Meteorology Karen Bush Gibson, 2017-08-15 Does the weather fascinate you? Thunderstorms, tornados, hurricanes, and snowstorms are just some of the weather events that affect people's everyday lives. Since the time of the Ancient Greeks, people have been fascinated with weather phenomena and how they relate to human activities, such as sailing and farming. Meteorology is the science of the atmosphere, particularly the processes and phenomena that are used in forecasting the weather, and how weather relates to the oceans and climate. Long-term climate patterns, such as El Niño, don't just affect weather. They disrupt global atmospheric circulation, ocean currents, and the economies of many countries. Every day, thousands of meteorologists observe and record measurements at more than 10,000 weather stations on land and sea throughout the world. Data also comes from satellites, weather balloons, and radar. This data is transmitted to weather centers of the world, where computer models produce the information used in weather prediction. *Meteorology: Cool Women Who Weather Storms* introduces readers ages 9 to 12 to three women in meteorology who are making an impact and inspiring future generations of

meteorologists. Kelly Cass is a broadcast meteorologist at the Weather Channel with a particular interest in severe weather. Bianca Hernandez works as a meteorologist for the National Weather Service in their Phoenix office. Pam Heinselman is a professor and Research Scientist with the National Severe Storms Lab. This nonfiction STEM title serves as a bridge between girls' interests and their potential careers in meteorology by telling captivating stories about real-life meteorologists and the many ways meteorology benefits society. Meteorology isn't just about storm tracking, it's about how the atmosphere affects the earth in the past, present, and future. Advances in meteorology are strongly connected with developments in science, technology, engineering, and mathematics. Readers will be encouraged to investigate how atmospheric forces affect our lives and how using scientific and mathematical principles allow meteorologists to predict the weather and save lives.

Dancing During the Storm Karen Anderson, 2017-09-21 Dancing During the Storm is a collection of stories from projects that I have written over the years. They represent a desire to praise God despite the storms in my life. As the saying goes, you are going into a storm, in the middle of a storm or coming out of a storm. All of these stories tell of people who enjoy the life that God has given them and live it to the fullest. Each character has a storm in their life which they are going into, in the midst of, or coming out of. The first story is about the first man to ever encounter a storm and the impact on his life. The second story is about a court case that changed the lives of three of the women involved. A Victim. A Juror. A Judge. The impact of the trial changed their thinking, yet prepared them for all that life threw at them. The third and fourth story is a science fiction tale of the journey of a young woman who searched for peace and quiet after spending the last two years on a planet that had to resemble hell. As she emerged from the storms of her life, she saw that things were not as easy as she thought they would be. The fifth story is another science fiction story that showed a divided world on the brink of war and two women meet to decide the fate of all the women on the planet. This meeting determined if it would either draw everyone together or increase the divide. Would it be treason or slavery? The sixth story two bullets changed the life of a man who had cruised through life on the back of rich parents and affluence. Enjoy these fun, thought provoking stories, and hear the underlying intent.
