*Time-lapse Photography: A Complete Introduction to Shooting, Processing, and Rendering Time-lapse Movies with a DSLR Camera* Ryan Chylinski, 2012-04 A complete introduction to shooting, processing and rendering time-lapse movies with a DSLR camera. Written for new and intermediate DSLR users and time-lapse photographers this guide offers a detailed and easy to follow photo rich workflow to capture and produce great time-lapse movies.

*Lapse* Alex Rodriguez, 2021-09-10 Nora knows the rules. Find the time marker, never reveal the secrets of the universe, don't get involved in the time marker's lives. However, in nearly every single life cycle, they're paired together, when it comes to Mason, she breaks all the rules again and again. She found him when he was twelve. In high school, Nora taught him his place in the universe. And their lives were thoroughly intertwined-now more than ever. Despite her mistakes, Nora's job was easy enough, until everything took a sharp turn. Mason is angry with her, with the universe telling her who she ought to be. Nora knows her role, and what responsibility means. She isn't about to start questioning why things are the way they are, though in her heart her efforts are beginning to unfurl a fog over her judgment. To add to their cosmic dysfunction, Mason and Nora are only one time warp away from being discovered by time travelers, who would like nothing more than to see Mason restart a life cycle, or thrown out of time completely...

*When Conversation Lapses* Elliott M. Hoey, 2020-01-08 Silence takes on

meaning based on the contexts of its occurrence. This is especially true in social interactions: consider the difference between silence after *lemme think*, and silence after *will you marry me?* This book examines a particular form of silence, the conversational lapse. These regularly appear in conversations when all interactants pass up the opportunity to speak, and are moments when talk seems to falter or give way to matters extraneous to the conversation. What are these silences for the participants who, by virtue of not speaking, allowed them to develop? Elliott M. Hoey here offers the first in-depth analysis of lapses in conversation. Using methods from Conversation Analysis, the author explores hundreds of lapses in naturally occurring social occasions with each chapter focusing on a different aspect of how participants produce and locate order in lapses. Particular emphasis is given to how lapses emerge, what people do during the silence, and how they restart conversation afterwards. This research uncovers participants' methods for organizing lapses in their everyday affairs such that those silences are rendered as understandable periods of non-talk. By articulating participants' understandings of when and where talk is relevant, necessary, or appropriate, the research brings into focus the borderlines between talk-in-interaction and other realms of social life. This book shows lapses to be a particular and fascinating kind of silence with unique relevancies for the social situations of which they are a part.

**A Lapse Of Memory** Alice Heaven, 2004-05-13 Lara, who is in her early 30's

and suffering from amnesia caused by trauma to her head, awakes to find herself all alone in an old farmhouse. The man who lives there arrives to find her and feels resentful that she has intruded in his life. Becoming accustomed to having her there, he tries in his crude way to help her. She meets a waitress who becomes her close friend and, with some influential friends, Lara discovers who she is and the reason for her amnesia. A surprising ending to this story.

**Creative Nightscapes and Time-Lapses** Mike Shaw, 2018-12-07 Creative Nightscapes and Time-Lapses is your all-in-one guide to making spectacular, multi-image nightscapes and time-lapses. Covering everything from conceptualization and planning to post-processing, this book features innovative cookbook-style recipes for each composite nightscape and time-lapse project. Beginning with a review of the key fundamentals of astronomy and photography, author Mike Shaw covers the latest methods for planning your night shooting sessions and how to set up your gear to get the best constituent images. The book precisely details how to combine images into 12 different varieties of state-of-the-art nightscape trophies, each impossible to capture in a single image, before demonstrating how to create stunning level and ramp time-lapses that transition fluidly from day to night. Each nightscape and time-lapse project category includes specific tips for (i) acquiring the constituent images; (ii) assembling them into the composite image or time-lapse; (iii) overcoming common obstacles and (iv) finding the

best subjects. Providing examples of how to apply these techniques in the field through four detailed case studies, including one, three-night immersive retreat, this book is the comprehensive guide to creating creative nightscapes and time-lapses.

Lapse Sarah Thornton, 2019-08-06 Small town secrets and divisions come bubbling to the surface in Sarah Thornton's gripping debut crime novel.

**How to Photograph & Process Nightscapes and Time-Lapses** Alan Dyer, 2014-11-22 The book describes – How to shoot and process still image “nightscapes” – images of landscapes taken at night by the light of the Moon or stars ... and ... How to shoot and assemble time-lapse movies of the stars and Milky Way turning above Earthly scenes, all using DSLR cameras. The 400-page multi-touch book includes – 50 embedded HD videos (no internet connection required) demonstrating time-lapse techniques. 60 multi-page tutorials with step-by-step instructions of how to use software: Adobe Bridge, Adobe Camera Raw, Photoshop, Lightroom, LRTimelapse, Advanced Stacker Actions, StarStaX, Panolapse, Sequence, GBTimelapse, and more. Numerous Photo 101 sections explaining the basic concepts of photography and video production (f-stops, ISOs, file types, aspect ratios, frame rates, compression, etc.). Numerous Astronomy 101 sections explaining the basics of how the sky works (how the sky moves, where the Moon can be found, when the Milky Way can be seen, when and where to see auroras). Reviews of gear – I don't just mention that specialized gear exists, I illustrate in detail how to use popular units such

as the Time-Lapse+, Michron, and TriggerTrap intervalometers, and the All-View mount, Radian, Mandarin Astro, eMotimo, and Dynamic Perception motion-control units, with comments on what's good – and not so good – to use. You'll learn – What are the best cameras and lenses to buy (cropped vs. full-frame, Canon vs. Nikon, manual vs. automatic lenses, zooms vs. primes). How to set your cameras and lenses for maximum detail and minimum noise (following the mantra of “exposing to the right” and using dark frames). How to shoot auroras, conjunctions, satellites, comets, and meteor showers. How to shoot nightscapes lit only by moonlit, and how to determine where the Moon will be to plan a shoot. How to shoot & stitch panoramas of the night sky and Milky Way, using Photoshop and PTGui software. How to shoot tracked long exposures of the Milky Way using camera trackers such as the iOptron Star Tracker and Sky-Watcher Star Adventurer. How to develop Raw files, the essential first step to great images and movies. How to process nightscape stills using techniques such as compositing multiple exposures, masking ground and sky, and using non-destructive adjustment layers and smart filters. How to shoot and stack star trail images made of hundreds of frames. How to assemble time-lapse movies from those same hundreds of frames. How to plan a time-lapse shoot and calculate the best balance of exposure time vs. frame count vs. length of shoot, and recommended apps to use. How to process hundreds of frames using Adobe Camera Raw, Bridge, Photoshop, and Lightroom. How to shoot and process advanced “Holy Grail” time-lapse transitions from

day to night. How to shoot motion-control sequences using specialized dolly and pan/tilt devices. How to use time-lapse processing tools such as LRTimelapse, Panolapse, Sequence, and Advanced Stacker Actions. What can go wrong and how best to avoid problems in the field.

**Time Lapse** John Harper, 2011-07-15 TIME LAPSE: COLLAPSE is one of a three book series that tells the story of Duncan Duggard, a 14-year-old boy who lives with his grandparents in a small town in Michigan. A sensitive boy, Duncan is often bullied at school and sometimes experiences strange stoppages of time. After Duncan's grandparents give him a beautiful silver amulet necklace as a birthday gift, Duncan is visited by the ghost of his late mother, who tells him that time itself is in danger of collapsing and that only he is the only one with the power to stop this catastrophe. Heeding his mother's call, Duncan sets out on a series of amazing adventures that change both him and the world around him.

**Momentary Lapse** Laurie Larsen, Laura Larsen, 2004-03 For Lydia Pisani, life is not easy. Raising any two small children alone in this day and age is challenging at best; add into the mix her children, and every day becomes a lesson in self-control. Angela is seven years old going on twenty-five. When she zaps one of her Get real, Mom looks, Lydia has to wonder if Angela should rightfully be the mother, and Lydia the child. And then there's three-year-old Markie. Talk about a one-child tornado. He rips through a room, leaving an undeniable path of devastation. Angela undergoes a tonsillectomy and Lydia

brings her home to recover, hoping for a day of bonding. Unfortunately, Angela sleeps on the couch all afternoon. When it's time to pick Markie up from day care, Lydia is faced with a decision: awaken the patient to drag her along, or leave her sleeping peacefully. What turns out to be her momentary lapse in judgment changes the fabric of her life for a long time to come.
