Jurassic Park James Wtorkowski, 2020-04 Wealthy businessman John Hammond has created an animal theme park called Jurassic Park, featuring cloned dinosaurs and prehistoric plants, on the Costa Rican island of Isla Nublar. Following an accident at the site in which a worker is killed, lawyer Donald Gennaro, representing Hammond's investors, insists that he gets experts to certify his park is safe. Hammond takes a group consisting of Gennaro, mathematician and chaos theorist Ian Malcolm, paleontologist Dr. Alan Grant and paleobotanist Dr. Ellie Sattler, to see the park. They are shocked to see living dinosaurs, including Brachiosaurus, upon arriving. Hammond reveals that the dinosaurs were created by a team of genetic scientists through cloning, a process that uses preserved ancient DNA from mosquitoes that are found inside amber, with DNA from frogs being used to fill in missing genomes. Chief geneticist Dr. Henry Wu points out that breeding is prevented by having all dinosaurs genetically engineered as females, but Malcolm theorizes that nature will overcome this obstacle in time. Hammond arranges for the group, joined by his grandchildren Tim and Lex, to take a tour of the island in electric vehicles, while he oversees the tour from the control room with computer worker Ray Arnold and lead computer programmer Dennis Nedry. The group encounters a sick Triceratops during the tour, but other dinosaurs fail to appear, and the tour is cut short when a tropical storm approaches the island. Sattler stays behind with the park's veterinarian to study the Triceratops, while the rest of the group heads back to the visitor center. Nedry had earlier been approached by Dodgson, a representative of a rival corporation, to steal dinosaur embryos for them. With most of the park's employees leaving for the mainland, Nedry shuts down the park's security systems to gain access to the embryos and the island's dock, where he will drop off the embryos. Nedry's sabotage also cuts power to the tour vehicles, stranding them in front of

the Tyrannosaurus rex paddock as the storm hits. The Tyrannosaurus escapes the paddock and attacks the vehicles, devouring Gennaro, injuring Malcolm, and forcing Grant, Tim and Lex into the park's dinosaur reserves. Sattler, joining the park's game warden Robert Muldoon, attempts to rescue them, but they are only able to find Malcolm and must retreat with him when the Tyrannosaurus briefly pursues them. Nedry, having acquired the embryos, attempts to reach the dock, but loses his way in the storm, becomes stranded, and is killed by a Dilophosaurus. The storm passes, and the following morning, Grant and the children come across broken egg shells. Grant deduces that the dinosaurs were given the DNA of west African frogs, who can change from male to female in a single-sex environment, thus proving Malcolm right that breeding control methods would fail. The trio proceeds to return to the visitor center.

Jurassic Florida Hunter Shea, 2018-06-19 FLORIDA. IT'S WHERE YOU GO TO DIE. Welcome to Polo Springs, a sleepy little town on Florida's Gulf Coast. It's a great place to live—if you don't mind the hurricanes. Or the flooding. Or the unusual wildlife . . . IGUANAS. THEY'RE EVERYWHERE. Maybe it's the weather. But the whole town is overrun with the little green bastards this year. They're causing a lot of damage. They're eating everything in sight. And they're just the babies . . . HUMANS. THEY'RE WHAT'S FOR DINNER. The mayor wants to address the iguana problem. But when Hurricane Ramona slams the coast, the town has a bigger problem on their hands. Bigger iguanas. Bigger than a double-wide. Unleashed by the storm, this razor-toothed horde of prehistoric predators rises up from the depths—and descends on the town like retirees at an early bird special. Except humans are on the menu. And it's all you can eat . . . *Raves for The Montauk Monster* “Old school horror.” —Jonathan Maberry “A lot of splattery fun.” —Publishers Weekly “Frightening, gripping.” —Night Owl Reviews

Islands in Deep Time Markes E. Johnson,2023-10-31 Hilltops surrounded by farmland in southern Wisconsin turn out to be the eroded remnants of an ancient archipelago. An island in the Yellow Sea where Korean tourists flock is the peak of a flooded mountain rising from a drowned continental shelf. From a mountaintop shrine to Genghis Khan in Inner Mongolia, the silhouette of a Silurian seascape can be spotted. On the shores of Hudson Bay, where polar bears patrol the Arctic

tundra, a close look unveils what was a tropical coastline encrusted with corals nearly 450 million years ago. The geologist Mark E. Johnson invites readers on a journey through deep time to find the traces of ancient islands. He visits a dozen sites around the globe, looking above and below today's waterlines to uncover how landscapes of the past are preserved in the present. Going back 500 million years to the Cambrian through the Pleistocene 125,000 years ago, this book reconstructs how "paleoislands" appeared under different climatic conditions and environmental constraints. Finding vestiges of prehistoric ecologies, Johnson emphasizes the complexity of island ecosystems and the importance of preserving these significant sites. Inviting and accessible, this book is a travelogue that takes readers through time as well as space. *Islands in Deep Time* shares the adventure of exploring striking locations across geologic eras and issues a passionate call for their conservation.

Will Solvit and the T-rex Terror Zed Storm, 2010 With the help of his dad's crazy inventions, Will embarks on an adventure and the mystery just keeps growing. In this adventure, he deals with one hungry T-rex, two lost parents, a trail of secret letters and a broken time-travelling machine.

The Making of the Lost World, Jurassic Park Jody Duncan, 1997 Hollywood hit-maker Steven Spielberg wowed the world with his Oscar-winning film version of Michael Crichton's bestseller *Jurassic Park*. The mighty dinosaurs return to the screen in this summer's *The Lost World*. This fascinating book slips behind the cameras and into the studios and workshops and goes on location to provide a look at how the mega-movie sequel was made. Color photos throughout.

Between Light and Storm Esther Woolfson, 2022-12-06 A landmark examination of the fraught relationship between humans and animals, taking the reader from Genesis to climate change. Beginning with the very origins of life on Earth, Woolfson considers prehistoric human-animal interaction and traces the millennia-long evolution of conceptions of the soul and conscience in relation to the animal kingdom, and the consequences of our belief in human superiority. She explores our representation of animals in art, our consumption of them for food, our experiments on them for science, and our willingness to slaughter them for sport and fashion, as well as examining concepts of love and ownership. Drawing on philosophy and theology, art and history, as well as her own experience of living with animals and coming to know, love, and respect them as individuals, Woolfson examines some of the most complex ethical issues surrounding our treatment of animals and argues passionately and persuasively for a more humble, more humane, relationship with the creatures who share our world.

Taphonomy Peter A. Allison, David J. Bottjer, 2010-11-03 Taphonomic bias is a pervasive feature of the fossil record. A pressing concern, however, is the extent to which taphonomic processes have varied through the ages. It is one thing to work with a biased data set and quite another to work with a bias that has changed with time. This book includes work from both new and established researchers who are using laboratory, field and data-base techniques to characterise and quantify the temporal and spatial variation in taphonomic bias. It may not provide all the answers but it will at least shed light on the right questions.

The Screen Traveler's Guide DK, 2023-10-24 Put yourself in the movie! Step inside dozens of real-life locations with this gloriously geeky, map-filled compendium. Locations are everything. They transport us to far-flung worlds and dystopian futures, and provide the backdrop to intergalactic battles and rampaging monsters. Our most obsessed-about stories would be nothing without them.

Meticulously researched and compiled by self-proclaimed superfans and travel experts, The Screen Traveler's Guide maps the real-life locations behind your favorite shows and scenes. Follow the Avengers' battle of New York, discover the Croatian location for Game of Thrones' King's Landing, find out how New Zealand transformed into Lord of the Rings' Middle Earth, uncover exactly where the magical world of Harry Potter is set - and much more. Along the way, you'll discover the landmarks to avoid during an alien invasion, the strangest location stand-ins (did you know, for example, that Liverpool stood in for Brooklyn in Captain America?), the place that's doubled as more countries than any other, and lots of travel inspiration from your pop culture cornerstones. Welcome to the ultimate travel guide for every screen geek.

Don't Move! Walter Simonson, 2013-08-01 As a storm quickly approaches the island, Ellie stops the park tour in order to look at a sick triceratops, and Dennis Nedry resets the computer system with dire consequences for everyone still on the island.

Jurassic Sea Viktor Navikov, 2016-05-19 Fresh off of a horrifying trek to a fabled island where dinosaurs nearly killed him, B-list celebrity Colt McKinnon finds himself heading directly back into the world of the unexplained. This time, his new employer is sending him into the area known as the Bermuda Triangle. Recent storm surges and electromagnetic anomalies have seen an upswing in

strange activity in the area. Happy to dive back into a journey into the unexplained and out of the shadows of the dinosaurs that neatly killed him, Colt happily packs his bags But when the Triangle dumps him into a sea stranded somewhere in the cracks of time, Colt soon learns that he may not be done running from dinosaurs after all.
