Pacific Basin Working Paper Series ,2001

The Road Not Taken Michael Reisch,Janice Andrews,2014-05-22 *The Road Not Taken* takes a new perspective on the course of social welfare policy in the twentieth century. This examination looks at the evolution of social work in the United States as a dynamic process not just driven by mainstream organizations and politics, but strongly influenced by the ideas and experiences of radical individuals and marginalized groups as well.

Human-Computer Interaction I. Scott MacKenzie,2024-01-15 *Human-Computer Interaction: An Empirical Research Perspective* is the definitive guide to empirical research in HCI. The book begins with foundational topics including an historical context, the human factor, interaction elements, and the fundamentals of science and research. From there, readers will progress to learning about the methods for conducting an experiment to evaluate a new computer interface or interaction technique. There are detailed discussions and how-to analyses on models of interaction, focusing on descriptive models and predictive models. Writing and publishing a research paper is explored with helpful tips for success. Throughout the book, readers will find hands-on exercises, checklists, and real-world examples. This is a must-have, comprehensive guide to empirical and experimental research in HCI – an essential addition to your HCI library. Provides a master, A-to-Z guide in a concise, hands-on reference Presents the practical and theoretical ins-and-outs of user studies Includes exercises, takeaway points, and case studies throughout Updated to incorporate developments in HCI, including Human performance outliers, Interaction elements: pointing and selecting; text input; gesture input

Quantum Continuous Variables Alessio Serafini,2023-08-18 *Quantum Continuous Variables* introduces the theory of continuous variable quantum systems, from its foundations based on the

framework of Gaussian states to modern developments, including its applications to quantum information and forthcoming quantum technologies. This book addresses the theory of Gaussian states, operations, and dynamics in great depth and breadth, through a novel approach that embraces both the Hilbert space and phase descriptions. The second edition of this book has been revised throughout, and updated to include new topics, such as boson sampling, coherent feedback, nonlinear control, as well as several new solved problems. The volume includes coverage of entanglement theory and quantum information protocols, and their connection with relevant experimental set-ups. General techniques for non-Gaussian manipulations also emerge as the treatment unfolds and are demonstrated with specific case studies. This book will be of interest to graduate students looking to familiarise themselves with the field, in addition to experienced researchers eager to enhance their understanding of its theoretical methods. It will also appeal to experimentalists searching for a rigorous but accessible treatment of the theory in the area. Features Provides the first systematic graduate-level textbook for the field of quantum continuous variables and includes 77 problems for the reader, with accompanying solutions Explores applications to entanglement theory, nonlocality, quantum technologies and quantum control Describes, in detail, a comprehensive list of experimental platforms where the formalism applies Alessio Serafini earned his PhD from the University of Salerno. He is currently a Professor at University College London. His research focuses mainly on quantum optics, quantum information with continuous variables, and the theory of quantum control.

Interactive Systems. Design, Specification, and Verification Philippe Palanque, Fabio Paterno, 2003-06-29 The wait for the year 2000 was marked by the fear of possible bugs that might have arisen at its beginning. One additional fear we had during this wait was whether - organising this event would have generated a boon or another bug. The reasons for this fear originated in the awareness that the design of interactive systems is a fast moving area. The type of research work presented at this unique event has received limited support from funding agencies and industries making it more difficult to keep up with the rapid technological changes occurring in interaction technology. However, despite our fear, the workshop was successful because of the high-quality level of participation and discussion. Before discussing such results, let us step back and look at the evolution of DSV-IS (Design, Specification and Verification of Interactive Systems), an international workshop that has been organised every year since 1994. The first books that addressed this issue in a complete and thorough manner were the collection of contributions edited by Harrison and Thimbleby and the book written by Alan Dix, which focused on abstractions useful to highlight important concepts in the design of interactive systems. Since then, this area has attracted the interest of a wider number of research groups, and some workshops on related topics started to be organised. DSV-IS had its origins in this spreading and growing interest. The first workshop was held in a monastery located in the hills above Bocca di Magra (Italy).

Covid Stories from East Africa and Beyond Njeri Kinyanjui, Kathryn Toure, 2020-11-11 The coronavirus has rattled humanity, tested resolve and determination, and redefined normalcy. This compelling collection of 29 short stories and essays brings together the lived experiences of covid19 through a diversity of voices from across the African continent. The stories highlight challenges, new opportunities, and ultimately the deep resilience of Africans and their communities. Bringing into

conversation the perspectives of laypeople, academics, professionals, domestic workers, youth, and children, the volume is a window into the myriad ways in which people have confronted, adapted to, and sought to tackle the coronavirus and its trail of problems. The experiences of the most vulnerable are specifically explored, and systemic changes and preliminary shifts towards a new global order are addressed. Laughter as a coping mechanism is a thread throughout.

The Tide: The Science and Stories Behind the Greatest Force on Earth Hugh Aldersey-Williams, 2016-09-20 “Superb. . . . A gently studious Bill Bryson crossed with an upbeat and relaxed WG Sebald.”—James McConnachie, Sunday Times (UK) Half of the world’s population today lives in coastal regions lapped by tidal waters. But the tide rises and falls according to rules that are a mystery to almost all of us. In *The Tide*, celebrated science writer Hugh Aldersey-Williams weaves together centuries of scientific thinking with the literature and folklore the tide has inspired to explain the power and workings of this most remarkable force. Here is the epic story of the long search to understand the tide from Aristotle, to Galileo and Newton, to classic literary portrayals of the tide from Shakespeare to Dickens, Melville to Jules Verne. Throughout, Aldersey-Williams whisks the reader along on his travels: He visits the Bay of Fundy in Nova Scotia, where the tides are the strongest in the world; arctic Norway, home of the raging tidal whirlpool known as the maelstrom; and Venice, to investigate efforts to defend the city against flooding caused by the famed acqua alta.

The Ghost-Eater and Other Stories Diane Awerbuck, 2013-09-01 Thirty-one new writers make their debut in *The Ghost-Eater and Other Stories*, a collection compiled by Diane Awerbuck and edited by Louis Greenberg. Funny and sad and highly original, the stories in *The Ghost-Eater and Other Stories* are invested with the passion, truth and quirkiness of the newest New South Africa and gives readers a chance to gauge the newest authors writing in South Africa at the moment.

Fabrics and Pattern Cutting Winifred Aldrich, 2013-03-18 Getting the right cut for the right fabric is the key to good design. One of the most challenging aspects of a fashion designer's training is learning how to create patterns that utilize the characteristics of fabrics. With an ever expanding range available, an understanding of the relationship between fabric, form and pattern shape is now the most important skill a designer has to acquire. Winifred Aldrich, a leading pattern cutting authority, explores how a garment's shape is created and discusses the factors that need to be considered when creating patterns and offers you a practical method for solving problems. No other pattern cutting book considers the effects of individual fabrics and its approach is based on the appraisal of the fabric and body shape. *Fabrics and Patterns Cutting* is the revised and simplified edition of *Fabric, Form and Flat Pattern Cutting*. It is fully illustrated and makes use of numerous practical examples. It also takes into account important new developments in fabric - new fabrics, new methods of fabric construction and new fabric finishes. Free block patterns are available online for readers to print out for use in their classes.

Little Kingdom by the Sea Mark Zegeling, 2015-05 Since the 1950s, KLM Royal Dutch Airlines has presented Delft Blue miniature houses to its Business Class passengers. These replicas of historic houses and national monuments are considered to be iconic of the Netherlands worldwide. 'Little Kingdom by the Sea' offers an exclusive peek into the lives of the inhabitants of the KLM houses. These pioneers, bold adventurers and other colorful figures made their mark on Dutch history. Extensive research including interviews with architectural historians and current residents have yielded a wealth of new information, engaging anecdotes, unique and juicy stories.

Air Transport Management Lucy Budd, Stephen Ison, 2016-11-10 Commercial air transport is a global multimillion dollar industry that underpins the world economy and facilitates the movement of over 3 billion passengers and 50 million tonnes of air freight worldwide each year. With a clearly structured topic-based approach, this textbook presents readers with the key issues in air transport management, including: aviation law and regulation, economics, finance, airport and airline management, environmental considerations, human resource management and marketing. The book comprises carefully selected contributions from leading aviation scholars and industry professionals worldwide. To help students in their studies the book includes case studies, examples, learning objectives, keyword definitions and 'stop and think' boxes to prompt reflection and to aid understanding. Air Transport Management provides in-depth instruction for undergraduate and postgraduate students studying aviation and business management-related degrees. It also offers support to industry practitioners seeking to expand their knowledge base.

Cognition Arnold Lewis Glass, 2016-03-21 Drawing on a modern neurocognitive framework, this full-color textbook introduces the entire field of cognition through an engaging narrative. Emphasizing the common neural mechanisms that underlie all aspects of perception, learning, and reasoning, the text encourages students to recognize the interconnectivity between cognitive processes. Elements of social psychology and developmental psychology are integrated into the discussion, leading students to understand and appreciate the connection between cognitive processing and social behavior. Numerous learning features provide extensive student support: chapter summaries encourage students to reflect on the main points of each chapter; end-of-chapter questions allow students to

review their understanding of key topics; approximately two hundred figures, photos, and charts clarify complex topics; and suggestions for further reading point students to resources for deeper self-study. The textbook is also accompanied by eight hundred multiple-choice questions, for use before, during, and after class, which have been proven to dramatically improve student understanding and exam performance.
