process in the Arts Therapies* expands and develops the theory.

Theatre, Ritual and Transformation Sue Jennings, 2018-12-20

Sue Jennings and her three children spent two years on a fieldwork expedition to the Senoi Temiar people of Malaysia: *Theatre, Ritual and Transformation* is a fascinating account of that experience. She describes how the Temiar regularly perform seances which are enacted through dreams, dance, music and drama, and explains that they see the seance as playing a valuable preventative role in people's lives, as well as being a medium of healing and cure. Her account brings together the insights of drama, therapy and theatre with those of social anthropology to provide an invaluable theoretical framework for understanding theatre and ritual and their links with healing.

Drama as Therapy Phil Jones, 2007 Examines the ways clients

and therapists explore the therapeutic possibilities of drama, focusing on clinical material from a range of contexts, with description and analysis of clinical work.
