*Molecular Docking and Molecular Dynamics* Amalia Stefaniu, 2019-12-18 This book clearly explains the principles of in silico tools of molecular docking and molecular dynamics. It provides examples of algorithms and procedures proposed by different software programs for visualizing and identifying potential interactions in complexes of biochemical interest. The book is structured in six chapters, each of which discusses different molecular simulation methodologies and provides concrete examples of complexes interactions. In each chapter authors give an overview of the treated subject, a description of the methodologies used, and a discussion of the results. The authors describe computational ways to achieve a rational design of bioactive compounds with various therapeutic applications, including antitumoral agents, antitubercular drugs, nonsteroidal anti-inflammatory drugs, and radiopharmaceuticals.

**Energy Efficient Building Design** Ana-Maria Dabija, 2020-04-11 This book is the result of recent research that deals with the built environment and innovative materials, carried out by specialists working in universities and centers of research in different professional fields — architecture, engineering, physics — and in an area that spans from the Mediterranean Sea to the Persian Gulf, and from South Eastern Europe to the Middle East. This book takes the necessity of re-shaping the concept of building design in order to transform buildings from large scale energy consumers to energy savers and producers into consideration. The book is organized in two parts: theory and case studies. For the theoretical part, we chose from the wide range of sources that provide energy efficient materials and systems the two that seem to be endless: the sun and vegetation. Their use in building products represents a tool for specialists in the architectural design concept. The case-studies presented analyze different architectural programs, in different climates, from new buildings to rehabilitation approaches and from residential architecture to hospitals and sports arenas; each case emphasizes the interdisciplinarity of the building design activity in order to help readers gain a better understanding of the complex approach needed for energy efficient building design

*Multilayer Thin Films* Sukumar Basu, 2020-01-15 This book, *Multilayer Thin Films-Versatile Applications for Materials Engineering*, includes thirteen chapters related to the preparations, characterizations, and applications in the modern research of materials engineering. The evaluation of nanomaterials in the form of different shapes, sizes, and volumes needed for utilization in different kinds of gadgets and devices. Since the recently developed two-dimensional carbon materials are proving to be immensely important for new configurations in the miniature scale in the modern technology, it is imperative to innovate various atomic and molecular arrangements for the modifications of structural properties. Of late, graphene and graphene-related derivatives have been proven as the most versatile two-dimensional nanomaterials with superb mechanical, electrical, electronic, optical, and magnetic properties. To understand the in-depth technology, an effort has been made to explain the basics of nano dimensional materials. The importance of nano particles in various aspects of nano technology is clearly indicated. There is more than one chapter describing the use of nanomaterials as sensors. In this volume, an effort has been made to clarify the use of

such materials from non-conductor to highly conducting species. It is expected that this book will be useful to the postgraduate and research students as this is a multidisciplinary subject.

**Vascular Tissue Engineering** Feng Zhao, Kam W. Leong, 2021-10-01 This volume explores the latest techniques used to study the field of tissue engineered vascular grafts (TEVGs). The chapters in this book cover a wide array of topics such as deriving vascular cells from monocytes and induced pluripotent stem cells; engineering vascular grafts using various biomaterials and stem cells, stem cell-derived, or primary vascular cells; biomaterial modification by anticoagulation molecules; vascular bioengineering technologies such as 3D bioprinting; and fabrication of TEVGs with different geometry and multiphase structures. This book also features protocols for grafting and evaluation of vascular grafts in animal models, vascular imaging in animals, and the quantification of blood vessel permeability. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and practical, *Vascular Tissue Engineering: Methods and Protocols* is a valuable resource for biomedical engineers, cell biologists, vascular surgeons, doctors, and nurses.

**The Spirit Born People** Puran Singh, 2017-08-22 These are the lecture notes for addresses I proposed to deliver to the Sikh youth of the Punjab. But as I am placed in the desert away from the towns where they gather, I let these go undelivered. And also because the Sikh youth are running in haste after shadows, turning their backs on the Sun of Suns, the Guru. This world of the Guru, the Beautiful, is different and their world how different; so to them the values of fiction and fact have been hopelessly interchanged. Still, I hope these addresses will reach them by and by. And the Sikh youth is everywhere, the youth that has the disciple-consciousness, aspiring to love, the Beautiful, which alone is truly good, truly noble, and truly divine. The form Beautiful appearing once rarely in ages, and fascinating the disciple-consciousness and vanishing in the eternal background of the spiritual inner Infinite, is the Guru Beautiful, the Bridegroom; the disciple-consciousness thenceforward restless without that presence or the sense of that presence is The Spirit Born People, -or The Brides.
