*Creating with Laser Cutters and Engravers* Mary-Lane Kamberg, 2016-12-15 This book explores the general world of the Fab Lab (fabricating laboratory) with an in-depth focus on two specific types of machinery: laser cutters and engravers used to create through the removal of material from its source. It includes tips and tricks for operating laser cutters and engravers, providing a variety of projects for every experience level, all the while connecting these skills to real-world business models and careers.

**The Laser That's Changing the World** Todd Neff, 2018 Tells the story of a laser technology that will have a big impact on society and the brilliant innovators responsible for its development. Lidar--a technology evolved from radar, but using laser light rather than microwaves--has found an astounding range of applications, none more prominent than its crucial role in enabling self-driving cars. This accessible introduction to a fascinating and increasingly vital technology focuses on the engaging human stories of lidar's innovators as they advance and adapt it to better understand air, water, ice and Earth - not to mention mapping Mars and Mercury, spotting incoming nuclear warheads, and avoiding pedestrians and cyclists on city streets. Award-winning science writer Todd Neff invites readers behind the scenes to meet some of the great innovators who have explored and expanded the uses of this amazing technology: people like MIT scientist Louis Smullin, whose lidar bounced light off the moon soon after the laser's invention; Allan Carswell, who plumbed the shallows of Lake Erie en route to developing the aerial lidar now essential for coastal mapping and hurricane damage assessment; Red Whittaker, the field robotics pioneer who was putting lidar on his autonomous contraptions as early as the 1980s; and David Hall, whose laser sombrero on a Toyota Tundra gave birth to modern automotive lidar. These are just some of the stories Neff tells before looking ahead to a future that could bring lidar to unpiloted air taxis, to the contaminated pipes of the U.S. nuclear weapons complex, and to satellites capable of pinpointing greenhouse gas sources from orbit. As the author makes clear, the sky is no limit with lidar, which promises to make our world safer, healthier, and vastly more interesting.

*Beyond the Makerspace* Ann Shivers-McNair, 2021-06-07 Makerspaces--local workshops that offer access to and training on fabrication technologies, often with a focus on creativity, education, and entrepreneurship--proliferated in the 2010s, popping up in cities across the world. *Beyond the Makerspace* is a longitudinal, ethnographically informed study of a particular Seattle makerspace that begins in 2015 and ends with the closing of the space in 2018. Examining acts of making with objects, tools, words, and relationships, *Beyond the Makerspace* reads making as a kind of rhetoric, or meaning-making work, and argues that acts of making things are rhetorical in the sense that they are culturally situated and that they mark boundaries of what counts as making and who counts as maker. By focusing on a particular makerspace over time, Shivers-McNair attends to a changing cohort of makerspace regulars as they face challenges of bringing their vision of inclusivity and diversity to fruition, and offers an examination of how makers are made (and unmade, and remade) in a makerspace. *Beyond the Makerspace* contributes not only to our understanding of making and makerspaces, but also to our understanding of how to study making--and meaning making, more broadly--in ways that examine and intervene in the marking of difference. Thus, the book examines what (and whose) values and practices we are taking up when we identify as makers or when we turn a writing classroom or a library space into a makerspace.

Laser Cutting Guide for Manufacturing Charles L. Caristan, 2004 *Laser Cutting Guide for Manufacturing* presents practical information and troubleshooting and design tools from a quality manufacturing perspective. Equally applicable to small shops as it is to large fabricator companies, this guide is a roadmap for developing, implementing, operating, and maintaining a laser-cutting manufacturing enterprise. The book focuses on metal cutting of sheets, plates, tubes, and 3-D shaped stampings. It presents today's reality of the engineering and business challenges, and opportunities presented by the rapid penetration cutting in all facets of industry.

**Playing with Pop-ups** Helen Hiebert, 2014-05-01 Dive into the enchanting world of pop-ups and handmade paper crafts. Join author Helen Hiebert as she guides you through materials, tools and pop-up basics including parallel folds, angle folds, combinations and variations, and layered pop-ups. Enjoy creating 20 projects to play with ranging from cards and books to buildings, graphic design pieces, and more. Featuring a high-end gallery of artists, whose beautiful work will inspire you to make your own amazing paper art, *Playing with Pop-Ups* will teach you to create interactive pieces that everyone will enjoy.

*CO2 Laser Cutting* John Powell, 2012-12-06 The laser has given manufacturing industry a new tool. When the laser beam is focused it can generate one of the world's most intense energy sources, more intense than flames and arcs, though similar to an electron beam. In fact the intensity is such that it can vaporise most known materials. The laser material processing industry has been growing swiftly as the quality, speed and new manufacturing possibilities become better understood. In the fore of these new technologies is the process of laser cutting. Laser cutting leads because it is a direct process substitution and the laser can usually do the job with greater flexibility, speed and quality than its competitors. However, to achieve these high speeds with high quality considerable know how and experience is required. This information is usually carefully guarded by the businesses concerned and has to be gained by hard experience and technical understanding. Yet in this book John Powell explains in lucid and almost non technical language many of these process wrinkles concerning alignment, cornering, pulsing, water jets, material properties, cutting speeds as well as tricks with surface coating and much much more. It is a book which managers and technicians in laser job shops and laser processing facilities would be foolish not to read.

*Doctor Who: Summer Falls and Other Stories* Amelia Williams, Justin Richards, Melody Malone, 2013-10-24 With a new introduction by Amelia Williams, as well as a rare interview with the reclusive author, 'The Girl Who Never Grew Up'. *Summer Falls* by Amelia Williams In the seaside village of Watchcombe, young Kate is determined to make the most of her last week of summer holiday. But when she discovers a mysterious painting entitled 'The Lord of Winter' in a charity shop, it leads her on an adventure she never could have planned. The painting is a puzzle - and with the help of some bizarre new acquaintances, she plans on solving it... (Inspired by the Doctor Who episode 'The Bells of Saint John') *The Angel's Kiss* by Melody Malone Detective Melody Malone has an unexpected caller: movie star Rock Railton thinks someone is out to kill him - and when he mentions the 'kiss of the Angel', she takes the case. At the press party for Railton's latest movie, studio owner Max Kliener invites Melody to become their next star. But the cost of fame, she'll soon discover, is greater than anyone could possibly imagine. (Inspired by the Doctor Who episode, 'The Angels Take Manhattan') *Devil in the Smoke*, as recounted by Mr Justin Richards On a cold day in December, two young boys, tired of sweeping snow from the workhouse yard, decide to build a snowman - and are confronted with a strange and grisly mystery. In horrified fascination, they watch as

their snowman begins to bleed... The search for answers to this impossible event will plunge Harry into the most hazardous – and exhilarating – adventure of his life. (Inspired by the Doctor Who episode, 'The Snowmen')

**The Power of Story** Joan Wink Ph.D.,2017-11-07 Through this book, readers will discover that stories can move the human heart and head in ways that research cannot. Stories bring together readers, writers, librarians, teachers, students, and families in the libraries of today and will continue to do so tomorrow. Written for all those lovers of literacy, this book links libraries and literacies through the power of stories. The book is not filled with data in the form of pie charts, graphs, and tables. Rather, the truth of the research is grounded in authentic stories that reflect not only the interpretation of data, but also the transformative nature of literacies and libraries. The author's primary goal is that readers will come to value and use storytelling in their own professional and personal lives to explain and expand on complex concepts and to make information more accessible for all. The book begins by presenting anecdotes and the author's personal story to lay the foundation for what literacies are, and what literacy is not. An activity, Spiral of Literacy, allows readers to reflect on their own literacies. Chapters that follow each begin with a story that sets the theoretical foundation. Each chapter concludes with an action section that demonstrates how to turn theory to practice, whether you are in a library, a classroom, or at home. A final chapter envisions what libraries might look like in 10 years, through interviews with librarians, teachers, and others interested in literacy.

**The Making of Things** Frank Jacobus,Angela Carpenter,Rachel Smith Loerts,Justin M. Tucker,Randal Dickinson,2021-07-29 The Making of Things is about effect and intention in the schematic architectural model, a deep dive into the nature of architectonic form as the underlying syntax for all architectural work. By focusing on primitive geometries alongside fundamental principles of architectural thinking and making, this book enhances the reader's capacity to intellectually and physically craft models that effectively communicate intention. With over 650 diagrams, this book acts as an expansive visual glossary that reveals the underlying structure of architectonics and acts as an encyclopedia of formal possibilities. Supporting essays in the book explore the nature of perception, abstraction, and metaphor to provide a theoretical basis of formal effects in architecture. This structure enables readers to make clear and direct connections between the things you construct and the reasons you construct them. This book is a bridge from the what to the why of form-making. It is a pedagogical notebook, a design primer that prompts discourse about the nature of objects. This is a must-have desk reference for beginning architecture and interior design students to stimulate their creative approaches and gain foundational knowledge of the underlying effects of formal typologies and how they manifest themselves in built forms around the world.

**Raising the Curtain** Brett Ashley Crawford,Paul Hansen,2024-01-31 Learn how emerging technologies benefit artists and performing arts organizations Raising the Curtain: Technology Success Stories from Performing Arts Leaders and Artists focuses on empowering artists and performing arts organizations in theater, dance, and music to grow audiences and to increase impact through smart and strategic uses of technology. **Imagining Transmedia** Ed Finn,Bob Beard,Joey Eschrich,Ruth Wylie,2024-04-23 How the blurring of media forms—transmedia—became the default for how we experience narratives, and how that cultural transformation has redefined the worlds of education, entertainment, and our increasingly polarized public discourse. Over the past decade, the power of narrative has been unleashed with awesome and terrifying consequences, and it has been consumed in its blurred media forms by millions of people as news, entertainment, and education. Imagining Transmedia, edited by Ed Finn, Bob Beard, Joey Eschrich, and Ruth Wylie, explores the surprising ways that narratives working across media forms became the default grammar for both media consumption and personal expression and how multiplatform storytelling creates new media literacies and modes of civil discourse. Understanding this shift reveals transmedia as an essential building block of media literacy today. Transmedia is how we create, interpret, and participate in our increasingly mediated society. It extends beyond popular culture into professional and public spheres while, at the same time, it fuels the misinformation and polarization that have contributed to America's fraying civic discourse. Reaching beyond traditional academic analyses, this probing collection of essays and conversations features transmedia practitioners sharing their experiences and inviting readers to imagine the types of multimodal stories and experiences they might create. Prioritizing conversation over a single unified theory, each section of this volume pairs thematically linked essays from international contributors with a dialogue between authors to create an accessible, practical synthesis of ideas.

**Cloth Stories** Ali Ferguson, 2024-03-14 A textile artist's guide to creating exquisite, intimate and nostalgic work inspired by the home. Ali Ferguson's work takes inspiration from domestic life and the objects that surround and comfort us in our homes. Vintage fabric and hand-embroidered text are beautifully paired to create evocative pieces that are imbued with the magic of everyday existence. In this wonderful book Ali reveals the secrets of her work and shares her ingenious methods for finding inspiration at home to create stunning work that uses embroidery, quilting, collage and found objects. Chapter One explains how to create 'threads of thought' that stem from the tiniest details within the rooms of your home, resulting in extensive mind maps you can use to inspire your finished work. Chapter Two shows how to translate these ideas into stitch and select the perfect materials for the mood you want to convey in your work. The rest of the chapters take you through the different rooms in a typical home, from kitchen to bedroom, giving a wealth of ideas for finding inspiration from each of these spaces in your own household, accessing memories, stories and emotions to help you create intensely personal and meaningful textile art pieces. Beautifully illustrated with the author's own work and that of other leading textile artists who draw inspiration from home life, this book revels in cloth and the joy that it brings to every textile artist. It is the ideal book for any artist or embroiderer who wants to explore new sources of inspiration on their very doorstep.

*Advances and Innovations in Nuclear Decommissioning* Michele Laraia, 2017-06-12 Advances and Innovations in Nuclear Decommissioning is an essential resource for industry professionals and academics interested in acquiring the most up-to-date information on the current state of nuclear decommissioning. Written and edited by the world's leading experts, this book considers lessons learned and new innovations in the field. Edited by Dr. Laraia, it is the perfect companion to his 2012 book, Nuclear Decommissioning, which critically reviews the nuclear decommissioning processes and technologies applicable to nuclear power plants and other civilian nuclear facilities. Where the earlier book covers the basics of decommissioning, this new book brings you up-to-date with new areas of interest and approaches, innovative technologies, and lessons learned by both the nuclear and non-nuclear decommissioning sectors. Focuses on new aspects, trends and innovative technologies Includes content on decommissioning after a severe accident, including the use of robotics Brings together information from around the world and considers the lessons learned from the non-nuclear sector as well
