Drawing on the Air Tim Prentice, 2012-06-19 In the New York Times Michael Kimmelman called them sleek, whimsical contraptions in a modernist mode; the Basler Zeitung termed them net-like structures . . . like hedgehogs or serpents. The kinetic sculptures of Tim Prentice create a novel geometry of air and light. Concentrating on movement rather than object, Prentice harnesses natural elements into his art machines-delicate structures that walk the tightrope between order and chaos, control and serendipity, understated technique and extravagant wonder. Prentice purposely circumscribes the artist's prerogatives, distilling the power of wind and sun into an ever-changing dance of light and shadow. These understated, subtle inventions provide endless distraction, delighting the child in all of us. *Drawing on Air* offers a many-sided vision of the kinetic sculptor and his works. An essay by Nicholas Fox Weber introduces the artist and his work, while a chapter on Mechanics explains some of the physical principles underlying Prentice's whimsical sculptures. Photographs of works-in-progress, principal public commissions as well as occasional pieces created for casual amusement are punctuated by the artist's mordant, sometimes mischievous comments. Prentice's sculptures . . . are about fluid movement and change, reminding us that everything is in flux. . . . Wonders of engineering, they create evanescent drawings in thin air. -Michael Amy, *Art in America* What is grand in these sculptures is the sense of immensity created by their movements, a sense resonant with our most pleasurable apprehensions of land, sea, and sky. -Elaine Bleakney, *Sculpture* These refined sculptures are never ponderous, plump or boring but constantly and slowly transforming themselves as though imbued by perpetuum mobile. -Karen Gerig, *Basler Zeitung* Experiencing Tim Prentice's work is like taking a ride on a roller coaster -Catalog of the Connecticut Biennial

Alexander Calder Ann Coxon, Penelope Curtis, Marko Daniel, Thomas Fichter, Sérgio B. Martins, Vassilis Oikonomopoulos, A. S. C. Rower, Alex J. Taylor, 2015-01-01 An insightful new look at one of the 20th century's most celebrated artistic visionaries Alexander Calder (1898-1976) is one of modernism's most captivating and influential figures. First trained as a mechanical engineer, Calder relocated from New York to Paris in the mid-twenties where his acceptance into the city's burgeoning avant-garde circles coincided with the development of his characteristic form of kinetic sculpture. His early work *Cirque Calder*, which was presented throughout Paris to great acclaim, prefigures the performance and theatrical aspects that dominate Calder's pioneering artistic works and are situated as a primary subject of intrigue in this publication. Rather than simply refashion sculpture's traditional forms, Calder envisioned entirely new possibilities for the medium and transformed its static nature into something dynamic and responsive. *Alexander Calder: Performing Sculpture* provides detailed insight into that pioneering process through reproductions of personal drawings and notes. Also featured is new research from a wide range of renowned scholars, furthering our understanding of the remarkable depth of Calder's beloved mobile sculptures and entrenching his status as an icon of modernism.

Keep It Moving? Rachel Rivenc, Reinhard Bek, 2018-03-13 Kinetic art not only includes movement but often depends

on it to produce an intended effect and therefore fully realize its nature as art. It can take a multiplicity of forms and include a wide range of motion, from motorized and electrically driven movement to motion as the result of wind, light, or other sources of energy. Kinetic art emerged throughout the twentieth century and had its major developments in the 1950s and 1960s. Professionals responsible for conserving contemporary art are in the midst of rethinking the concept of authenticity and solving the dichotomy often felt between original materials and functionality of the work of art. The contrast is especially acute with kinetic art when a compromise between the two often seems impossible. Also to be considered are issues of technological obsolescence and the fact that an artist's chosen technology often carries with it strong sociological and historical information and meanings.

Gorgeous archival photos capture Calder's transformation of sculpture with his invention of the mobile With multiple essays by renowned scholars, artwork and installation images, and a suite of historic photographs of Alexander Calder's (1898-1976) work taken by Marc Vaux in the 1930s, this catalog traces the breadth of Calder's innovative practice, leading up to his conception of the mobile in 1931--an unprecedented form of kinetic sculpture that radically altered the trajectory of modern art. Alexander Calder is one of the most acclaimed and influential sculptors of the 20th century. He is renowned for his invention of wire sculpture--coined by critics as drawings in space--and the mobile, a kinetic sculpture of suspended abstract elements whose actual movement creates ever-changing compositions. Also included is a lively series of drawings Calder made at the Bronx and Central Park zoos of animals in motion, which recall his wire sculptures of the same subjects.

Kinesthesia Dan Cameron,2017 This book examines pioneering Latin American kinetic artists who helped develop

kinetic art into an international movement. *Kinesthesia: Latin American Kinetic Art, 1954-1969* examines the influential and visually stunning work of South American kinetic artists. While Southern California was becoming the North American epicenter for Light and Space art in the 1960s, separate yet closely related technical experiments had been unfolding in a handful of major cities of South America, as well as in Paris, the European center for kinetic art. *Kinesthesia* highlights the broad differences that emerged among the two principal South American centers of activity: Argentina, where kinetic art grew out of local debates about painting; and Venezuela, where pioneering notions of modern architecture stimulated a synthesis of art and design. Featured in this volume are kinetic sculptures and installations by Jesús Rafael Soto, Julio Le Parc, Carlos Cruz-Diez, Martha Boto, and others, as well as essays that explore the history of this movement, examine the artists' reception by European and American audiences in the context of the Cold War, and link their achievements to 21st-century artists and their work.

Kinetic Flying Sculptures Ondrej Mitas, 2018-05-13 This is a book of flying kinetic sculptures by Ondrej Mitas. These works are not models of things that fly, but rather models of flight itself. The book describes why and how they are made, how they fly, and the counterintuitive reactions they spark in people. Beautiful photos show the works in their full complexity and diversity. It is essential for any good collection of books about innovative 21st century artists, kinetic sculpture, aviation, or flight.
